FREE APPS FOR iOS 6/7

Hi there!

Are you on iOS 7 or 6.1.3+ and are not able to download free apps because you don't have your iDevice jailbroken?

I will show you how you can install free apps on your iPhone without using your computer!

This work with iOS 6/7

All you need is:

Your phone

a computer (you only need to use this once)

phone cable

and internet ofcourse

Step 1

Get your iDevice and open up Safari

After you've done that type inside the adressbar: <http://tui.tongbu.com>

After that press here Spoiler [\(Click to View\)](#)

Then install it to your iDevice

Step 2

Now don't open the app instead go to your computer and install this:

<http://www.tongbu.com/zhushou/>

If you're done with the download and install, connect your device to the computer and open up Tongbu Assistant

Step 3

Now that you have Tongbu open you can see your device picture and information about it in the home screen of Tongbu. If you don't the replug your device.

Now click on the Tool where it says "Genuine App" wich looks like this:

Spoiler [\(Click to View\)](#)

After it's authorized then you're done with with the computer.

Step 4

Now head over to you iDevice and open up the Tongbu App.

Now you're done. The app is on chinese or japanese I don't know but the apps are in english. If it comes up random boxes then press the last where the text is in bold to cancel the apps that they recommend you. Now find the search tab and search for an app. Then click on the down pile and it starts to download and you can find your download if you click on the statistic tab and u will see a file with a pile. Click there and swipe to see what apps you've downloaded.

That's all!

Have fun! ? ?
