Thread: [Ratted A Real Pedophile \[What Should I Do?\]](#)

Regulus - November 11, 2013, 9:52 am

Hello there HF members. So today i was at a chat room and was there for one reason, and that was to RAT pedophiles as i'm against child pornography extremely much. One of these guys acted really creepy and i sent him my server over Skype. When i later on watched what he was doing on the computer i saw that he had over 5 different folders with over 100+ pictures in each folder. Almost all of these pictures were of naked kids. One picture was on a old woman going down on a kid. There is a lots of pictures on his computer of this but i'm not sure what i should do? The guy is about 35 years old and looks exactly like those pedophile types.

Should i report him to the Police or milk him to get some money?

Thanks for reading and please tell me what to do. ?

[LET ME KNOW IF THIS IS POSTED IN THE WRONG SECTION!]

Spyro The Dragon - November 11, 2013, 9:55 am

If you report him to the police, do it ANONYMOUSLY. If you are like "HEY SO I RATTED THIS GUY AND GOT THIS SHIT" you will be arrested too for it :P Just write them an email, send it through a VPN through a disposable E-Mail :3

ott-hon - November 11, 2013, 9:55 am

dox him, milk him, report him. move to the other .

Lady Deathstroke - November 11, 2013, 9:55 am

It depends do you want to see this guy banged up for a long time or do you want some short term cash and let him keep doing his thing with these kids? I know what I'd do I'd gather all the info I needed ASAP and report it anonymously to the police.

Mr.Green™ - November 11, 2013, 9:56 am

Milk the shit out of him and then report the bastard. That is what i would do anyway.

FairTrader - November 11, 2013, 9:56 am

Blackmail him, delete all the pictures & fuck his computer.

Regulus - November 11, 2013, 9:57 am

Thanks for the posts so far. I think i will do as Mr.Green said. Milk him a lot and report him to the Police anonymously.

Pedos are just disturbing people. But before you report him, make sure you delete your rat inside his machine just to make sure authorities can't trace the signal back to you. But you can keep in touch with him over Skype or some other chat service if you wish. Best of Lucks! ?

webspider - November 11, 2013, 10:03 am

Well, how are you going to report him?

"Hello Police, so this man is a pedo."

"How did you know that?"

"Oh I just ratted him and stuff."

"Kthx so let me just arrest you both."

If you want to report him, do it anonymously but provide proves (maybe a few screenshots of his PC.)

As someone said above I'll make a new Hotmail and send them a mail under a VPN. Yes thanks for the tips man ?

Yeah same here. And i will as well try to get his Facebook Details and post the proofs as Ononation said, that's a great idea.

And i never usually harm my slaves computers either. But this situation is something completely

different and i will bust this mans ass so hard.

Realistic - November 11, 2013, 10:35 am

Here's the problem: if you milk him then report him don't you think he'd tell the cops about that? Don't forget that they have his computer too so your server could be on there and all the payments on there too. VPN's are no guarantee

This is pure evil, and will probably get Regulus caught.

Onenation - November 11, 2013, 11:18 am

Pure evil? The only evil is the pedo having such pics.

Op send me the pedo and I will post all the proof :)

Applied - November 11, 2013, 11:38 am

Even if you delete him after reporting him there might still be traces of your server which leads back to you. And seeing as cybercrime is much worse than being a pedophile, i wouldnt even report him. Just delete and move on.

Mikhail601 - November 11, 2013, 12:54 pm

Keylog him for his paypal and steal his money and then fuck his computer up xd?

Milk him and then delete all his files.

Martinped - November 11, 2013, 2:06 pm

If you have a site where there are alot of pedos like this, I think you should share it. A larger army against this will make the pedos scared, and many of them will back off.

Get some hard evidence together, put it in a word document and place it on his desktop. Tell him to open it and say you will release to the authorities if he doesn't comply with your demands. Milk the pedo, don't actually report him.

longandfree - November 11, 2013, 2:16 pm

I say get the word out all over he's facebook and let those people report him and delete your server afterwards

xVulnerable - November 11, 2013, 2:31 pm

Blackmail him for \$1k, if that doesnt work out report him to the police anonymously.

Royal Bash - November 11, 2013, 2:39 pm

LevelUp - November 11, 2013, 2:40 pm

Dude don't fucking blackmail him, the majority of pedophiles are pedophiles due to childhood incidents or a mental condition.

The most you should do is report it. Don't ruin someones life.

Some people say to blackmail then report him, but I think the safest way (Both safety from legal charges and losing the chance to report him) is to report him anonymously. Save the blackmailing for lower level pedos (I'm kidding, I don't recommend you blackmail anyone, but ultimately it is up to you).

If he ever goes idle you could email it to the police from his email, probably hard as hell but its a thought. Sucks that anonymity for a situation like this is a little tricky.

I'd just delete this guy and move on.

As bad as being a pedophile is and looking a little boys/girls, aren't you a pedophile for invading someone's private area, his computer, and watching him and what he's doing.

Being a pedophile isn't just looking a little kids, it can be classed as much more.

I'm not saying, "Wow your a pedophile for using RAT's."

Each to their own, do what you want.

I'm just saying delete him and move on, it's the better option.

Yeah i'm a pedophile myself? Get your fact straight man, Ratting a pedophile doesn't make you a pedophile. I only RAT them for one reason and it is to make them stop doing what they do.

There's 1000's of pedos out there and i know it might be hard to make them stop but at least i'm trying to do something about it. When you RAT someones PC if you're now into Ratting stuff, I'm sure you would've take a look at their pictures, documents and so on.

If i was a pedophile i would for sure be into Ratting 10-12 years old instead.

So no, i'm not a pedophile anywhere and i watch their pictures once to see what they have. If i see CP i click the folder down and trying to do something about it instead of just leave it there and move on to the next pedophile. Then i don't do anything at all to make this stop.

Thanks and take care bud. :)

Dude, if you don't want the PD looking for a ratter, simply go low tech. You probably got this guy's name, so call the PD on a pay phone (yeah, they're around still) and say you were a friend that visited him recently. Say you found the shit, and copied all the pics and shit into a folder. Hide the folder where he wouldn't think to look and tell them where you hid it. Cops don't ask for info when you tell them you wanna be anonymous, bc they wanna catch fucks like this. This way, even if he deletes the folder HE has them in, you still have the copied shit. Now they got probable cause to seize his computer, AND if he deleted the folder he had them in, they will still be able to recover it, bc lets face it nothing is deleted forever really. Bam, dudes done. DON'T blackmail him, you do that, they coming for you too. If you want, buy a pre-paid phone, take a picture of the pics w it with something unique about his computer, wallpaper/info you wouldn't get unless you were "there"/ etc... and e-mail it to them. Either way, dudes busted and they won't think to look for a ratter. Delete your RAT regardless before you make the call. Good luck!

As i read through all the suggestions and ideas on catching this guy rather than you reporting it to police and thinking even though you help stop this guy it could come back on you for the rat, make it look like he kinda did himself over by accident by sending an email/msg on his accounts to the wrong person about it,,i dont think his parents or close friends would allow that kinda shit to go on then they would report it. Just copy these folders full of pics/vids whatever to another location in the hdd so when he tries to delete it all its still all there unknowingly someone get your rat out of there and hopefully youll be ok

Reading this really sparked my interest! I would call the police in his area from a burner phone and tell them you have this information and you want to turn it over to them but you want to make sure they won't come after you for ratting him. I would be surprised if they don't try and work something out with you. I want to try this! How awesome would it be to have a group of anti-pedos out there using tactics the police can't use to catch these guys! The real question is if he took the photos himself or got them from the net. If he got them from the net don't even bother reporting him, it's like plucking a leaf from a tree(doesn't do shit to the tree itself). But if you think he took them himself report the shit out of him ASAP.

abscond - November 20, 2013, 5:27 am

Im a bit new here... but a few comments on the posts ive seen in this topic.

1) some of you have no idea what a pedo is... a pedo and a pervert are two different things..

2) If you alert him before you report him.. the first thing he is going to do is scrub his harddrive. run it through a multi pass, secure delete, wiping program.. reformat his hard drive, change all his passwords etc.. and be done long before the police get around to following up and getting a warrant. If the cops are already watching him.. you are even more screwed for blowing a police investigation when he deletes the stuff. they will crucify you. you may not be the only one watching. not to mention youll feel bad if the guy is abusing kids and deletes the evidence.

3) The penalty for extortion.. "Under federal and state laws, extortion carries up to a 20-year prison sentence." .. you get less time for robbing a bank... so if your only looking for a grand.. your better off doing that.. If your gonna go the extortion route.. might as well go all in and go for the big bucks... or better yet skip that option and avoid jail.

4) kinda hard to make moral judgements when you install software to watch girls/women undress without them knowing about it, and to go through peoples personal crap on their HD. just sayin... no it doesn't make you a pedo obviously.. but it does kinda add you to the peeping tom perv list. which is fine.. but at least own it.

using the excuse that I only RAT people to find pedo's is a bit odd as well... its a strange hobby.. some would say you like the pictures and only use that as an excuse to justify why your searching for them all day.. not that, that is what im saying...

5) don't make copies of anything.. regardless of why you have it.. if for some reason you get busted for something else.. and forgot to secure delete it.. your screwed. as it doesn't matter how or why you obtained it. it will at least be used as leverage... to get you to confess to whatever else they are looking at you for.

If REAL children are involved that he has access to.. and we are not talking just possession of photograph here.. don't screw around. report it right away.. use tor or like someone said a payphone.. in an area with no camera's to get your plate. If you must use a vpn.. make sure its in russia..

just remember.. one screw up can lead to alot of jailtime.. so think anything through very clearly first... and let us know what happens. ?

I doubt it is that easy to get away with having kiddie porn on your comp, if it was everyone would use that defense. Plus, in my case, he has his person resume on that drive. You could easily see the date that other files were created and saved to the drive and if the date of his personal files goes along with the dates that he saved the CP to the drive he would not be able claim he didn't know about it.

And obviously ratting someone is a crime. But let's say I give an anonymous tip to the cops and lead them to this guy, I doubt that if they find my stub on his computer (which I will delete after tipping off the cops) that they would try and pursue me for my crimes. They would have a much bigger fish on their hook already. At least that's what I'm hoping...

gravemindx - November 21, 2013, 12:10 pm

report him to the cops, then delete your trace (stub) like you say.

If you want to be sure you don't get caught or pursued, maybe you should just let him go and unistall him.

write an email to the police with vpn and etc and upload files on a website and then give them the link of the files so they can check it.Then go to the next one ...
