Thread: [Official njRAT v0.6.4 FREE DOWNLOAD](#)

xVulnerable - November 19, 2013, 2:55 pm

This is njRATv0.6.4 download thread. njRAT is the most stable free RAT and super fast. Best part is that it is 100% FREE, new users should start using this instead of Darkcomet and any other RAT. njRAT is coded in VB.NET and has the .Net Framework 2.0 dependency.

njRAT DOWNLOAD LINK: [CLICK HERE](#)

njRAT Updated v0.7d <https://hackforums.net/showthread.php?tid=3924408>

Remote Administration - November 19, 2013, 2:59 pm

Good one!

I was thinking about making a thread for this RAT, I've been using it for about 3 months now, It holds 100's of slaves easy.

SaveTheWorld - November 19, 2013, 3:09 pm

Thanks for sharing bro.Keep the good work up..

shiro07 - November 19, 2013, 3:17 pm

Getting tired of looking for a crypt for a njrat server, the best i could get to was getting detected by Avast, kaspersky and nod, which is bad cuz almost everyone are using those -_-

Remote Administration - November 19, 2013, 3:19 pm

(Nov 19, 2013 04:17 PM)shiro07 Wrote: [\[CITE\]](#) Getting tired of looking for a crypt for a njrat server, the best i could get to was getting detected by Avast, kaspersky and nod, which is bad cuz almost everyone are using those -_-

Ill UD it! I do free crypting services 1/35 & 0/35

Buzzle - November 19, 2013, 3:21 pm

I might try it out, I actually havent tried this one yet.

Thanks.

Remote Administration - November 19, 2013, 3:23 pm

(Nov 19, 2013 04:21 PM)Buzzle Wrote: [\[CITE\]](#) I might try it out, I actually havent tried this one yet. Thanks.

Its a very good RAT!

I have almost every RAT there is and ever has been! 60+

The only one I don't have is LL!

But this RAT is very good!

BITDurg1 - November 19, 2013, 4:16 pm

Looks good...will try it if I ever get past my port forwarding issues.

Breakbot - November 19, 2013, 4:18 pm

best rat evaa :) i know the coder on an arabic forum .. this shit looks promising can't wait to get my Vmware back and use it again .

ElectroShock - November 19, 2013, 8:07 pm

Downloaded to try it out. Thanks OP.

Blub - November 19, 2013, 8:10 pm

Posting to check in later, looks like a simpler RAT to use :) thanks for sharing!

750mlJuicy - November 19, 2013, 9:20 pm

Will try this out, thanks for the dl OP. :)

00vama00 - November 19, 2013, 9:25 pm

I personally like NjRAT better.

It has less options compared to DC, because of that it's very stable. Its screen/webcam streaming are awesome.

P???ce - November 19, 2013, 9:56 pm

Wao would love to try this out ;) Thanks for this :)

fatecry - November 19, 2013, 10:05 pm

best reviews come from u!

Thank you very much :)

Lolerbeans12 - November 19, 2013, 10:37 pm

I'm replying because I was about to say that it doesn't work. Figured out in the builder if the check box "Copy" is on, the server file doesn't work.

So I fixed my issue and sent a un-crypted test server to a DC slave of mine.

...And holy shit..

By far, the coolest, fastest rat I have ever seen.

I will be using this from now on!

Thanks .Anon for sharing this.

Dubstep - November 19, 2013, 11:43 pm

(Nov 19, 2013 11:37 PM)Lolerbeans12 Wrote: [\[CITE\]](#) I'm replying because I was about to say that it doesn't work. Figured out in the builder if the check box "Copy" is on, the server file doesn't work.

Thanks .Anon for sharing this.

What issue, how did you fix it, my created outputs arent working either.

Lolerbeans12 - November 19, 2013, 11:48 pm

(Nov 20, 2013 12:43 AM)Dubstep Wrote: [\[CITE\]](#) What issue, how did you fix it, my created outputs arent working either.

It seems like the free crypters I have corrupt the njrat server.

While it's unencrypted it still 'works' but it's kinda hit and miss.

The issue I had was in the "builder" part, I clicked on the "Copy" checkbox.

Which idk why, but it made it unusable.

?Genocide(X) - November 20, 2013, 12:01 am

Guys is this a false positive about the pack itself?My AV just went from normal to hate mode when I downloaded the Njrat.

[\[Image\]](#)

Lolerbeans12 - November 20, 2013, 12:23 am

It's probably a false positive.

Btw, Dubstep, I managed to get URGE Crypter to crypt my njRat server. It's like 6/## detection but hell I'll take it!

Martinped - November 20, 2013, 1:20 am

Does it have any reverse proxy function?

Thanks for the link + review btw, very nice! :)

Lolerbeans12 - November 20, 2013, 1:58 am

It doesn't have reverse proxy as far as I am aware.

xVulnerable - November 20, 2013, 2:07 am

(Nov 20, 2013 01:01 AM)Morda Wrote: [\[CITE\]](#) Guys is this a false positive about the pack itself?My AV just went from normal to hate mode when I downloaded the Njrat.

[\[Image\]](#)

It's a RAT mate, ofc its going to be false positive :)

Despize - November 20, 2013, 5:49 am

This so Legit Thanks bro keep up the Good work :)

Mudge. - November 20, 2013, 6:19 am

I heard this is up there with darkcomet, so thanks for the share.

LAZAR ANGELOV - November 20, 2013, 6:33 am

An awesome piece of software!!

i hope you will continue like this!!

An thanks for the sharing!!

French Toast - November 20, 2013, 6:42 am

Very impressed with the quality of Remote Desktop. Best I've seen from a free RAT. :)

Treeple - November 20, 2013, 7:48 am

Thx :) Gonna use this! I guess with the tiny manipulator it will be a good one!

h2ck3rhf - November 20, 2013, 7:55 am

Thanks for sharing this. will give this a try

Tello - November 20, 2013, 8:12 am

It does not has UPNP option so i can open my port directly.

Any other methods?

Could u help me?

CyBER_JeDi - November 20, 2013, 8:16 am

Awesome sounds perfect! If only it had reverse proxy.

DataScrambler got this 2/35 Avast and F-PROT

So that's totally usable.

Kosher - November 20, 2013, 10:37 am

Lmfao this is even better then any paid rat ive got!

#Martijn - November 20, 2013, 12:58 pm

Seems like the new darkcomet to me! Thnx, definitely gong to try this!

vFusion - November 20, 2013, 1:34 pm

Great thread thanks for the review.

K3Feedz - November 20, 2013, 2:28 pm

This is a decent rat for people who can't afford it!!

ashawo69 - November 20, 2013, 2:46 pm

@poster, How can i check make use of the offline keylogger?

CyberAlien - November 20, 2013, 2:55 pm

Thanks for sharing going to report after having a look at it ?

French Toast - November 20, 2013, 4:37 pm

(Nov 20, 2013 09:12 AM)Tello Wrote: [\[CITE\]](#) It does not has UPNP option so i can open my port directly.

Any other methods?

Could u help me?

Use darkcomet's UPNP addition to port forward the ports needed for nJrat.

ThePoopSlayer - November 20, 2013, 5:03 pm

I have connections but it isn't showing them

SIM-2026552 - November 20, 2013, 5:08 pm

This looks amazing from what I can see, I will be giving this a quick look soon.

Leon_V._Metcalf - November 20, 2013, 5:15 pm

Thanks for the download link OP! Hopefully this will soon replace the aging Darkcomet.

ThePoopSlayer - November 20, 2013, 5:15 pm

I tried to download it on virtual desktop and it asks what they would like to open it with.

legend259 - November 20, 2013, 5:20 pm

Um it's not letting me accessing the page may you guys add me on skype-Chalkie38 an send me that rat

1337 - November 20, 2013, 5:23 pm

thanks man nice rat really appreciate it.

Cr?ator - November 20, 2013, 6:06 pm

Thanks for this! Downloading this as we speak!

ElectroShock - November 20, 2013, 6:18 pm

Well, setup was easy. Now I just need to figure out how to get a slave...

scorpionwally8 - November 20, 2013, 9:16 pm

Anyone know if razor crypter works with this?

dabmaster6000 - November 21, 2013, 7:39 am

i was interested in this rat a few weeks back and talked to a couple people and one stated that the slave had to have open the same ports so it could connect ...is this true and if so how would you go about spreading

xVulnerable - November 21, 2013, 7:51 am

(Nov 21, 2013 08:39 AM)flazzid Wrote: [\[CITE\]](#) i was interested in this rat a few weeks back and talked to a couple people and one stated that the slave had to have open the same ports so it could connect ...is this true and if so how would you go about spreading

No it doesn't work that way. It's like any other RAT.

Harold_Finch - November 21, 2013, 11:34 am

I think I should try this rat thanks for the link.

Lolerbeans12 - November 21, 2013, 11:38 am

(Nov 20, 2013 06:15 PM)ThePoopSlayer Wrote: [\[CITE\]](#) I tried to download it on virtual desktop and it asks what they would like to open it with.

ThePoopSlayer, it asks that because in the njRat builder, you checked the "Copy" checkbox.

Uncheck it and make the builder like you normally would.

xh1ghtim3x - November 21, 2013, 11:43 am

i think i found my new favorite RAT ^_^ .. thanks a bunch OP <3

(Nov 21, 2013 12:38 PM)Lolerbeans12 Wrote: [\[CITE\]](#) ThePoopSlayer, it asks that because in the njRat builder, you checked the "Copy" checkbox.

Uncheck it and make the builder like you normally would.

thanks for linking this man ! ?

afilol - November 22, 2013, 5:16 pm

Anyone had sucess crypting the stub ?

mr.mouse77 - November 22, 2013, 5:59 pm

(Nov 19, 2013 03:55 PM).Anon Wrote: [\[CITE\]](#) First of all i have no idea why there aren't any official download links for this RAT, so i decided il put one myself with a nice review. njRAT in my opinion is the most stable RAT i have ever seen. It is super fast. Best part is that is it 100% FREE, new users should start using this instead of Darkcomet and any other RAT. njRAT is coded in VB.NET.

DOWNLOAD LINK: [DOWNLOAD](#)

Please leave a post to keep the thread alive.

njRAT doesn't have many features, but that's ok because all the features that it has actually work 100% and very fast.

This is what you get when you right click on a bot:

As you can see, not many options. A very important feature such as password recovery works flawlessly and gets every saved password on the user's browser.

Remote Desktop:

One of the best remote desktops i have ever seen, almost good as Imminent Monitor. 100% stable
[img]http://dot-anon.com/hfgifs/njrat.gif[/img]

Keylogger:

Perfect Offline keylogger, lacks a live logger but i can live with that.

Webcam Capture:

Nice Webcam Capture, very stable and quality.
[img]http://dot-anon.com/hfgifs/ncam.gif[/img]

File Manager:

Nice stable file manager feature which lets you download files from the bot's computer. Instant Download.

Process Manager:

Feel free to ask any questions about this njRAT.

Check out my Review on 6 Different RATs! [CLICK HERE](#)

How do you use it? and how do you install it to victims computers?

greenwalt - November 22, 2013, 6:44 pm

Thanks for the download. Testing it now.

Homothe - November 23, 2013, 12:14 am

You are the best!

Thank you so much!

But do you recommend cybergate or NjRAT?

Cr?ator - November 23, 2013, 2:30 am

Hands Down, Way better than darkcomet! Thanks for the link Dude!

dead2591 - November 23, 2013, 2:44 am

I have got njRAT & Crypter..thanks dude...

Sbud - November 23, 2013, 4:25 am

Thanks man I need this, will download now

Sbud - November 23, 2013, 4:27 am

I will download this for sure, i'm in need of a good rat

tahareal - November 23, 2013, 4:59 am

its not working , it says this application isn't for win 32 O.o ? , can someone explain please ?

free : NjRAT is the best
paid : blackshades

"these are the words of a person who tried all RATs"

sweetmisery45 - November 23, 2013, 10:46 am

I tried it out, thanks man. My main rat is down, this is a nice backup

xXCha0str1k3rXx - November 23, 2013, 10:52 am

Downloaded So I can try it out thank you!

preethirock - November 24, 2013, 1:49 am

thanks for the download link .. was searching for that ..

xVulnerable - November 24, 2013, 8:00 am

Thank you everyone for your feedback.

GreenStepper - November 25, 2013, 11:48 am

NjRAT is Detectet
and i cant find some Crypters, where work with NjRAT

did anyone know some crypters ?

LootHF - November 26, 2013, 5:34 am

Hey,

Can you also drop files on your slaves pc's?

~digital~ - November 26, 2013, 5:59 am

for me this is one of the best free rats out there
better than most paid rat at least in term of stability and filetransfer...

and you have an official download link at the authors page : <http://njq8.blogspot.ch/>

Tech?nique - November 26, 2013, 6:01 am

is it easy to set up i could never get my rats set up even with help :(idk whats going on

Doxicity - November 26, 2013, 8:37 am

Why should people start using this instead of Darkcomet? Darkcomet has been the most preferred for a while now, as it has anything you would need from a RAT. You also say that this has better quality than Darkcomet. I think you should compare the two RATs in this thread, to show the differences between the two.

anonymousgd - November 26, 2013, 9:09 am

this rat is amazing man just pure good ive been using it , my main rat is down

xVulnerable - November 26, 2013, 9:26 am

(Nov 26, 2013 09:37 AM)Doxicity Wrote: [\[CITE\]](#) Why should people start using this instead of Darkcomet? That error usualy happens only in sandboxie. Dont worry its not backdoored.

Try deleting all files in sandboxie and try again

njRAT and JRAT are two different RATs.

Dutch_Dynamite - December 1, 2013, 11:10 am

is this beter then darkcomet?

messagetoshort

Perfect, can't wait for you to make a fool of yourself.

ruNe0 - December 8, 2013, 8:27 am

my bad it wasnt your file, but the file of another , that is actually backdoored, yours is clear.

Do you have the official website?

Sonicboom99 - December 8, 2013, 9:28 am

Is it really as easy as just portforwarding and building it? It seems a little too good to be true..
EDIT: And no, I'm not saying it's a virus.

StonedK - December 8, 2013, 9:50 am

Thanks for the link! - Trusted!

The keylogger doesn't seem to be working well for me though :((not crypted server).

(Dec 8, 2013 10:28 AM)Sonicboom99 Wrote: [\[CITE\]](#) Is it really as easy as just portforwarding and building it? It seems a little too good to be true..

EDIT: And no, I'm not saying it's a virus.

That's pretty much all you need for a RAT.

Of course not mentioning getting a VPN for security seasons, crypting and spreading for slaves.

And you shouldn't worry mate, the OP is a very trusted member here in HF. If you're still doubting, open the file sandbox and see if it drops any suspicious files. Which it doesn't, by the way :)

Best of luck ratting.

Dragon339 - December 8, 2013, 9:59 am

any good free crypter for this rat? i try to crypt but than server crush

carpman - December 8, 2013, 10:15 am

new to this do i put my own ip address in the server build

wubulaien - December 8, 2013, 10:55 am

does the slave need .net framework 2 or higher?

my test slave says unable to initialise the service.

xVulnerable - December 8, 2013, 10:57 am

(Dec 8, 2013 11:55 AM)wubulaien Wrote: [\[CITE\]](#) does the slave need .net framework 2 or higher?
my test slave says unable to initialise the service.

Yes njRAT is coded in VB.NET, it requires .net framework 2.0.

wubulaien - December 8, 2013, 11:44 am

any chance to install NET2 on XP SP1? Or do i have to install SP2?

ProNerd - December 8, 2013, 12:22 pm

(Dec 8, 2013 11:57 AM)xVulnerable Wrote: [\[CITE\]](#) Yes njRAT is coded in VB.NET, it requires .net framework 2.0.

A good crypter that work with njrat's server and have .net 2.0 support?

xVulnerable - December 8, 2013, 12:38 pm

(Dec 8, 2013 01:22 PM)ProNerd Wrote: [\[CITE\]](#) A good crypter that work with njrat's server and have .net 2.0 support?

I don't guarantee you that every crypter will work, make sure it crypts .net applications.

ProNerd - December 8, 2013, 12:52 pm

(Dec 8, 2013 01:38 PM)xVulnerable Wrote: [\[CITE\]](#) I don't guarantee you that every crypter will work, make sure it crypts .net applications.

I tried FileGuardian with .net 2.0 support but it doesn't work D:

Can you write me a good way to try the server without starting in my PC?

A crypter that worked for you?

xVulnerable - December 8, 2013, 1:15 pm

Use sandboxie, and Data protector for a crypter.

Dragon339 - December 9, 2013, 10:51 am

op, can you recommend me any crypter for this rat? free will be best, it doesnt have to be fud

xVulnerable - December 9, 2013, 1:15 pm

(Dec 9, 2013 11:51 AM)Dragon339 Wrote: [\[CITE\]](#) op, can you recommend me any crypter for this rat? free will be best, it doesnt have to be fud

Data Protector works fine with njRAT.

steve3aus - December 9, 2013, 1:16 pm

RAT works great. But is anyone having a problem using run file ? As trying to upload and execute but it's not working ?

f4022335 - December 11, 2013, 1:39 am

Thanks for sharing bro.Keep the good work up..

jayjayswag - December 11, 2013, 5:12 am

Downloading and will be testing soon. Are there connection limits?

mescalito7 - December 11, 2013, 5:56 am

my antiviurs say this is a virus. can i get infected if i download and open njRAT ? i just tried to open it and avast automatically removed it.

overdead - December 11, 2013, 6:24 am

Guys, I saw a ton of noobs here so I thought I'd join the army. What the bloody hell does autobuy mean... I see it alot on here as I'm looking for a good paid crypter >20\$, and I am not sure what it means. Could someone be kind enough to help the nob out here?

Thanks

StThomasAquinas - December 11, 2013, 6:29 am

This looks great. i am a longtime user of DC and, as much as I love it, I think we are all aware of its limitations.

Plus which, it's just nice to shake things up once in a while.

Thanks for posting.

xVulnerable - December 11, 2013, 6:30 am

(Dec 11, 2013 06:56 AM)mescalito7 Wrote: [\[CITE\]](#) my antivirs say this is a virus. can i get infected if i download and open njRAT ? i just tried to open it and avast automatically removed it. Ofcourse it is detected as a virus. It's false positive ofcourse.

(Dec 11, 2013 07:24 AM)overdead Wrote: [\[CITE\]](#) Guys, I saw a ton of noobs here so I thought I'd join the army. What the bloody hell does autobuy mean... Thanks

It means you get access to the crypter automatically after purchase. The owner does not have to manually give it to you.

nemopo5 - December 11, 2013, 7:05 pm

Why does it go on hard drive and my computer detected a virus

ramprabhu - January 16, 2014, 1:41 am

Still i face prob with my keylogs....what would be the fault???

boldbirchtree - January 23, 2014, 6:44 pm

This is probably just a general RAT question but I am using njRAT so I will ask it here.

I have access to the computer I want to put it on, but how will that computer then know how to reach my computer running njRAT? If I just drop the server.exe on the other machine I wouldn't think that it would know how to find my computer across the internet . . . am I missing something?

Also, is it required that I know my target's IP? My target will likely be behind a router and getting that external IP will be tricky.

steve3aus - January 23, 2014, 7:03 pm

(Jan 23, 2014 07:44 PM)boldbirchtree Wrote: [\[CITE\]](#) This is probably just a general RAT question but I am using njRAT so I will ask it here.

Also, is it required that I know my target's IP? My target will likely be behind a router and getting that external IP will be tricky.

You need to start at the beginning and read the tutorial, when building your stub, you have to put in your own details , Like No-IP , select a port, make sure your port is open, then your exe file you put on your target , will find you, also make sure you crypt your stub, Njrat is good , but if you dont Crypt it it will be deleted from your targets computer , Is simplified explanation but hope it helps,

boldbirchtree - January 23, 2014, 7:52 pm

Yeah that definitely helps, thanks. I figured out the No-IP thing, but the concept seems kind of weird to me. Like if the someone found out the address of your No-IP they could get No-IP to reveal your

true IP.

steve3aus - January 23, 2014, 10:40 pm

(Jan 23, 2014 08:52 PM)boldbirchtree Wrote: [\[CITE\]](#) Yeah that definitely helps, thanks. I figured out the No-IP thing, but the concept seems kind of weird to me. Like if the someone found out the address of your No-IP they could get No-IP to reveal your true IP.

They can ! so use a VPN for your own security.

MadeByGM - January 25, 2014, 3:07 am

i use njRAT, thats the only RAT that i know how it works.

But what do i need to put in by HOST ?

i tried to leave it 127.0.0.1.

But that works nly on myself !

I tried it to put in my noip example.no-ip.biz that won't work i think
and i tried to put my real ip in there.

(Jun 4, 2014 02:03 AM)wowgg Wrote: [\[CITE\]](#) Does this work for Mac and can you infect another mac with this rat?

No this will only work on Windows with .net framework 2.0.

~Jesse James~ - June 7, 2014, 1:13 pm

How stable is this ?? How many clients can you have connected?? :0

getmoneydade - June 23, 2014, 9:53 pm

decent rat but keylogger isn't amazing it shows bad messages for me ... but other than that it's ok ... why doesn't this connect to a slave when u exit out the njrat? it only works when run the server while ur on or arent .. but if u close it and turn it back on without them resetting it doesn't work .. why is this>??

xVulnerable - August 5, 2014, 5:00 pm

Fixed the broken link + added a 10 second ad.

loveislove - August 13, 2014, 3:01 pm

still not work link correct it again bro thnkasssss

degado - August 13, 2014, 3:26 pm

there is v7 version probably fixed logger

Spartan. - September 1, 2014, 12:17 am

Looks like a good rat, posting to bookmark :)

Magyar3 - November 16, 2014, 3:15 am

For some reason I when I create the stub I can't see myself on Njrat?

cashf - February 12, 2015, 10:23 pm

Is njRAT better than DC ?? When you check google about njRAT there is quite a lot discussion about this on security sites...

Mangahome - February 26, 2015, 2:14 am

Looks great i need to try it out! 35 Chars...

DaRealMVP - February 26, 2015, 2:53 am

how fast is the remote destop controlling speed?

Lerio - February 26, 2015, 4:17 am

njRAT has one of the fastest Remote Desktops on the market

msw3006 - March 22, 2015, 2:35 pm

Just a quick question I see users poping up that i didnt even give them a download????

Herndon12 - March 22, 2015, 3:28 pm

Thanks for posting the nj i was looking for it.

Alexstrasza - May 15, 2015, 3:58 pm

Wayy better than darkcomet.

Incendiary. - May 16, 2015, 5:45 am

Just letting you know the download is fucked,
Its still possible but chrome has a fit, Blocks it like 5 times.

OfirGever123 - May 16, 2015, 6:11 am

May I ask, does it work, and is there like a tutorial how to use it on others?

oxon - May 23, 2015, 6:29 am

this is amazing RAT... thanks

nepHaXOr - May 23, 2015, 6:33 am

Downloading it. Thanks man :) ?

Liemand - May 23, 2015, 9:42 am

(May 23, 2015 08:29 AM)HarelzQ Wrote: [\[CITE\]](#) Guys please stop saying thats its backdoored. its not!

ain't ya little late? lol

crashoverdyde9 - May 25, 2015, 12:38 pm

hi everyone,

I am currently on njRAT 6.4 but I have a big problem!

for start I no router (I'm wifi)

- 1- I have created my no-ip address
- 2- I have set my parameters in my firewall (tcp - udp)
- 3- disable my antivirus
- 4- well create my trojan.exe with picture

My problem: when I trojan sends to my victims on skype

nothing no connection does it in the table?

how it thus?

RiZinRGH - May 26, 2015, 9:07 am

thx for the download its amazing

Johnwilliam21 - June 29, 2015, 8:17 pm

Thank you man, I totally forgot to say thanks for the download.

Business - June 29, 2015, 9:12 pm

Since the link is down, if anyone needs a copy I can point you in the right direction.

fI0werp0wer_ - June 29, 2015, 10:59 pm

Thanks for the share! this will help so many newbies in the RAT section. Keep it up xvulnerable.

Cheers

fI0werp0wer ?

asmy - August 23, 2015, 7:24 am

Since the link is down, if anyone needs a copy I can point you in the right direction.

oh thanks i need him

AdmiralHere - July 15, 2017, 10:50 am

Thank you for the unsaturated copy, they are hard to find now days. Any chance you could reupload it?

xVulnerable - July 15, 2017, 2:19 pm

Lost the copy unfortunately. Check out the latest version.

Troep - July 15, 2017, 3:15 pm

How do I know this version is clean????
