Here's some reviews from the older version

Spoiler ([Click to View](#)) (Apr 25, 2010 01:23 AM)M0D3RN H4X3R 2™ Wrote: [\[CITE\]](#) My review

The first thing I found great about DoSBoX is the amazing and simple GUI. The GUI of Boxnet is very appealing and a great pleasure to use. I had no problems finding my way around and the visuals were great.

[img]http://img214.imageshack.us/img214/4854/41787582.png[/img]

Moving on, lets look at the power. Now, he said it only has 1 shell and I can only attack up to 60 seconds because I have a review copy, ok, alright that's fine with me. I wasn't expecting much with just one shell when the paid copy had much more - but....

[img]http://img219.imageshack.us/img219/3996/capturevf.png[/img]

Warez-bb. It took down warez-bb. I was amazed at the power of this program. With only one shell it can take down warez-bb, imagine having more than one shell...

Overall: Great buy, highly recommended! Very powerful and just overall great!

(Apr 25, 2010 01:27 AM)Coyney Wrote: [\[CITE\]](#) Yeah Sorry For the Late Reply I was trying to figure out how to get an ip of a website.

So Here it is:

The GUI is great and I like the transparent background, he said it can take down ware-bb.org so I thought I might try and take that down, after a few minutes of searching on how to get the ip on a website (yes Im a noob) I finale found out and it took the site down with ease. Excellent Program and for \$15 you get Unlimited Updates So It's wonderful!

nofear1999 - April 28, 2010, 9:46 am

One shell went down yesterday I just got one back up again. Speed SLIGHTLY decreased but it's just ~ 2k packets per second crappier.

Still works though, like a charm.

Avery - April 28, 2010, 12:03 pm

Bump, sales still should be coming in !

Product works amazing !

I have booted in H3 myself with it, 15 Second attack took a player out of the game after 10 seconds, and offline after the rest.

Contact Nofear.

nofear1999 - April 28, 2010, 9:17 pm

My strongest shell died. I used a different provider. Meh I think he was hosting them and terminating them, however I can't prove anything so I just won't use him anymore.

Jimmz - April 28, 2010, 9:59 pm

Well tell me when it is up. i'm interested still. you have my msn :)

Worked fine on H3

nofear1999 - April 28, 2010, 10:03 pm

Yeah, it will take longer to boot because I lost a shell. I should have a new one coming in soon. Don't worry!

nofear1999 - April 29, 2010, 11:38 am

I added 2 new shells one replacing one and the other just to add more power.

lllllllllll - April 29, 2010, 11:53 am

nofear1999 - April 29, 2010, 8:50 pm

Cool, just hit me up on MSN (in OP) and we can get to dealing.

nofear1999 - April 30, 2010, 2:09 pm

All that've bought this program hit me up on MSN. I had to change update hosts. The other one was uploading/downloading slow as hell. This server should be faster.

Hit me up if you're gold or higher. You'll need to provide Payment proof or you'll NOT get updated copy.

Just a note to everyone;

I was business partners with avery before, he told me he never wanted money, then comes up saying he wanted money. The money was in his paypal, and told me it can't get locked, but if it does he can get it unlocked, and lost me \$80, \$30 which was his, and \$50 which was mine,

He still has to give me my money back, so dont trust him! he always gives up when lots of support falls on him!

Who is Xanax - May 3, 2010, 12:20 pm

I wouldnt buy from either of them. Avery used to be iluls business partner. I assume avery did the selling because he is trusted but that failed. All the programs he sold were shit and he continues to sell them. Be careful buying from iLul and Avery. I had many problems with the program i bought and lost \$10 because of it. it might work at first but very shortly it will probably mess up

Just my 0.2cents

Quote, truth for iLul's and my business which completely blew up in our faces.

You have no proof that this will happen with NoFear's, As well as I have no part in this product so basically your calling me untrustworthy and a scammer.

Before making your 2 cents, not your .2 of a cent take proof of this, Names + Visual proof.

IceGuru™ (60) - Last updated 04-28-2010, 09:10 PM

Negative (-3): I don't like your usertitle ...or sig...or name

Mute's : For making fun of him via AIM for being a dick head, oh and he asked me for rep a while back, and he tried to switch the story saying I asked him for rep.

Kink : Hated me for a while and makes fun of me because I can't code, as well as I will explain the infection part later.

M4S : I hate his gut's and I try to expose him for the fraud and idiot he is.

IceGury : Never spoken to him, guess he doesn't like my name o.O.

iCore released it (Royal Crypter).

Any idea when there will be an update with more shells? Its needs more power, it doesnt even kick people offline just lags them for a little bit.
