Thread: [Any Chance to hack this Site?](#)

Anne Marie - November 12, 2013, 10:06 am

Is it hackable?

<http://isophonglas.com>

rahoool - November 12, 2013, 10:22 am

may be yes .. hacking is all about probability and this time i am sure that it is 60% chances exist to be hacked

hoer- - November 12, 2013, 10:23 am

Yeah sure, why not... Cliché everything is hackable

Thank you. Do you have an idea to get Admin Access?

AlKapone - November 12, 2013, 10:48 am

Hoer is wrong all he is posting is a " Non-Persistent XSS Attack "

Which means the only way your going to get this to work is if you physically send the link to the admin with the javascript: code in the url paramters

bilder.html?ordner=<script>

The only real way for the XSS attack to work is if it is a Persistent XSS attack which gets injected into the pages code and doesnt get removed

I havnt scanend this site nor do i want to i just felt like letting you know

Hoer's advice wont get you anywhere
