Anyone know a good place to buy one?

I want a pretty decent one, kind of like this <http://www.halocigs.com/triton-black-starter-kit.html>

Just don't want to fork out \$80 for the whole thing

Anyone know a cheaper place to get them?

(And yes, I have been searching around the internet. I am just looking to see if anyone already knows a good place, that I have not looked at.)

Anything helps!

Thanks

~Josh

I would recamend a ego-t, its real easy to use really good hits and produces alot of smoke, For the parts, i would get these (I find it cheaper to buy the parts rather than a kit) for battery i would use [this](#)

The Vision Ego Clearomizer 2.0 was the 1st clearomizer i got and let me tell you it works like a charm can be found [here](#)

And lastly the charger [link](#)

I hope you look at that and enjoy vapeing sir.
