Thread: [HELP ME \(cmd & power shell\)](#)

volvofire - November 28, 2013, 4:59 am

Hey,

For school we have an assignment to explain the difference between CMD (command prompt) & power shell.

I know there are people here who can tell me a little detailed version of what's the big difference :)

i thank you all!

Hey volvofire

How about reading

<http://www.howtogeek.com/163127/how-powershell-differs-from-the-windows-command-prompt/> ?

(And there are tons of other results on Google) I dont want to be rude, but I think all the necessary informations should be already available somewhere =) The link above explains some differences within the first few passages. If there are any questions left after reading this text, feel free to ask them!

Regards

NeoXiD
