Thread: [How can I use a Slave as a Proxy?](#)

zer0two - November 24, 2013, 2:58 pm

Hello Fellow HF Members,

I really need some good protection and have been using Darkcomet. There is an option to use a slave as a proxy but it doesnt work.

I read a post about how to do it but it didnt help.

So HF, how can I use a DarkComet slave as my Proxy.

Is that just to view their screen and use it. What i want is like using tor with them as a proxy. Like, no screens pop up on their computer. Is that what the link is? I want access to using the proxy from my computer and not on a remote desktop.
