iDope -.- - April 27, 2010, 4:47 am

What type of files can it bind?
Only EXEs or all types of files?

-mothered- - April 27, 2010, 5:07 am

Well given the fact that It does bind many types of file extensions, I'll definitely be giving It a test after this post.
Much appreciate It mate.
Cheers :)

StRaXxD - April 27, 2010, 6:44 am

No problem dude ;) Thanks

Bitwin - April 27, 2010, 6:46 am

Nice, good job. Though a multi file binder is cooler ?

pingo23 - April 27, 2010, 6:58 am

good job and also tnx

You're most welcome mate. Well I put it to the test and I can say that it works flawlessly, with a broad range of file types.

I'm pretty Impressed :)

StRaXxD - April 27, 2010, 7:35 am

@mothered Thank you ;)

@Deli_kral you have .NET FRAMEWork ? Cuz app is made in VB.NET and you need .Net FrameWork...

nemo2142 - April 27, 2010, 8:22 am

simple binder

Nice, good job. Though a multi file binder

TheInvader - April 27, 2010, 9:25 am

Thanks dude...I'll add to my collection.

Sub-Z3r0 - April 27, 2010, 9:59 am

Thanks bro, I'll try it !

Akureyri - April 27, 2010, 10:48 am

BUMP.....xDDDDDD

70inc - April 27, 2010, 2:23 pm

Gonna test now, finally a binder that binds every type :D

edit: TYVM, works perfectly!

No prob's mate. I've put this tool in my top 10 list of Importance.
I just love the binding of any file extension :)

StRaXxD - April 28, 2010, 10:43 am

Thank you...Really appreciate it :)

RobbMiller - April 28, 2010, 10:48 pm

This is very nice! ? I recommend password protecting this binder with encryption as noob protection. You don't want any leechers to scan this on virustotal. ?

Encrypting your password: www.crypto.com

StRaXxD - April 29, 2010, 8:14 am

Yeah...I dont want leechers i hate them...But i always got error when i try to encrypt/decrypt something....

Hengest - May 6, 2010, 1:33 pm

Stupid n00b question: which file goes in which box? Does it matter?

zackthewack - May 6, 2010, 1:44 pm

^^^

Prime example of what RobbMiller was just talking about... Haha.

I see that a lot of people are saying good things about this so I'm going to try it out myself. Thanks :)

EDIT: Hmm, maybe I'm not doing something right or I'm reading something wrong, but I can't seem to download this. This link just takes me to a blank white screen. I sit there and wait for it to finish loading to see if the download box will come up, but it never does.

I also tried just going to the main site itself and that site won't even load up for me. Maybe the site is just having problems. I'll come back and try downloading this again later :)

Hey StRaXxD,

Is there anyway you could send me this in a PM or something? I can't download this from the link. I don't really know why. Hell, you can even put it on \$sharecash if you want and still leave this one for

everyone else. I don't have too much of a problem with sharecash so I'll fill out a survey for you. I need a FUD binder and this one looks pretty simple to use.

Thank you very much, works great. :)

Jtou - August 4, 2010, 6:24 pm

Well I am confused. The binder is not detected. I even scanned it, but then after I binded Putty and VBA, I got a magical warning

[img]<http://img217.imageshack.us/img217/399/ss20100804202237.png>[/img]

Is that how binders work? O.o; Or is it because it is no longer FUD =p?

zabby123 - August 4, 2010, 7:33 pm

Thanks man, works well :D

roboweb - August 11, 2010, 7:21 pm

man is don't work? i try and and nothing work

Sad_Angel - September 10, 2010, 9:22 am

nice work....

can i have download link please....

noid - September 17, 2010, 12:25 am

why would you make a binder lol, people just use iExpress to bind.

bittu - September 17, 2010, 11:29 am

iexpress is great to use but the problem is that the files inside the iexpress can be viewed with the help of win rar...and thus can be extracted ...that is why we need to use binder program...kindly update me about me about iexpress if i am wrong...

Mano - September 28, 2010, 6:36 pm

Sorry this might sound a little nooby. But you have a program that some1 is after u file bind a keylogger with it for e.g. When they open the program, they will be keylogged right?

r4g3dSkillz - September 28, 2010, 11:19 pm

Yes, the user will be keylogged after running your binded "package". The fake or real program will run and so will the keylogger.

The keylogger should also be separately made FUD on its own with a crypter before including in the binded file.

The Dane - September 29, 2010, 9:14 am

Nice work you got there mate. Big thumbs up, works greate

Its clean :D

I think the problem would have to be with AVG for example.

That to me occurred when a file was detected as a Trojan or virus.

Disable the program and see if there's a difference..

I cant seem to down load it do you have another link for it.

v0te! - February 9, 2011, 11:25 pm

Wow perfect binder it works with Jpg as well thank you mate :)

`Mafia - February 9, 2011, 11:40 pm

It's not supposed to make your server become FUD, it means if you use a FUD server and bind it with this, it will stay FUD.

With some other binders your server will be FUD but the binded file will be like 5/16. That is what is meant by FUD on a binder.

G-Star Raw - February 10, 2011, 3:39 am

Thanks mate, Trying it out later :).

inf3cti0us [bro433] - February 10, 2011, 3:49 am

Thanks looks good all i need now is a Crypter :D Good work Small in size, but Fast and FUD :D VERY helpful

iSynergy - February 12, 2011, 12:21 am

Still FUD mate? if so ill try

Hopsin - February 12, 2011, 12:30 am

I wonder if it's still fud,anyway i'll download it and use it later. Many thanks mate,appreciated!

crawl7 - February 12, 2011, 11:20 am

its 7/14 now, avg, avira etc...

End.User - February 12, 2011, 12:43 pm

I'm gonna try this out! A program like this is much needed. Thanks for this.

Much love.

sam0016 - February 12, 2011, 12:50 pm

thanks going to have a look downloading it now

tyraelrocks - February 15, 2011, 12:14 am

It's not FuD anymore. eset nod can detect it.

Zenpest - February 15, 2011, 9:06 am

Thanks for the share mate. Even though it's not FUD anymore. A crypter should do the work :)

tayea - February 15, 2011, 12:03 pm

thanks man , ,,,

im gona try it ,,

:))

Morbid Saint - February 18, 2011, 2:29 pm

thanks a lot dude that works perfectly for my istealer server!

Geordie_Mafia - February 20, 2011, 1:34 pm

nice share mate, but i binded my rxbot and sent it to a friend and was detected as an infected file..

Does this mean its no longer FUD or have i done something wrong? This is the first time i have ever tried something like this so please excuse my noobyness

Regards
Geordie

pokka - February 23, 2011, 1:15 am

will try it dudeeee..thank for this

Good, But it doesn't made up to my level....

The files binded with this were detected by many known antivirus including Bitdefender, Avast etc...

But, its a relief that the antivirus such as McAfee, Kaspersky were didn't detected it as any malware...

Anyways thanx....

Itz downloads hits 3815...

Keep It Up....

Anyone know a binder which is FULLY..FULLY....UNDETECTABLE with any of the security softs out there...

I don't think itz really possible to find one like that....

Even my friends are using those softs such as Bitdefender & Avast & also Kaspersky..

They detects these binded files easily...

So, itz sad that I can't hook them up....!!

What it does is pretty much combine 2 files into a .exe and when you open the exe it opens the 2 files you binded. Hope that makes sense and helped you ?

VIRUS SS

dont download this shit !

DashPHP - November 13, 2011, 11:45 am

Is that a binder or a FUD ? or both ? confused.

Luv Goo-Roo - November 13, 2011, 12:09 pm

Works Perfect! thanks for the share, Keep up the good work!

Triangle - November 21, 2011, 7:28 pm

Good Programming But Not %100 FUD Binder {FullyUndetectable} +1 rep though mate.

Pepsi - November 21, 2011, 7:54 pm

Nice mate, good contribution to Hf community!

legit199 - January 23, 2012, 8:15 pm

Nice Binder :) Good job !!! Thanks :):)

michalrudas007 - January 26, 2012, 6:03 am

my fav binder... ..its very goood .Good job !!! Thanks :):)

weedov - January 31, 2012, 7:25 am

link doesnt work. can you provide another link please.

thx in advance

Hackermania - February 23, 2012, 12:50 pm

Mind giving me a tutorial on your binder. i'm new here in HF and new to file binding

By the way, the link doesn't work. It says that the file doesn't exist so it would be appreciative if you could post a different link.

Thank You

chivaff - April 7, 2012, 11:12 pm

looks good i will try it ..thanks for share :):):)

tyraelrocks - April 20, 2012, 1:53 am

why oh why do I have to be soo dumb, got my files deleted 400 slaves released. :((

Punkbastard - April 21, 2012, 2:54 am

Please update download link.

I really need this tool!!

Looks awesome ;D

Thanks for sharing

m_stylish_m - March 5, 2013, 2:05 am

download link not works can you upload file any where else.

many people facing downloading. there isn't any response is this threat close???? if not than can i get download link

ackobul - March 6, 2013, 5:17 am

Hello friends.

If I permit the administrator can set up a link to StRaXxD-Binder v1.0

Installation is a free download from the subject, but not more FUD. ?

Attach the permit only if administrators.. ?

Phillip2004 - March 6, 2013, 3:03 pm

This looks like it could be of use.

Homothe - April 12, 2013, 6:36 am

Nice, file is removed, pm me the link please?

Bestshadow - April 12, 2013, 6:46 am

Really fun, good job.

It's works perfectly

Thanks

FireSquid - April 12, 2013, 7:25 am

This is a 3 year old thread. I doubt you are going to find a working link anymore..

Dzemanooosh - April 12, 2013, 11:48 am

Can you please upload it to mediafire?

byfrost1 - July 21, 2013, 1:07 am

people are really dumb! come on guys, this is 2013 mid, and this crypter is of 2010 = 3 years old, this is not FUD anymore, get into some other thread and get fresh crypters
