Awesome, don't know if I will use them yet, but not bad. Oh yah, OP, I saw your other post in the gfx section, on your new signature; with the "Amaze" text in the graffiti fashion. Do you have a tutorial you followed on how to make that, the logo itself looks sick af, and I am interested in making my own. Thanks for the post.

Oh Sweet, I gotta figure it out. I am just getting into Tagging, but it looks kind of weird in contrast to your logo/tag's style. Thanks for the quick response though <3

Just got done installing these! I recommend them 100%. Very nice color corrections. For sure going to use these in my future work.

AMAZING.

I LOVE THIS.

IT LOOKS AMAZING OMG!

Hello,

Thanks for giving this away.

I have heard of CC's many times, but what are they for / how do you use them?

Thankyou again!

Thanks for sharing this makes artwork so much easier... i suck at photoshop and all art programs

Yami Sukehiro - *February 13, 2014, 6:46 pm*

Thanks for this and great work btw
