Sales-Thread of Diverse: <https://hackforums.net/showthread.php?tid=3844073>

Hey guys, today I will show you how the "new" Diverse Crypter is the same as the "old" Asylum Crypter. As a few of you may know, Asylum Crypter's seller/owner recently got banned. So what I believe happened is he gave the source to someone else to sell... That new crypter is now called Diverse Crypter. I had to deobfuscate Asylum Crypter, so there are some differences, but ultimately, the same code. I could not post all the images directly because of this forum. Here are the clues:

1. Their Terms of Services are almost identical:

Diverse Crypter:

<https://puu.sh/5BXPl.png>

<https://puu.sh/5BXSv.png>

Asylum Crypter:

<https://puu.sh/5BXTw.png>

2. They are both coded in AutoIT

3. Their builders have almost the same exact code:

Diverse Crypter:

Asylum Crypter:

4. They both have shells that invoke the actual builder in the same exact way:

Diverse Crypter:

Asylum Crypter:

5. They have the same builder decryption method:

Diverse Crypter:

Asylum Crypter:

Wow, this is pretty disappointing to see this :/ Hopefully this will be resolved soon.

Burnzy - December 5, 2013, 4:20 am

nice catch there thanks for heads up!

FaggotFlounder - December 5, 2013, 4:26 am

If you give me the builder I can actually get you the original source in autoIT.

Why would I leak any executables? ?

Anyways, no thanks.

Dexter - December 5, 2013, 4:33 am

Looks like a decent amount of proof, I would report this to staff. Thats what I did last time a user was selling the same product with different name.

Bat™ - December 5, 2013, 4:52 am

Wow, nice proof you got man. I think someone has monopoly over HF market. Don't you think ?

The proof you have right now I'm afraid is not enough.

I don't want to harm the seller nor the coder by leaking files, I only want to warn the community!

Diverse crypter is not asylum crypter, what the hell are you on about, yes its coded in autoit, but its different source..

also for the TOS, if you want to know where I got it from, was from bytencrypter's tos haha.

I got most TOS from here:

So already you are making false assumptions.

litek - December 5, 2013, 8:56 am

i bought diverse crypter... its waste of money.

That doesn't really clear up this situation does it?

And yes it is, look at those images, almost everything Tastylicious posted is correct.

Post some evidence to clear your name (Assuming you're not just in charge of sales) Because right now it doesn't look good.

I agree codes look similar, doesn't mean the fact that "ITS EXACTLY THE SAME", already proved you on tos, got it from cubecrypt, so already hes shooting false accusations my way...

I'd say that code is more than 'similar'.

But I'm not going to take any sides here because I hadn't heard of either crypter before this thread. My judgement was purely from information provided in the OP.

you are right bro %100

Miki always telling lie

he was Called me Lier Before , but in real he is Lier

that Crypter have another thing that i discovered it before....

there was a Crypter before it name was Clarion Crypter (coded in Autoit too)

that crypter when you opened it its show 2 forms

the Diverse Crypter Same too show 2 forms

when i was closing the Clarion Crypter , one of the form stay Opened so must close from the Taskbar

also the Diverse Crypter same too

i said to him that You use same Source with Some shitty and fucking Edit

but he said NO its not that

in the End its shit Crypter & i see you are Legit about this thread too

me to Later Warn the Community about this Crypter = No thing

i bought a Copy of its for Crypting Botnets but never worked & never he said i changed the USG but even not work

never work for Botnets that i tried it but always that Coder say work i just lose Money because of that shit Crypter

Note : English is not my 1st Language so sorry if my words are not Right in spelling or Represent Full Means

Thanks..

i have many more but that is Enough

Well look at the dates,

My sales started: <https://puu.sh/5D0na.png>

asylums crypter sales started: <https://puu.sh/5D0mm.png>

His ban date as Omniscient has closed his account for scamming : <https://puu.sh/5D0qg.png>

Omni's post: <https://hackforums.net/showthread.php?tid=3852778&pid=36193609#pid36193609>

MY SALES STARTED ONCE AGAIN HERE : <https://puu.sh/5D0na.png>

Already proving you second time, that it is not the same, how can i possibly resell a crypter or w/e you claim when he has been banned few days after I launch sales? Makes no sense to me, proves you are lying and trying to sales trash and harass me.

No problem.

To the person who says to get the autoit stub. Autoit is like a 1 2 3 reverse engineer process, you basically drag and drop it into a program. Yeah, it's cool. We don't need that shizz.

I am simply warning the community and request some more input...

Well, how I found out is not what it's about.
