Thread: [New Generation Of Spreading // Pastebin spreading // Tutorial](#)

Mr. Money™ - November 21, 2013, 2:15 am

Hello in want you to introduce you to the new generation of spreading its called pastebin spreading. I know this is a known Old method but that does not mean it does not work my job is trying to get old spreadings methods back top top in 2013!! Lets get started.

Step1: Go to Pastebin.com
Step2: Make a new paste
step3: Shorten your url (Virus)
Step4: Make a description.

Code Runescape:

Free Runescape Accounts updated everyday all not working accounts got removed the same day. This will never expire and their will allways be a account for you in order to get these accounts.

Click here in order to get these accounts!!

Your link
Your link
Your link
Your link

Regards (Name you want)
Step5: Make A title so people will click on it
Example (Free Runescape Accounts Updates as November 2013!!)
Step6: Now you are done!!

Ive Tried this and i was able to get like 10+ slaves in a hour
The best way to do is tho make as much new pastes as you can.

Why should this work?

Becouse people are searching for accounts to open their own shop and stuff.

Any Thanks would be appreciated!!

Pastebin is using Ban hammer for new spamming accounts. don't worry.. you won't be sued by

them in the worst case scenario. ?

P.S. - Try other methods. this one is saturated.

You contradict yourself lol. You say its a new generation of spreading yet are aware it is an old method. Still a good method though if your looking for a few test slaves.
