albanskaglhf - November 13, 2013, 8:35 am

Fastest RDP Bruter/Scanner/Cracker 50\$

==

About the RDP Bruter:

==

Coded in C++ it's actually Linux Based,
so please win32noobs leave this thread, thank you.

==

RDP Bruter - Main Features

==

Supports : Linux Machines , CentOS & Debian for every othe
distro , you will need some extra packages.

Brutes: whole IP ranges ex: 192.0.0.0 - 192.255.255.255

Brutes: <host/s> / <threads>

host/s to scan:

192.168.0.0/24 to scan 192.168.0.*

192.168.0.0/16 to scan 192.168.*.*

stop bruteforce after a valid user

RDP Scanner: Built-in RDP scanner

so you dont have to Brute a whole IP range and wasting your time.

after RDP scanner finished scanning the fresh List will be saved.

And you can immediately start Bruting.

Here an Image, it doesn't have a GUI.

for those whith no LINUX Knowledge.

AP0STL3 - November 13, 2013, 9:00 am

Another RDP scanner of a kind ...GLWS Bro

Th3 J0k3r - November 13, 2013, 10:17 am

maybe some pics of the vruter please since some people got a bad net

albanskaglhf - November 13, 2013, 10:45 am

sure but it's Linux based , it dsnt have a GUI.. so ill try to make some good pics :) and put them in. :) in a few minuts.

Hitmaster - November 13, 2013, 11:16 am

Vouch for him. Good luck with sales mate.

Half-Life3 - November 13, 2013, 11:28 am

one of my best projects... glws albanska
- a nice tool to f***up rdps :)

albanskaglhf - November 13, 2013, 2:29 pm

none interested ?? maybe it's cuz 95% of all members here are not familiarly with Linux Systems ??

AP0STL3 - November 13, 2013, 3:50 pm

i think so dude...like me i'm more familiar with windows than linux...if you can teach me how to hack with it then i will consider buying this stuff right away

albanskaglhf - November 13, 2013, 4:09 pm

yes bro there is no big know-how , since u dont need to code or program anything, all you need is a Linux Machine, or a Dedicated server, or a simple root etc...

and put the Bruter on it and start Bruting :),, there is a tuto, where u can see how it works :).

AP0STL3 - November 13, 2013, 5:12 pm

Let talk on skype then ..

msg ttt

AP0STL3 - November 20, 2013, 2:58 am

Did anyone bought this tool yet ...?

msg

milkshake2014 - February 16, 2014, 6:37 pm

I am very interested in your bruter. Can I test it before I buy it?
