Here you will find : C4D's , Stocks , Brushes anf fonts , all hand picked by me .

[IMG]<http://i739.photobucket.com/albums/xx37/HeavenGFX/c4d.png>[/IMG]

Description: C4D stands for Cinema 4D, and is a program made by Maxon used for creating 3D images. When somebody using Gimp talks about it however, they're usually referring to any abstract 3D render. They're very useful when it comes to giving depth to signs and other such things. I don't like it when 3D renders are called C4Ds, though, because there are literally hundreds of programs you can use to make these things: Blender, Wings, 3DS Max, Maya, Carrara, and TrueSpace, just to name a few. C4D is just one of many. Now, when C4D is used for a more realistic, quality graphic it's used by experienced users. The C4D is widely used because of the extraordinary effect of them. It is mainly used for creating background images for a signature, or adding cool effects and depth; when used incorrectly though, C4D's could turn into rubbish.

Description : Stock photos (stock photography) are professional photographs of common places, landmarks, nature, events or people that are bought and sold on a royalty-free basis and can be used and reused for commercial design purposes. The photographer (or stock photography distributor) has ownership to the images, and the commercial designer has some limited usage of the photo (which is set out in the Terms of Service by the company you purchase the stock photos from). Some conditions of use may include things such as use of the images is licensed, not sold or in case of a stock photo being used in a magazine there may be a maximum number of copies of the image allowed to be printed under the agreement. Terms of Service policies will differ between stock photography distributors.

Description: Pretty self explanatory; the font is the text you see in most images. It is used to describe the image, or put a personal value onto it. Good text placement is key for all signatures. Good text is also the key to all signatures. You'll always want to have a great text to add the nice effect and bring about good change to any image. Used in web design frequently. (I assume you won't need text image(s) :P)

Description: Renders are the main characteristic in any graphic. Also, renders are one of the major sub-topics of 3D computer graphics, and in practice always connected to the others. In the graphics pipeline, it is the last major step, giving the final appearance to the models and animation. With the increasing sophistication of computer graphics since the 1970s onward, it has become a more distinct subject. [I]They usually are the main image in any graphic.

Description: Photoshop brushes are fantastic tools for enhancing any artwork you care to imagine. They can be simple strokes, which you can use to add effect or definition to an existing picture, or entire images waiting to be dropped into your canvas! The brush tool is one of the most versatile tools in the Photoshop collection. If you haven't yet learned how to best use it, then these brushes could change your artwork profusely.

You're welcome, I'm just saying that because many don't download because they can't see what they download.

And there's pretty much to download over there :)

Enterprise - December 12, 2011, 4:54 pm

A request can you share shapes that would be helpful in a thread and so on?

Heaven - December 12, 2011, 4:58 pm

Shapes hmm, i dont have many but i'll have a look around for some cool ones, if i find some i will post it :) thanks for the suggestion.

Enterprise - December 12, 2011, 5:17 pm

Awesome I need some so please as soon as possible.

Heaven - December 12, 2011, 6:17 pm

I've PM'ed you a link that has plenty of Photoshop shapes, i'm too busy to add them to the thread now but i'll do them later :)

Well, you never know. Problem is staff has to see it. Its hard to match the compilation that was stuck in this section though.

Xboss - December 13, 2011, 2:30 pm

Very nice pack!

I have downloaded a few things.

Also could you add more descriptions to some of the packs so we know what we are downloading?

Anyways it has helped me alot,

Thanks

Heaven - December 13, 2011, 2:33 pm

Welcome, yeah i shall do that once im not busy =p

DFTCHE - December 13, 2011, 7:32 pm

Could you upload a preview for these, I probably have most of it.

Alf Stewart - December 15, 2011, 7:37 am

Just downloaded all the fonts / brushes and I'm about to get the gradients! love you man!

Braco22 - December 15, 2011, 10:25 am
