Thread: [Scammed By S. Koda \\$175 \[38LTC\] uid=1330504](#)

JustHayden - November 18, 2013, 4:30 am

So 3 days ago I decided I'd make a decent investment into LTC of \$175, which was for 38 LTC. I contacted this member to do an exchange, which was y as hell, but I followed through on my part. I was supposed to get my LTC on the 17th, which I wasn't too happy with, but it is now day 3 and I still don't have my LTC. I contacted this user again and was told there's a problem and everythings locked down.

Weather or not this is a BS story, this report will be up and open until I receive the 38 Litecoins I payed for. Which I'm supposed to have made profit on because of the LTC increase overnight.

Looking at his rep he also scammed 2 other people. He also has a thread open in which he claims he will make you \$6,000 a month if you send him \$250.

Anyways good luck on getting your LTC!

EDIT: Another scam thread opened about him.

I checked on that other rep and it was on a scam report that was resolved. This other thread is brand new, days after I dealt with him.

Did you check his rep before hand? Shouldn't of dealt with this user in the first place. Sorry this happened tho. GL

Sound like you got scammed by a bullshit deal.

Litecoin just went up to \$8, so there's \$200 I would have made, but instead I'm -\$175. The guy -3'd me and the other guy who made a report too like wtf?

That's the power of ub3r's.

We can't even say anything to them.

Ya he's saying it's sent but I got nothing, so the report stays open. I hope he gets banned for this, I'm not the only one he scammed.

The problem is that HF don't ban for that :(, but at least he can get repfucked that will prevent another scams.

For all we know, they might start scamming next. Whenever there is more over \$50 on the table in this forum people will just snatch it and run.

Chills - November 22, 2013, 5:48 am

Pretty sure a good portion of people would not run with \$50 or \$1k WHen my account got taken I had to pay back \$3k to a guy cause of a scammer making money really isn't that hard.
