Thread: [How would i destroy an IP?](#)

jake9497 - November 14, 2013, 3:35 pm

Hey guys, first of all i am new to this so i am very sorry if i annoy anyone with my stupidity ;)

basically i want to know how i can destroy someones IP address so their router dies?

i dont want them to be able to use internet at all

is there anyway that i can do this? or anyone do for me?

86.157.126.191 is the IP if anyone would be able to do this for me

or if you could tell me how :)

thanks alot guys

webdev77 - November 14, 2013, 3:36 pm

You cannot do that. It is not possible to destroy an IP address.

Sort - November 14, 2013, 3:36 pm

Can you give me some information why you would want to do this to his IP?

i want to do this to his ip because he is a racist nasty person, my little sister was on my xbox and he repeatedly was very rude to her calling her all names under the sun!

disgraceful person he is

Don't really think you can really destroy a ip just by ddosing it repeatedly. Also, people say nasty/racist stuff online rofl.

Destroy an IP so that his router dies? Wtf? Do you even know how the internet works?

jake9497 - November 14, 2013, 4:00 pm

typo, basically he was fing and c word at my sister adn she is 12, she shouldnt know these words until she is 15....

not jojing my party for 3 year no

SHADOW REALM - November 14, 2013, 4:03 pm

There is an easy way to destroy an IP. Get him to turn off his router for 5 mins and then turn it back on and BAM. IP = Destroyed

(Until someone else gets it)

And OP what the hell is wrong with you Website and Forum Hacking Can you see the bit where it says Xbox Live Fags who I want to ddos, cause I can't

ha lol kid, keyboard gangster aye?

why dont you come to my ouse and say that? puissy

MajorFail - November 14, 2013, 4:08 pm

Print out the IP, take a scissor and cut into pieces?

SIM-1980240 - November 14, 2013, 4:10 pm

You can't destroy someones IP address. You can however nullroute a VPS, or DDoS someones Ip address so they temporarily can't access the internet.

a helpful person who isnt a internet troll thankoyu,

and how would i do a ddos attack by any chance

Snooper - November 14, 2013, 4:11 pm

Can't really destroy an IP. Although you can DDoS it, that's about it.

You can take off an ISP but not an IP so the router fries. Sorry

Fillothesilo - November 14, 2013, 4:59 pm

Hit it with enough power you can no-rougt it. but you need alot.

jake9497 - November 14, 2013, 5:02 pm

guys i dont know if im being clear here or you all think i know hwta im doing lol, is there a program i can download whehere you just type the IP in like LOIC but better and i can use my 160mb connection to dos his

It's easy to destroy an ip many softwares and simply use cmd but it takes longer

EXPLICIT CONTENT - November 14, 2013, 9:55 pm

Obeying the age rating of Halo 3 would have been prevented your sister from hearing this, huh ?

Now SE the ISP of that Guy to get his address with your l33t SE Skills and than get to his house and try to burn that router with a lil' molotow.

Fillothesilo - November 16, 2013, 12:06 pm

My person idea is to rape the modem with my penis, maybe if i push hard enough i could squeeze the IP out and stamp on it.

zack the hack - November 16, 2013, 3:33 pm

hi, im zack the hack, it is not possible to destroy a ip address, because it is assigned by a dns or isp (internet service provider) (domain network server) it is not possible, it is a set of numbers assigned to a user on the network. the ip (internet protocol) can be spoofed, (change it temporarily) and be attacked on the network. email me for more help zacharyabdellaoui@hotmail.com?

Just DDoS The Ip.

go to the marketplace and look for a booter you can afford.
if you can't afford a booter use these free boater's
