hiii i m newbie ..i m just want to know that photon plus or any dongel have ports???which we use in hacking phising ...thanks in advanced

Aura - November 16, 2013, 5:54 am

I don't really understand your question to be honest. I googled "Photon Plus" and it appears to be an ISP. As for "dongel", I can't find anything. Do you mean dongle ?

And also, phishing isn't allowed on HackForums. You should read the rules and the [Help Docs](#) before posting again.

We recommend you take the time to read the [HF Help Documents](#) section. The answer to your questions should be contained in there.

i m sorry bro i dont know about it bro i want to know that photon plus dongel can we used for ports forwarding..its a usb modernm plzz tell me

Aura - November 16, 2013, 6:02 am

OH, if you can PORT-FORWARD with one of Photon Plus modem, well what's the modem model ?

graceboy - November 16, 2013, 6:06 am

photon plus ec156..thanks for replying bro

So you mean that it's a USB stick to gives you access to the Internet ? If so, I don't think you can port-forward these. Did you try accessing the dongle configuration menu and look if there's an option to port-forward ?
