I can test it out if you would like.

Also, I suggest you that you shouldn't sell formgarbber plugin here, or this thread might be removed. You should be only accepting BTC and PM, nothing else.

Yes, all the plugins.

And I've given out 2 vouch copies reviews will be given within one week hopefully.

Sold one copy this user tells me he'll write a review also.

ISO - December 2, 2013, 10:12 am

Seems like a good product but overpriced with all plugins imo

You should offer a discount on plugins.

GLWS anyway.

Tastylicious - December 2, 2013, 10:14 am

Looks great so far, I love the idea that the user can customize his features!

Will probably buy in a week :3

Not really. compared to other bots the pricing is really good. But that also matters on if this is actually legitimate and good.

D??M! - December 2, 2013, 10:16 am

I would like proof of this bot working.

Can I see screenshots?

Snippets of code maybe?

Video(s) of any of the features?

Perhaps a demo panel to look at?

Any proof this bot actually exists?

Prove something and I'll buy it.

1337haxxor - December 2, 2013, 10:30 am

looks very interesting can you possibly implement btc mining do you also accept wu ?

I've sent you a PM.

Any more buyers? I'm online right now!

ezeeprofit - December 2, 2013, 12:11 pm

Would love to see some videos of this in action or maybe a tv session ?

Ezee

7H3 3XP3R7 - December 2, 2013, 12:12 pm

didn't got the Reply from PM yet , waiting for you

This person had some solid questions.

Migos - December 2, 2013, 2:23 pm

I am going to pm you, I have a few inquiries.

Darkwin - December 2, 2013, 4:13 pm

Wait what, My post was removed for saying that you asked me to go first on BTC? and also asked me for a MM.

@Staff What gives?

?S0ulSn1p3rR - December 2, 2013, 5:07 pm

Seems very interesting nice possible alternative to betabot now that its no longer being sold on here due to reasons i don't believe were correct. Can't wait to see where this project goes might buy in the next couple of weeks.

Bull™ - December 2, 2013, 7:45 pm

What the fuck , why my post was removed ? asking proof and vouch copy(seller offer 2 copy) is not against the Rules.

Edit : Seller has closed his previous thread after mine post .

Hopefully these questions can be answered, seems like an interesting botnet.

SkyRider - December 3, 2013, 2:52 am

this seems a bit sketchy

<https://hackforums.net/showthread.php?tid=3898044&pid=36697066#pid36697066> why would he close a good thread to open another one be careful here

-=B O T N E T =- - December 3, 2013, 6:17 am

please. at least do a video demo on formgrabbing.. chrome and firefox.

Vithov - December 3, 2013, 6:49 am

Thinking of buying this (for educational/learning purposes) to be honest if you accept PayPal.

My Paypal is FULLY verified (real name) with my business attached onto it (business account).

Just want to see this bot isn't a hoax/scam before paying.

Not only that but expected me to give him \$200 BTC and go first.

That is a marketplace discussion thread, not a sales thread.

I doubt OP will answer any questions or even sell a copy though.

ISO - December 3, 2013, 10:06 am

Just to make everything clear.
OP only has some rep and not a single screenshot or proof or bot has been shown from him.
Some member here suspect him to be a multi-accounter and he want to deal with XMMP so outside
of HackForums.
Take care about this product.

Exactly what I was thinking about. Same opinions, eh ?

Vehicular - December 3, 2013, 10:41 am

No proof.
Wont use Middle-Man.
Won't go first.

Anyone else smell like a scam/fishy?

Explain how you are formgrabbing opera ? hardcoded offsets ? Proof ? Tiny Code Snippet ?
Why the heck you are calling this "Dual Architecure rootkit" ? Why Dual ? Just just hooking
NT-functions ... (Seriously ! Just say rootkit , there is no "Dual Architecure rootkit", believe me ;))
Botkiller ? Proof ?

There is dual architecture, Are you dumb m8

x86 and x64

$86-64 = 22$
 $6+4+8+6 = 24$
 $22+24 = 46$
 $46-6 = 40$
 $40 - 8 = 32$

32 BITS, So if you have a x86 application and take away the x64 part you still end up with a 32 bit
application. Have you illuminatied yet?

Hacker16 - December 4, 2013, 3:05 am

Hey if still available I would love to try. But looks great good luck with sales

the.xAx - December 5, 2013, 5:42 am

Did you quit selling this? Can you provide proof of this bot being what you say it is..?
