Contact me for a 1 month review copy, 5 left!

Hey guys,

VPN.ES is back! After a few months of user inactivity, I've decided to actually release the NL server.

Here's the old thread design until I get something new done up.

- Here comes the vouches:

Dreadful's Review ([Click to View](#))

Vouches ([Click to View](#))

Everything has been set up; just waiting on a client area update to be pushed through in about 20 minutes. EliteShift.com.au is under development, but the client area still works perfectly.

Anyway, about those vouch copies.. I'll be giving out no less than 5x! To upgraded members, who'll be required to write a review.

A panel has been planned out, and you're welcome to use the data from fakenamgenerator.com to fill

out our autobuy, just make sure you use the right email or you won't get your purchase!

We accept PayPal, BTC & LTC at market rates.

For everyone else, here are some entry level coupon codes.. get the first month for \$0.50, or 12 months for \$15, first 10 customers only![/color]

EliteShift is a registered business in Australia, so we'll be processing all orders through EliteShift.com.au

to keep track of sales. Don't worry, your personal info won't be linked to your activities; just make sure

you comply with our TOS to keep VPN.ES online for everyone else:

- No Botnets -
- No DDoS -
- No offshore activities on our US server -

[Buy Now!](#)

Note to original customers: Your plans are still active if they have not yet run out; if you'd like to trial the new servers, please PM me!

Unlike a lot of the VPNs on here, logging has actually been disabled rather than just ignored; and standard AES-256 is enabled on all three of these servers, so your data is safe.

dotcomdog - November 27, 2013, 6:45 am

Could I please get a vouch copy? Thanks!

BTW, I might be able to make you a new Thread design if you PM.

I???I??? - November 27, 2013, 7:42 pm

Just sent you a PM. Ill take that 1 month vouch copy ;)

Magicmann - November 27, 2013, 8:20 pm

Any chance I could try out your VPN? I'd definitely write you a detailed review!

Edit: You've got some immature competition. Someone one-starred this thread.

Lightning_ - November 27, 2013, 11:01 pm

I've responded to all PMs :)

And yeah, I saw that! haha. It happened last time as well :P

Om?nous - November 28, 2013, 3:55 pm

I love your custom client. makes me jelly. Is it coded in java to support multiple OS?

Lightning_ - November 28, 2013, 6:11 pm

When things pick up a bit more, I'll assign someone to the task. I've also got someone working on WHMCS integration that's not FreeRADIUS based; we'll see how that goes. No ETA as yet :P

luck!Thanks, and yourself too! :)

eliteshift.com.au is still under heavy development on a separate server, will be online soon.
