This eBook contains information that will be useful if you're new to monetizing.

Content (8/10)

To me this eBook includes what you as a beginner could possibly need to start making some money. The author explains different methods that you can start using, the eBook contains a few pictures nothing too fancy gets right to the point.

Grammar (10/10)

None that I could see.

Originality (5/10)

Not original at all to me all the methods are well known but maybe not to a beginner who's looking to start somewhere.

Ease of use (10/10)

Every method described is easy to follow it's easy as 1, 2, 3..

Overall (10/10)

Simple written eBook that goes straight to the point. Perfect for the beginner looking to start making some money. This is the author's first ever made eBook but it's a well written one. The methods will definitely remain unsaturated.

I highly recommend this eBook for beginners!

Hello. I'm [?Parazyd](#) and I will be reviewing your eBook.

Content: 9/10

This eBook has a nice layout and contains two methods. The eBook is very well written and contains all the info you'll need to make use of the methods explained.

Ease of Use: 8/10

The methods will require a bit of hard work, but everything is so well explained and you should have no problems following the methods. The second method is a bit more difficult, but it's very well explained and will be easy to follow.

Grammar: 10/10

Exceptional grammar, I have noticed some tiny mistakes in sentence syntax but they're nothing actually.

Final Review: 9/10

A very good eBook that contains various monetizing methods. In my opinion, the methods will remain unsaturated. The eBook contains examples of work that should help you with using the methods.

I highly recommend this eBook for beginners! Exactly. It's not meant to be a "make \$500 per day" ebook, rather one for learning. It gives various tips and tricks for online monetization. It is amazing for anyone struggling.

This is now the third e-book to use that same generic, crappy thread design. Nothing against the e-book itself, just saying.
