Thread: [Looks like a girl, Acts like a girl, but can she Sound like a girl?](#)

scriptsquid - November 30, 2013, 8:30 pm

Greetings HF,

Addressing all users, I have been social engineering and- for lack of a better term- 'e-whoring' for a couple years with encouraging results.

One obstacle I cannot overcome is actually sounding like a girl, over say a skype chat.

What software/vocoder/vocal synthesizer would you recommend to allow me to modify the pitch/frequency of my voice so I could speak as the woman, in real time.

Keep the information spreading open like the legs.
Good day.

twitter4u - November 30, 2013, 8:35 pm

i would like to know about this too

Space Bomb - November 30, 2013, 8:50 pm

thats hard shit , i'm not sure there really is a way or ewhores like ourselves would be using this

PretjeNL - December 1, 2013, 12:32 am

I think u could give ClownFish a try.

I must say that i have tried that, but my voice is too deep to still sound like a girl.

There are many options that u can choose in Clownfish, and its mainly for skype.

Here is the link : <http://clownfish-translator.com/download.html>

Have you tried morphVOX PRO? It it a vocoder with plugins and sounds. That might could help you. I use that and it works for me. You might have to tinker with it for a while though.

SuarezN7 - December 1, 2013, 12:59 am

+1 for MorphVox Pro

But changing male voice is hard as fuck

scriptsquid - December 1, 2013, 8:32 pm

Morphvox Pro was unimpressive except it did allow me to sound like a toddler-- entertaining enough but not monetizing. There are synthesizers out their as well that some e-whores swear by. A breathy/ feminine voice that can adapt in real time is the best bet for attracting 'generous' johns.

I also recommend having a script (like a movie script/ not like the stuff most of you kiddies use) so that in the heat of the moment testosterone/ adrenaline take over, and your seductive vocal persona disappears.

gates, bill gates

FrankLucas - December 1, 2013, 8:37 pm

Lol its going to fit with the video well

Pillsbury Doughboy - December 1, 2013, 8:59 pm

I would have to say Morphvox. I have called PP using it a ton of times. They always fall for it.

scriptsquid - December 2, 2013, 1:34 am

I'm surprised nobody has mentioned Garageband, Logic X Pro, or any OS X shenanigans. I would think that real-time voice synths would be easier to find.

Tomorrow - December 2, 2013, 4:48 am

You could let a girl speak for you? Or you could use already recorded sentences and play them. Also, you could just say your mic is broken.

smokey2k8 - February 6, 2014, 12:49 pm

vcd works but you have to buy this, I've been using this for a few years and been told I sound so sexy. you have to choose the girl 2 option then change the eq to low. GL

Darkwin - February 6, 2014, 12:52 pm

Its pretty difficult to sound like a chick i know Morphvox works for some but really i haven't heard of anything thats 100% effective.
