Outstanding, there's some guy that is hell-bent on sending a ton of DMCA's to me... He wont proceed with court or any legal action, it's more of a warning and even then he can't act on it because his Copyright license does not permit royalty-free rights but most hosts get scared and don't read the fine-print.

Hi,

I need to contract a pack to use just one software. A traffic exchange as the Hitleap one.

I should go for the lowest package, not?

Which one could you recommend me?

What kind of support do you offer? As i have 0 knowledge of how to install software and configure the server.

Thanks
