It works awesome, i made around 500 accounts within 30 minutes :)
Really fast, and easy to use. I request every body to try this software out, this is the best available
in Hackforums!

Though it doesn't include Bio and Avatar, It shouldn't matter as the bot does have the proxy feature.
Tried sending my own created followers to a friend. And it worked smoothly. Best of luck with sales
mate.

I highly recommend you guys to buy it. This is totally worth it for me. GLWS.

Much Love
