How To Set Up A VCW Without Adobe Flash Player

I have seen many videos on YouTube and threads on HackForums along with other forum sites asking, "Why won't my flash player work?". There are many reasons for flash player not working, but how about we just ignore all of those reasons and set it up a different way? The VCW commands are not as easily accessed, but they are perfectly suitable.

### Step 1: Download Manycam

Manycam is a program that has greatly expanded eWhoring over the years. It really gave people the chance to offer HQ cam shows and earn a lot of money off of it. If you have not done so, download Manycam [here](#).

### Step 2: Downloading A Good VCW

For this, you have to have a different type of VCW. Honestly, you do not need a VCW at all. All you need are different short video clips that represent different commands. If you do not have this type of VCW, feel free to PM me and I will give you one that has been used a lot.

### Step 3: Setting Up Your VCW

Once you are in ManyCam, you are going to set up your VCW unlike you used to. Go to the sub-tab labeled "Sources" and click on the bar that says "Video Gallery". From here, you are going to go near the bottom to where it says "Add" and click "Add Movies". Highlight all of the clips, and click "Add".

Congrats! Now you're set and ready to eWhore! Make sure to set up the ManyCam in Skype. If you do not know how to do that, look all over the internet, there are many tutorials.

Have Fun eWhoring! :)

Thanks for this tut! I would like to have your saturated VCW as a beginning.

**jsterl** - December 2, 2013, 3:15 pm

Thanks for this will defiantly help me

**spartan15** - December 2, 2013, 5:28 pm

Thanks!!! I was going crazy....but for which version of manycam? For all?
