Thread: [Sharing Links With Other Apps That Don't Show up In The Share List](#)

The.Bronze.Shroud - November 18, 2013, 6:28 am

Hey Everyone.

I like to share news and Videos with friends on Facebook all the time but the one thing that really winds me up is that with certain Facebook apps (Example) Go Chat or Trillian, i hit the share option but those apps don't show up in my list. I use Atrium for Facebook and with that i can share but only to my Facebook Timeline not with certain people. That is why i install apps like Go Chat or Facebook Messenger. I don't mind having Go Chat installed because i disabled it and i only use it to share content with friends and most of the time i don't use Atrium because i use the Facebook Mobile Site. Some of my friends use Whatsapp and that works great but not all friends use it and not all are willing to install it just so i can share one or two bits of news with them. Now i don't mind having Facebook Messenger installed but i disable it so it does not pop up with "Message from so and so" I only want it so i can share content but it uses almost 20MB of memory and my Phone only has like 128MB of internal storage, so i use the SD card but i don't want something that big slowing my phone down and i'm not even using it. Certain Apps like Trillian or some others work great but lack share functionality and with Apps like BBC News or Pulse News or Youtube, when i hit share they won't appear. My question is. Is there an app that can enable me to share content with those apps that don't show up in the Share list? Copy and Paste is not an issue but when i'm on the Speeding clock in work or what ever copy and paste (For me) takes ages and not always works. What do you guys think?

I wont be able to reply to this for a while so please bare with me. Thank you in advance guys :)

Quick Edit: i have googled in to this but all i get is Share Apps with frineds or something.
