Chaos;Child is the fourth science-adventure game from MAGES and 5bp.

Those familiar with Chaos;Head, Steins;Gate and Robotics;Notes might want to take a look at it. :)

It is in the same universe as Chaos;Head but taking place 6 years later which is in 2015 in the Tokyo's Shibuya district.

Here's the trailer (only in japanese):

I thought the game was decent, but found it hard to finish the anime.
