SMTP Sender

What is it?

Send E-Mails from Any Mail-Address to Any Mail-Address!

SMTP Sender operates as a Simple Mail Client and uses "Open Relay"-Servers for sending Mails (also HTML-Mails transmittable).

The Destination-Mail-Address must be a Mail-Address of the selected SMTP Server!!

It is programmed in C# (Windows Only!!) and uses the TCPClient-Class to Connect to the SMTP-Server at Port 25!!

SMTP, Port, Sender, Destination are changable!!

Attention: If Sender-Mail-Domain doesn't exist the mail will be treated as SPAM!!

Source Code:

NO SOURCE AVAILABLE

Help:

If you don't get it don't use it!!

? HAVE FUN ?

EDIT: Source Code Section Edited!

SubGenius - November 18, 2013, 11:35 am

You mean you can use any email you want ... That's amazing man. good job!

Edit. I have the best post numbers right now. 69

ident - November 18, 2013, 11:59 am

Pm for source is not allowed. Especially when kiddy smtp shit.

Magician. - November 19, 2013, 2:06 am

Dude I think you are breaking the rules Post to PM.

?Eatos - November 19, 2013, 5:23 am

Change the text on the "Cancel" button...

xCodeR - November 20, 2013, 12:06 am

nice bro :D keep it up :)

-xCodeR ?

marvinn - November 20, 2013, 3:58 am

Soo, is this a raw SMTP protocol implementation or just some easy classes and nothing special?

extractor666 - November 20, 2013, 7:33 am

(Nov 20, 2013 04:58 AM)marvinn Wrote: [\[CITE\]](#) Soo, is this a raw SMTP protocol implementation or just some easy classes and nothing special?It's a raw SMTP protocol implementation. I saw some youtube videos about how to send mails with telnet over smtp. So I programmed an application for automate the telnet process with TCPClient and Streams and so on...

Andreas.Walter - November 20, 2013, 7:34 am

that's amazing . good job. can be used to spoof email address

nuk - November 20, 2013, 8:15 am

VERY HQ post.... This looks pretty damn sweet if I'm reading everything correctly..

Instinkt - November 20, 2013, 5:59 pm

Pretty nice. Great work and thanks for sharing.

#Kat - November 23, 2013, 12:53 pm

if your know exactly what your doing [target] falls tu [distributed][denial] n0 kiddy

Cape - November 24, 2013, 4:45 am

Nice work will look into it soon

Keep up the good work!

razzy4realbiz - January 13, 2014, 11:51 am

Unlimited SMTP is what i need any good seller PM me asap and i pay via Perfect Money

JohnBarco - February 14, 2014, 2:49 am

I need an unlimited inbox webmail or smtp pm me plz urgently

felicixus - February 14, 2014, 1:32 pm

Very great share!

Thank you so much!

GreyPhantom - February 14, 2014, 7:14 pm

Thanks. I wish I could have the source code. If can, PM me the source. If no, it's okay.

momoattacker - February 14, 2014, 8:19 pm

? no source code available?? ?

dondulz - April 17, 2014, 12:51 pm

extractor666 can you please send me the direct link to download the smtp mail sender. Thanks

venom_only - April 20, 2014, 11:37 am

i have done same staff most simple way. in PHP. :)
i can send email with any email i want to who ever i want.

[img]http://s27.postimg.org/vce98gtj7/Capture1234.png[/img]
