Thread: [Starting Up RAtIng Again \[Best RAT on The Market\] ?](#)

PirateLAD - November 12, 2013, 4:39 am

Hello Everyone,

I want to start getting back into RAtIng I have previously used Imminent Monitor and as a Personal Preference I didnt like it, I struggled to Get installs even when my Ports were open and I only had a total of 1 Slave EVER over the course of about 3 Months My Spreading Methods were perfect but I just didnt find the RAT to be good enough (No hate towards the RAT or people behind it)

So now im looking for a new RAT and I was wondering If LegacyLink is still a Great RAT?
Thank you for any advice.

Dark Comet Rat 5.3.1 [Best Free Rat On The Market] Clean Download:

<https://hackforums.net/showthread.php?tid=2632776>

Dont get Blackshades if you're looking for a payed rat they steal your slaves via backdoor rarely but they will steal your slaves proof: <https://hackforums.net/showthread.php?tid=2829543>

get cybergate if you are looking for a paid one otherwise get dark comet 5.3.1

....

?

I use both legacy link and imminent. Each have certain features better then the other. However I would say legacy would be the overall better of the two. (for my needs anyway). However it really depends on what your ratting for.

The real best RAT of all time is Dark Comet. Why? It's free. It's stable. It works very well. All you need is a good crypter and you're set.

Shabloski - November 13, 2013, 8:39 am

Blackshades is the best RAT. I have tried most of the paid RATs around and Blackshades is the best if you ask me.

PirateLAD - November 13, 2013, 9:36 am

Dont Worry Guy I Have already Purchased LegacyLink!

Doxicity - November 13, 2013, 9:41 am

Obviously your spreading methods weren't perfect if you only got 1 slave over 3 months. It's not that RAT's fault, Imminent Monitor, but maybe the way that you set-up the RAT. I honestly believe that Imminent Monitor is the best RAT on the market, at least it will be after it's recoding. Legacy Link is also a great RAT, and they both work nearly the same, and have all the same features, Imminent is just cheaper. Between those two, it is a personal opinion.

For those talking about Blackshades, it isn't backdoored. There are rumors that it was in the past, but those were just rumors. I have used blackshades for over a year now, and I never had any problems with it. It's a great program, run by an honest man.

I Was not attacking Imminent Monitor or Saying that I Hated it but I do agree I clearly was doing something wrong and I was very unsuccessful when it came to slaves, I dont suppose you have any good spreading methods that you are willing to share? I dislike the Java Drive By Methods as I dont have my Website skills etc But yes I have Both RATs now so Hopefully once IM becomes FUD I will have more success.

This is false. It was proven that is was backdoored in the past.
