Not pay per download, pay per 1000 views.

You get 1000 views on your image, get a maximum of 7.50 USD

Best of luck. :)

Are there surveys for viewing the image or is is just a simple skip ad functionality?

It is a simple thing where people just click the links.

Is there a certain time that they send the money out. (Everyday at x:xx)

Nerdi - November 11, 2013, 8:26 pm

Do people need to go directly to your website, or do you pay for images viewed on other sites (aka embedded images in Forums, blog posts etc).

This websites are quite dodgy and sketchy... they turn out to be a scam most of the times... They may be paying now but they can start scamming anytime they basically want... just a heads-up... was scammed by such a site before...

hey guys? how to upload can anyone tell meh?

SpaceKase - November 13, 2013, 11:06 pm

So let me get this straight...

I get people to go to the image, direct image, not the landing page
And I get paid per view?

or do they have to do the landing page then click the "view image" button?

M0t4w - November 14, 2013, 12:41 am

Just found out how to upload. Weird way to upload. But to OP. How do you get credited for your click exactly?? Do they have to click "Proceed to view the image" to be credited? OR do they just have to visit your picture URL.

they don't have to click proceed.

Tested it myself with proxys.

I'm still pending too, If by the end of Monday I don't get paid , I'm outs.

Did a little searching and found out that the payout rates for this site are absurdly high. I even contacted an admin from a long time/reputable site such as this and he said that even if they managed their funds to the best of their ability, they would still have trouble maintaining that site. So hopefully I can cash out b4 this site goes scam.

I hope OP keeps his word. In all honesty, his site is the BEST site for paid image hosting. Other sites they have to click a button plagued with porn advertisements BEFORE they see your image. With this site, They can see a preview of your image along with the proceed to view image download, which ISN'T a download like other sites, which can scare off viewers.

The only problem with the site is the Tier A payout. It's the highest out available right now. Unless those premium memberships payoff, it might cause some issues. I'd be satisfied if it got knocked down to \$6.

Dude, your are being so stupid, you are basing your "beliefs" in some random user on hackforums that did something against the tos and got banned for and getting mad at the site admin for for banning him!

If you were the site owner and you got paid .01 for every view and paid .007 for every view, but then don't get the .01 in the first place he is losing money because this KID is doing something against the TOS and losing the owner of this GREAT site money.

You're being really stupid about this whole argument, multiple TRUSTED people say he is good and one person with a +2 rep said he is bad because he got banned for doing something against the sites TOS and you take his side on the argument!?!?!?

Also, before you say anything else try signing up and actually seeing what this site is about before you start a argument on someone eases opinion.

This why you have gotten all of those -reps...

Oh and for everyone else, I trust this member so far, and If I could +rep him I would, here is my payout proof for today!:

Hi admin!

I have two questions to ask.

First of all, are you able to make the preview image smaller or replace it with a "Proceed to View Image" button? Because most of the people just look at the preview image and leave without clicking the button.

Also does this site work for mobile devices? I tried going into the url but it just directed me onto another site so I suppose mobile users don't count?

I am not the owner to the site but most PTP sites like this work by running ads that are paid per click or paid to get the traffic.

This is why you need real traffic and not fake.

So pretty much every time you send someone to that link the owner gets paid a certain sum, or they get paid if the ad gets clicked, usually the popups.

Like I said though this is for most PTP sites, this one might be different, imgearn correct me if I am wrong please.

Spent about 20 minutes spreading a picture round just using online chat rooms, Though Im not sure how you can earn much using this unless you have lots of facebook fans ect.

I have a suggestion bro. Please remove the thumbnail image on the first page where the button "Press to view the image" is located.. because it's not truly a thumbnail but a image that has been re-sized. It makes the loading time there to be slow. :) Just a suggestion though

Miirkat - November 21, 2013, 4:20 am

I'll check this out when I get home. Thanks. ?

CrypticX - March 11, 2014, 10:19 am

CoLeEe - March 11, 2014, 11:29 am

The Only thing what i hate in these sites , when i send it to many friends , and i know they clicked it ,
but i still dont get any view .

I only got 1000/10 click whats i get. I hope this site will be better then anything else.

Good luck with it i'll try it and i hope its will be online in a few days.

Zach7z - March 11, 2014, 12:31 pm

Are views direct embedded views from [img] tags on websites, or views on the website that you

have the image on?
