Thread: [Team INTRA \[Website Security Exploit Team\] is recruiting once again.](#)

Mx. - December 6, 2013, 10:35 am

CURRENTLY RECRUITING

Well hello there everyone,

Team INTRA is under new management and back after almost a year of inactivity. I thought it was about time we stirred things up again and had some fun ;)

NOTE: For all the members that PM me about putting all the info in the thread, please leave a post and link the post in your PM for reference thank you.

Introduction

Team Intra is web Security Exploit Team, We're group of the Website Hacking Elite. We'll be taking on projects as a group and working together. We are looking for a variety of people like web coders / programmers / hackers / crackers of all kinds.

More info:

Creating a new underground forums for the group / main site for other people interested in INTRA / hacking / cracking etc.

INTRA Team Leadership:

Mx. - Head of command

Hax0r - Second in command.

INTRA Team members:

Th3PonyWizard

Divine

The Mr. X

Zixem

Downloading

Beggfomercy

Requirements

No scam reports

300 posts (Your posts need to be HQ)

No automatic tools

Skilled in web exploitation / cracking / programming / and other related stuff. note: you don't have to possess them all, but we do require at least basic web hacking ability's for the team.

Application Form:

Code [/list]

[*][b]Age: [/b] (optional)

[*][b]Country: [/b] (optional)

[*][b]Years of Experience: [/b]

[*][b]Skills: [/b]

[*][b]Why do you want to join: [/b]

[*][b]How can you contribute: [/b]

[*][b]Post your hacked/defaced sites: [/b] (optional)

[*][b]Are you willing to be active in our private forum: [/b]

[/list]

NOTE: We will not take members that want to get in just to learn to hack, for that you have HF tutorials. We are only taking members that know their shit very well and plan to contribute in any way they can.

And believe me, it will be worth to get in ?

If you have been accepted please use our signature:

[img]http://a.imageshack.us/img137/8253/newintrasig.jpg[/img]

Some Skid - December 6, 2013, 11:57 am

Age: 19

Country: Sweden

years of Experience: Tbh i don't really know, but from the absolute start i think i started creating websites about 8-9 years ago. Hacking, not really sure.

Skills: SQLi, LFI/RFI, XSS, i can probably do more but not sure what i would list stuff under.

why do you want to join? - Well, since i started coming on HF i've seen Mx. And Hax0r doing their thing and then i saw INTRA coming up and i've always been amazed by their dedication and will. So joining INTRA would be a great honor.

how can you contribute? - This is a difficult question to answer, but i will try to contribute in any way possible / needed.

are you willing to be active in our private forum? - Absolutely, no question about it.

any proof of your skills? - I haven't done anything big or even of a size that's worth mentioning for a long time. Maybe you can find something in some of my threads or something.

kingcope - December 6, 2013, 12:06 pm

Age:26

Country: Germany

years of Experience: back in the day of bbs and zardoz

Skills: <http://www.exploit-db.com/author/?a=1856>

why do you want to join? I enjoy having an army of skids

how can you contribute? <http://kingcope.wordpress.com/>

post your hacked/defaced sites (optional) ucdavis.edu

are you willing to be active in our private forum? yes

any proff of your skills? <http://www.exploit-db.com/author/?a=1856>

Dyme???????????? - December 6, 2013, 12:12 pm

vouch for mr. cope I make a lot of money off of his finds.

lillix - December 6, 2013, 12:20 pm

Seems like a somewhat HQ group. Seems like you have potential. I won't be joining, but good luck.

Mx. - December 6, 2013, 12:23 pm

(Dec 6, 2013 01:12 PM)Drake Bell Wrote: [\[CITE\]](#) vouch for mr. cope I make a lot of money off of his finds.

Yawn the hole bullshit about: i love having a team of skids under me, please leave the shit out we are looking for members.

SIM-1534439 - December 6, 2013, 12:24 pm

Age: 17

Country UK

Years of Experience 5 months

Skills: Website SQL exploit finder. (I want to learn SQL more detailed)

Why do you want to join? Because I'm doing a IT Forensics course in UK and I need to learn better how to exploit websites and find vulnerabilities

How can you contribute? I can watch you guys and monitor work. I can keep a record and help find vulnerabilitys in sites.

Post your hacked/defaced sites (optional)

Are you willing to be active in our private forum? VERY

I know I look like a twat writing this but I want to learn more more than anything. Also I'm whitehat, so I won't do it and clearly deface it I will learn how to do it then leave it lol.

LevelUp - December 6, 2013, 12:27 pm

Good luck with this I guess, Haxxor seemed like a nice person and we had some laughs.

Skorp - December 6, 2013, 12:28 pm

I tend to stay away from groups, but couch for the group. Hoping to see you all somewhere... i hope
^_^

Le Flou - December 6, 2013, 1:27 pm

Good Luck bro with new Intra Team

Mr X :*

Mx. - December 6, 2013, 2:35 pm

Thanks Mr. x new applications will be reviewed as soon site is up.

Wires - December 6, 2013, 3:16 pm

Damn I remember this group.. Glad to see it's back. Was the best unofficial group back then.

A\$AP R?o??cky - December 6, 2013, 3:21 pm

Age: 16 Years Old.

Country Nestle Factories.

Years of Experience 4 Years.

Skills:

Bruteforcing

Decompiling

Marketing

Dox'ing

Sweet talking (SE)

Why do you want to join?

Not a part of any groups or clique's. May as well get involved.

How can you contribute?
Lists of hacked accounts for various things.
My sentry configs.
Tutorials.
Doxing service.
Help with marketing and making quick cash.
Post your hacked/defaced sites (optional)
Are you willing to be active in our private forum?
Yes of course.

-Syn - December 6, 2013, 5:57 pm

Age: (optional)
Country PH
Years of Experience 2 years
Skills: WebHackings (SQL Injection, Symlinking, Rooting, Mass Defacing, RCE) and Photoshop
Why do you want to join? because i want to become member of this hacking group 'INTRA'.
How can you contribute? i will help other members .. if it is about in hacking..
Post your hacked/defaced sites
<http://www.zone-h.org/archive/notifier=Synd1c4te>

Country PH
Years of Experience 2 Years
Skills: SQLi, XSS, LFI, RFI,Defacing Websites, etc....
Why do you want to join? Because i want to become a member of team intra and i need a HQ Leader
How can you contribute? i can help to deface a websites ^_^

Post your hacked/defaced sites http://zone-h.org/archive/notifier=Sh4d0w_h4x0r | http://zone-h.org/archive/published=0/notifier=Sh4d0w_h4x0r

Are you willing to be active in our private forum? YES YES YES

gigabit - December 6, 2013, 6:11 pm

Age: (optional) 23

Country (optional) -

Years of Experience 5-7

Skills: defacing, SE'ing, don't really know.

Why do you want to join? It would be nice and "fun" I guess!

How can you contribute? Deface and be active etc...

Post your hacked/defaced sites (optional) They are recovered.

Are you willing to be active in our private forum? Sure, why not.

n31ght0 - December 6, 2013, 6:11 pm

Age: (optional)

Country (optional)

Years of Experience : 4 years

Skills: around on exploiting web application vuln like sqli,xss,lfi/rfi also i can perform ddos attack. i'm skilled too with web crawler/scrapper so i can make automates tools (web bot). i have bruteforcing vuln on yahoo without proxy or facing an captcha.

Why do you want to join?: i think the name of the group was cool and i want to have more friend and group in HF

How can you contribute?: i dont know how you decide as a leader

Post your hacked/defaced sites (optional): just one of my hacked site >

<http://www.mriya.pz.gov.ua/plugins/pwn!.txt>

Are you willing to be active in our private forum?: yes

ghost of christmas past - December 6, 2013, 6:15 pm

Age: 24.

Country

Years of Experience computers 8+ and hacking 2+.

Skills:Web-based exploitation: SQLi (error, union, time, etc), XSS (inc. worms and cookie based attacks), CSRF (also with the use of XSS attacks), LFI (inc. LFD, RFI, and other inclusion methods), CF, etc.

Networking - understanding of: OSI Model, TCP/IP Stack, TCP and UDP in general, ICMP(v6), SNMP(v6), IP addressing (via DHCP, etc), ARP, nameservers, DNS, DNS exploitation (DNS/ARP poisoning - aka MiTM attacks), DoS attacks (actually know how they work, not like the kids on this forum).

Linux - I am savvy with Linux in general.

Malware - Understanding of: malware in general, sockets, anonymous methods of transferring data, .dll modification to avoid detection, DoS attacks on applications, etc.

Local (and remote) system exploitation - through the means of: (Heap-based) Buffer/Stack Overflows (with an understanding of the Stack, of course), Heap Spraying, NOP sledding, ASLR bypassing, Format String exploitation, etc.

Programming languages I am comfortable in: PHP, Python, HTML5/CSS3, VB.Net (obviously) and JavaScript.

Other programming languages: C, C++, (I guess C#, Perl).

Why do you want to join? I'm bored and want to say hi to haxOr.

How can you contribute? By helping and applying my skills.

Post your hacked/defaced sites (optional)

Are you willing to be active in our private forum? Sure.

Note: if this group is full of ass hats, i wont bother joining if a i am accepted.

133720 - December 7, 2013, 3:01 am

Age:26

Country:Myanmar

Years of Experiance :5 Years.

Skills:

0x01Injection: MYSQL & MSSQL , XSS , RFI , LFI , Backdoor , Ratting(a little) ,Linux

0x02: Coding: PHP , MYSQL , HTML5 , CSS3 , JavaScript , Ajax , Python(a little)

0x03: Design:Photoshop ,illustrator ,. ...

0x04: Next: (now learning metasploit)

Why do you want to join?I admire all of intra members and want to learn from you.

How can you contribute?learn & share my knowledge and experience.

Vouch solaris best unix o? f ever.

hoer - December 8, 2013, 9:26 am

I have applied, ???

GoneByTheWind - December 8, 2013, 11:06 am

Age: N/A (optional)

Country N/A (optional)

Years of Experience: 3 years

Skills:

Offensive Security

Error & union based sql injection (Not the best kind, but it works. Manual)

Cross site scripting (Not too basic, not too advanced.)

Doxing & Skiptracing

Social engineering (Never really done any in pratic, but I know the principle and all)

Penetration testing

Defensive Security

Anonymity & Privacy

OPSEC

Cryptography

Antiforencisc

Coding

Basic pyhton

Basic Javascript

Basic PHP

Basic CSS

Html

Computing

Linux & BSD experience (Good, it works. Not too advanced)

Reverse Engineering & decompiling (Same as above, I've decompiled and reversed a few malwares in my time. But not more than basic stuff)

Whaling (Backtracing rats & keyloggers)

Why do you want to join?

I'm a grey hat activist. I seek to use my hacking against the five eyes to dissrupt mass surveillance and spread my political ideas!

How can you contribute?

I can do whatever you want, as long as I am able to do it. Tutorials, sure. Hacking, sure. Doxing & information gathering, sure. I am a toolbox, use me! :p

Post your hacked/defaced sites: I dont deface sites, I tend to stay more stealthy and avoid attention. But of course, I can do defaces. (optional)

Are you willing to be active in our private forum?

Sure, I got lots of time on my hands.

Igneous - December 8, 2013, 12:56 pm

Update.

[*]Age: (optional)

[*]Country: England...

[*]Years of Experience: 3 Hacking, most of my life on Computers.

[*]Skills:

XSS, SQLi(manual), LFI/RFI, IDO etc

HTML

CSS

PHP

VB

Perl/DoS (learning)

I am starting forsenics/pentesting soon and

when I go to university I am taking

Ethical Hacking so a group will really help me.

[*]Why do you want to join:

I would like to join and share my skills with the other members of the group and learn from them.

[*]How can you contribute:

I can share methods and web vulnerabilities with in the group,

I will also look out for vulnerabilities on the site, scan it daily etc.

[*]Post your hacked/defaced sites: (optional)

[*]Are you willing to be active in our private forum:

Yes sir, I get on HF once a day and visit most forums.

I will be active for sure!

[/list]

Inglourious Basterd - December 8, 2013, 2:10 pm

By the way OP, every time you see "etc" in an application that means that the applicant doesn't know shit but is using it to reduce the effect of his utter skidness.

Mx. - December 8, 2013, 5:35 pm

(Dec 8, 2013 11:38 AM)Zayne Wrote: [\[CITE\]](#) Can personally vouch for this user. I've actually heard much from you guys in Intra, from I think it was 'Zhen' aka "zerofreak" if he was in Intra before.

Op please send me a message.

<https://hackforums.net/member.php?action=profile&uid=1473715>

Same guy, and you vouched for him why exactly?

Corpinator - December 8, 2013, 8:21 pm

Age: 17 (optional)

Country: USA (optional)

Years of Experience: A couple

Skills: Code Java C#, cracking

Why do you want to join: I want to work with a team to hack, never really though about doing that tbh I have always been solo. I know that i can help with cracking sites and by coding beginner programs

How can you contribute: My big thing is cracking, i know how to get HQ Combolists, proxies, and how to bruteforce websites. I also want to learn sql injecting. I do know how to slightly code java and C#

Are you willing to be active in our private forum: Hell yeah, i go on hackforums everyday, usually just lurk but if it was a private portion of a forum i would definitely post more.

BTC Exchange - December 9, 2013, 8:26 pm

-Age: 17 (optional)
-Country: USA (optional)
-Years of Experience: 4
-Skills: Penetration Testing(Everything), Very good at SE, Doxing, C++,VB.Net, Java, Perl, Python.
-Why do you want to join: Looking for a new team to roll with
-How can you contribute: Anything, and everything. Let me know what to do, and I'll do it. I have allot of private DBs/Etc. that I can give.
-Post your hacked/defaced sites: I'll find the Screenshot of my Persistent XSS on TTG & Some other Large Sites. (optional)
-Are you willing to be active in our private forum: Ofcourse

Mx. - December 9, 2013, 9:29 pm

To the one's applying please read the requirments before posting application..

Kyle1995 - December 9, 2013, 9:43 pm

Age:
Country:
Years of Experience: 2
Skills: Web exploitation - injections (LDAP, XPATH, SQL), XSS, XSRF, file inclusions (local, remote, session), path disclosure, directory traversal (generating hashed smb keys)
Coding - C, C++(favorite), PHP, SQL, Obj-c, Okay with ASM, Decent with html, css, and python
Architecture - Very knowledgeable on CA, Mips and Arm, CPU Exhaustion and Memory performance attacks.
Basic Exploitation - Very basic buffer overflows, stack and heap based, Format string vuln very well.
Electronic Engineering - Mainly Analog and some digital circuit design. Intercepting and interpreting arbitrary signals (RTL-SDR)
Why do you want to join: I remember Intra used to be a very good group and a big inspiration to me as a beginning hacker. The leaders and members are also very skilled people which I would love to get to know.
How can you contribute: Share knowledge and techniques with other members, code programs or tools, I'm intensely dedicated to learning. I'll do whatever I can.
Post your hacked/defaced sites:
Are you willing to be active in our private forum: Definitely, I don't post much or do tutorials, but I can be very active on the subforum, and even on here in the name of Intra.

Mostin - December 10, 2013, 2:31 am

Age: 18 (optional)
Country: UK/AUS (optional)
Years of Experience: 2011-2013
Skills: SQL Injection, Pentesting.
Why do you want to join: To build on my knowledge so far and to work with others to find more efficient methods of what I can currently do.
How can you contribute: Very active in communities, can provide access to some good money methods and general hacking knowledge
Post your hacked/defaced sites: I do not deface sites, I usually sell the database. (optional)
Are you willing to be active in our private forum: Yes

Miami - December 10, 2013, 9:48 am

Damn intra starting back up, you guys ran the game for a bit saw you in a couple of news posts. Vouch for this crew if only my skills were a bit better id apply. Good luck

Satoshi Nakamoto - December 10, 2013, 5:12 pm

[*]Years of Experience: 4

[*]Skills: Android Development

[*]Why do you want to join: I possess a unique set of skills and custom coded products that I believe a group could profit from.

[*]How can you contribute: Android Botnet.

[*]Post your hacked/defaced sites: Android Devices. (optional)

[*]Are you willing to be active in our private forum: Absolutely. Available almost 24/7

PM me for a live demo if you are interested.

0x80 - December 11, 2013, 11:51 am

I know I don't meet all of the requirements (due to post count), but i'm going to apply anyway and i'm hoping you'll overlook

the lack of post count (most of my time is spent lurking, hence 'join date' to post count ratio)

Age: over 20, younger than 25.

Country: europe

Years of Experience: been "hacking" for around 10 years now, been actively involved within the blackhat scene for 7 or 8 years.

Skills: I'm skilled at web-based security, and have knowledge in SQLi (blind, time-based, etc etc.. various DBMS), LFI+directory trav, RFI, XSS (persistent, non-persistent, blind, etc), CSRF, DNS hijacking and all of the other commonly-used web-based attack vectors. I perform my web-based audits manually, and due to my programming experience I often write up 0day exploit code to target a certain vulnerable service that is running on the target site, in order to perform an exploit based upon the results of my code audits. I have had a lot of past experience in running and maintaining a botnet (p2p w/ decentralized c&c.. makes it a bitch to trace or shut down) although I am against the idea of DDoS, and will generally use a net to either mine bitcoins or to perform distributed bruteforcing/hashcracking. I have programming knowledge in C/C++, PHP, Perl, C#, SQL, JavaScript, ASM (x86 and a little MIPS32) and Processing (very interesting lang which i'm still getting to grips with.. recently been creating 3d visual neural networks that emulate the human brain within this lang). I have knowledge in other langs such as bash, batch, HTML/CSS etc and have lots of experience with both the windows CLI and OS' and many *nix distros, I have an in-depth knowledge in networking (specifically protocols included within TCP/IP suite), I also have knowledge of LAN hacking and have some nice methods that haven't really been seen before, a lot of past experience in wardriving (not in the sense that i'm mapping out networks, but more in the sense of getting into LAN of a corporation via WPA2-PSK handshake interception). I have knowledge of how to escalate my current priveleges once access to a site is gained, in order to gain uid0 or equiv. I have knowledge in lower-level exploitation, with an undertsanding of how to perform attacks such as buffer overflows, and methods of mitigating the preventions put in place (i.e. bypassing NX Stack, ASLR, Stack Canaries, etc).

Why do you want to join: I want to join as I wish to potentially improve my current skillsets, and I am looking to get back into things but would like a group of like-minded individuals to collaborate

with when I do so.

How can you contribute: I can contribute via collaboration, helping to identify vulnerabilities on the targets and helping to exploit said vulnerabilities. I also have a bunch of cloud servers, a bunch of remote servers setup to be used for tunnelling (logfiles symlinked to /dev/null, iptables whitelisting applied, etc) in a secure manner. I also have my own IRCd up and running on a secured servers with nice specs if the group is in need of an IRC server.

[*]Are you willing to be active in our private forum: Definitely.

[/list]

Canonsx130 - December 19, 2013, 1:32 am

Age: (optional) 25-30

Country: (optional)

Years of Experience: 5-7

Skills: Moderate knowledge about most of the web application hacking techniques, cracking, bruteforcing. Proficient in java and few more web languages.

Why do you want to join: I want to be active in a forum concentrated on hacking and related topics to try and expand my knowledge, share my knowledge with others and help out everyone who wants to enter into the scene.

How can you contribute: I'll be sharing all the knowledge I have with all the members. I can create pretty good tutorials and I love helping members with their problems, doubts or anything else. While I'm not the best, I always try to push myself and help out others whenever possible. That's for contribution :)

Post your hacked/defaced sites: (optional)

Are you willing to be active in our private forum: Yes. I'm looking forward to it very much. I'd love to be part of this forum and start out.

Suit® - December 19, 2013, 4:42 am

Country: Land of the Long White Cloud

Years of Experience: N/A

Skills: Programming, Cracking w/ Ollydbg, SQLi

Why do you want to join: I'm unemployed, broke and have nothing to lose. I put hacking aside for a while to allow for me to mature in programming. I was a member previously with intra, and joined to learn. A very valuable stay I might add. However, I am looking to join for different reasons now. I am looking for a team with a purpose, with projects, with goals. Somewhere I can settle.

How can you contribute: I can write programs, tools, helpers, I'm creative and I like to think big. I

would also like to add that I am strong with my english.

Post your hacked/defaced sites: <http://mixport.co.nz/fleet.php> - I sneaked a subtle tie in there.
shelled using .htaccess

Are you willing to be active in our private forum: yeah, I got time

I'm going to shoot you a PM regarding a few questions about intra.

B0\$\$ - December 19, 2013, 4:54 am

Age: (optional)

Country: (optional)

Years of Experience: 3

Skills: Penetration Testing, Web Hacking

Why do you want to join: Looking for a team to play the game with.

How can you contribute: I have a few private tools and methods that I can share with Intra. Also if you are behind increasing the ranks in zone-h, I can help :)

Post your hacked/defaced sites: Looking to keep a clean profile on HF. I'll gladly do it via PM

Are you willing to be active in our private forum: Very Active

Mx. - December 21, 2013, 6:46 pm

Members that have awakened our interest have been pmed, the rest im sorry but for now you are not accepted.

Don't be sad, keep going in your way, get our attention and earn your spot :).

MFFS - December 22, 2013, 8:02 am

Age: 17

Country: Serbia

Years of Experience: 1

Skills: SQL, XSS, LFI/RFI, (symlink, root - if that's count)

Why do you want to join: I would like to join because it would be easy to contribute stuffs and also to learn some tricks from pros.. and i think i don't need to mention what's honor to be part of this group.

How can you contribute: Make tutorials about something new, maybe something advanced, or some tricks, or similar.

Post your hacked/defaced sites: I don't deface.

Are you willing to be active in our private forum: Ofcourse yes.

v?x? - December 26, 2013, 2:20 pm

Age: (optional)

I'd rather not post this on HackForums. If you are wanting to know, go ahead and shoot me a PM.

Country: (optional)

Same as above.

Years of Experience:

Roughly 4 (2009), but have only started gaining knowledge this past year. Before it was skiddy Xbox LIVE ddosing and doxing.

Skills:

Web exploitation through a vereity of methods:

- Union based SQLi
- XSS + Filter Evasion
- CSRF
- CloudFlare Exploitation (However this is just basically LFI)

- Basic LFI
- Basic RFI
- Remote Code Injection
- Basic Buffer Overflows
- Cryptography
- Doxing (can surprisingly come in handy at times)
- Basic Nullbyte Injection
- A variety of programming, and web languages.

Why do you want to join:

It seems like a cool group with knowledgeable members and I want to join to better my knowledge.

How can you contribute:

If there are team projects, I can put my current knowledge and knowledge learned within the group to use and hopefully help out the group in any other ways I can.

Post your hacked/defaced sites: (optional)

This can be discussed off-site.

Are you willing to be active in our private forum:

Yes, I most certainly am. I'm not all that active on this public board at current (due to the fact I hate the community), but I would be active in the private forum.

Orochimaru - December 26, 2013, 6:22 pm

Age: 16

Country: Canada

Years of Experience: 2 Years

Skills:

Website Construction - HTML, Hosting, managing and construction. I made a forum here:
Legacyforums.vacau.com (soon .com)

Gaming - FPS, XBOX 360, PS3, PC, LoL, Skyrim, Minecraft, Habbo, Maplestory, CoD, CS, PSP, Gameboy Advanced SP, Sports games, racing and more

Coding - HTML, Python and VB.NET/VB6 (Am now learning C/C++)

Graphics - I can do a little bit of Photoshop (Logos, Userbars, Signatures and GFX Threads which you can find most of at legacyforums.vacau.com)

Computing - Windows 7/8, Malware Removal, iOS and iDevice, Virtual machines (VMware, etc)

Marketplace - I can manage my money and make some off the internet with services like currency exchange, crypting, setup and more.

Hacking - Botnet, JDB, Exploit, Jailbreak, Infections, Rootkit/Bookit Ring0-Ring3, Cryptography, SQLi, Spreading, Vulnerabilities.

Why do you want to join: I'd like to be part of a community with people who share the same interests as me and I'd love to cooperate with them on things like project, threads, etc.

How can you contribute: I can share all my tutorials, guides and methods. I can help people with whatever they need and join in on projects and things like that.

Post your hacked/defaced sites: (optional)

Are you willing to be active in our private forum: Yes

Ergo - December 27, 2013, 2:34 pm

I'm sorry but I can't let this kind of thing continue.

(Dec 26, 2013 07:22 PM)Orochimaru Wrote: [\[CITE\]](#) BotnetNot particularly a skill.

(Dec 26, 2013 07:22 PM)Orochimaru Wrote: [\[CITE\]](#) JDBUhuh. Is that something you consider particularly difficult? You know, running a random generator and all?

(Dec 26, 2013 07:22 PM)Orochimaru Wrote: [\[CITE\]](#) ExploitOh jesus christ. Are you going to expand on that at all, or just leave it as that. Also, whilst we're at it:

(Dec 26, 2013 07:22 PM)Orochimaru Wrote: [\[CITE\]](#) Vulnerabilities.You should definitely expand on that to be more specific, because it just seems like you're throwing a load of random words together that are to do with hacking.

(Dec 26, 2013 07:22 PM)Orochimaru Wrote: [\[CITE\]](#) JailbreakDo you understand how jailbreaking works? Do you understand the vulnerabilities and the exploitation methods involved for usage in newer or older jailbreaking programs?

(Dec 26, 2013 07:22 PM)Orochimaru Wrote: [\[CITE\]](#) InfectionsCare to expand on that, or do you mean random shit like "OMG BATCH HAX LOLOL GREEN LETTERS. MUCH HAX."

(Dec 26, 2013 07:22 PM)Orochimaru Wrote: [\[CITE\]](#) CryptographyWhat cryptographic methods are you familiar with? And no, don't say "crypting programs" because that is not a valid answer.

(Dec 26, 2013 07:22 PM)Orochimaru Wrote: [\[CITE\]](#) SpreadingI personally don't consider this much of a skill, but what do I know, eh?

Please, fix your post or make another that's slightly more improved.

Hiwhatsup - December 27, 2013, 2:35 pm

Damn! I used to be in Team Intra years ago, those were some good days!

Remember Classy? ;D

Mx. - January 1, 2014, 8:17 pm

Yeah i remember.

OT: Still looking for about 1 or 2 more people for the team for now.

Keep the apply's coming and earn your spot.

Corrupt. - January 2, 2014, 11:23 am

Hey, umm. Can i come back? if you can't remember me just look at my threads. Cheers

Coftek - January 8, 2014, 5:01 am

Been a while since I've heard that name.. That was thee group to be in a few years ago. Hope it's as high quality as it was back then, I wish you luck.

Sm1th???? - January 8, 2014, 3:12 pm

Age: 16

Country: US

Years of Experience: 2

Skills: Web Development (HTML, CSS, PHP, Javascript, jQuery, Ajax), Pen Testing (XSS, CSRF, LFI/RFI, and SQLi)

Why do you want to join: So I can expand my talents as well as practice my skills.

How can you contribute: Create several moderate to advance challenges, as well as help other members.

Post your hacked/defaced sites: I do not deface sites, (too destructive). I report vulns.

Are you willing to be active in our private forum: Yes.

m00dy - January 21, 2014, 1:50 am

haha i miss my old team, good luck guys with the recruitment ?

Gyir - January 21, 2014, 10:24 am

Age: 18

Country: United States

Years of Experience: 6

Skills: Python (Flask, scrapy, socket handling), MySQL, JS/CSS/HTML, ability to exploit most content management systems (Joomla, Drupal, Word Press), Linux, shell scripting.

Why do you want to join: I've never been a part of a team before. I'd always enlisted the help of IRC members, or simply run by myself.

How can you contribute: I possess a strong familiarity with many methods of exploitation, and most importantly - a sound understanding of what's happening behind the scenes. I believe I have a unique skill set, and can assiduously follow instructions, making me a valuable team member.

Post your hacked/defaced sites: Under the alias epoch I hacked the Economic Development Association of Scotland. Through SQL injection I procured account information for over 600 individuals and corporations.

Are you willing to be active in our private forum: Yes. I work from my computer and run a consulting business. I'm available 24 hours a day, seven days a week.

As a side note, A friend referred me and told me Intra was recruiting. I've seen some of your work, and decided to create an account at this forum and apply.

reback - January 27, 2014, 12:51 pm

Age: No

Country: No

Years of Experience: 3-4

Skills: PHP, Javascript, CSS, C++, SQLi, RFI, Shelling, SE, XSS, CSRF, METASPLOIT (learning) a deep interest for web. [/b]

Why do you want to join: Tbh i know the working almost all kind of vulnerabilities (OWASP top 10) but never had platform to practice and friends to brainstorm with (We all need some mentor/sensei/helper/team). So I'd say, to practice professionally

How can you contribute: Sharing my brain with Intra

Post your hacked/defaced sites: Never defaced! scan->Exploit->Access->Happy!

Are you willing to be active in our private forum: Yes, as much as i can and as long as I'll be experiencing new stuff

I recently joined HF, I agree i don't have 300 post! but i don't post shit, give them a look before judging ?

Burnzy - June 26, 2014, 11:39 am

Yo Mx u cunt good to see you keep the team alive, i found a job so had to quit with my adventure for a while, i found the old database if you want to back it up let me know, keep up fgt <3

Mx. - June 26, 2014, 1:33 pm

Yeah send me it sky that would be nice, nice to see your still around mate :).

HIGH PAID FELLA - June 26, 2014, 1:41 pm

[/list]
[*]Age: (optional)
[*]Country: (optional)
[*]Years of Experience: 1-2 years.
[*]Skills: Basic coding knowledge that needs to get expanded (PHP, SQL, HTML), general networking/web security/web exploitation knowledge (SQLi, XSS, LFI, RFI) a lot of knowledge within botnets and such.
[*]Why do you want to join: I want to join because I want to share my knowledge and to learn much more about coding and networking and such. I've got some spare time and can learn a lot then.
[*]How can you contribute: I can share funny stuff as exploits and such.
[*]Post your hacked/defaced sites: (optional)
[*]Are you willing to be active in our private forum: sure.
[/list]

Burnzy - June 26, 2014, 1:49 pm

My country was banned from hf, but now am out of my town for a work, so didnt had time for those stuff had to go through preparations and stuff, love this job but it can be annoying hehe

CxZR - June 26, 2014, 2:54 pm

(Dec 11, 2013 12:51 PM)Adipiscing Wrote: [CITE](#) I know I don't meet all of the requirements (due to post count), but i'm going to apply anyway and i'm hoping you'll overlook

the lack of post count (most of my time is spent lurking, hence 'join date' to post count ratio)
Age: over 20, younger than 25.

Country: europe

Years of Experience: been "hacking" for around 10 years now, been actively involved within the blackhat scene for 7 or 8 years.

Skills: I'm skilled at web-based security, and have knowledge in SQLi (blind, time-based, etc etc.. various DBMS), LFI+directory trav, RFI, XSS (persistent, non-persistent, blind, etc), CSRF, DNS hijacking and all of the other commonly-used web-based attack vectors. I perform my web-based audits manually, and due to my programming experience I often write up 0day exploit code to target a certain vulnerable service that is running on the target site, in order to perform an exploit based upon the results of my code audits. I have had a lot of past experience in running and maintaining a botnet (p2p w/ decentralized c&c.. makes it a bitch to trace or shut down) although I am against the idea of DDoS, and will generally use a net to either mine bitcoins or to perform distributed bruteforcing/hashcracking. I have programming knowledge in C/C++, PHP, Perl, C#, SQL, JavaScript, ASM (x86 and a little MIPS32) and Processing (very interesting lang which i'm still getting to grips with.. recently been creating 3d visual neural networks that emulate the human brain within this lang). I have knowledge in other langs such as bash, batch, HTML/CSS etc and have lots of experience with both the windows CLI and OS' and many *nix distros, I have an in-depth knowledge in networking (specifically protocols included within TCP/IP suite), I also have knowledge of LAN hacking and have some nice methods that haven't really been seen before, a lot of past experience in wardriving (not in the sense that i'm mapping out networks, but more in the sense of getting into LAN of a corporation via WPA2-PSK handshake interception). I have knowledge of how to escalate my current privileges once access to a site is gained, in order to gain uid0 or equiv. I

have knowledge in lower-level exploitation, with an understanding of how to perform attacks such as buffer overflows, and methods of mitigating the preventions put in place (i.e. bypassing NX Stack, ASLR, Stack Canaries, etc).

Why do you want to join: I want to join as I wish to potentially improve my current skillsets, and I am looking to get back into things but would like a group of like-minded individuals to collaborate with when I do so.

How can you contribute: I can contribute via collaboration, helping to identify vulnerabilities on the targets and helping to exploit said vulnerabilities. I also have a bunch of cloud servers, a bunch of remote servers setup to be used for tunnelling (logfiles symlinked to /dev/null, iptables whitelisting applied, etc) in a secure manner. I also have my own IRCd up and running on a secured servers with nice specs if the group is in need of an IRC server.

Are you willing to be active in our private forum: yes

Feel free to ask about anything which I missed out

Best app here, can personally vouch to this user being a fucking smack-daddy.

Good luck to the seemingly endless supply of Internet Warlords, I hope XSSer and Havij serve you well! May the faggot be in you!

Also, just a quick note for future applicants; It's pointless lying. This thread has far too many already, and even if your lies get you that extra 3 places ahead in the cue, you will be tested, flop, and then look like a retard regardless. It's better to be honest, and hope somebody takes an interest.

Also, just to clarify, as I can see some people are struggling here. "Basic" knowledge of a language or method does not constitute:

Knows HTML >> "Image tags begin with a bracket right?"

Knows Python >> "Well I can make it print text.."

Knows SQLi >> "Well I know what MySQL is.."

Knows CSRF >> "It's that thing where you add shit into that other thing right? The thing at the top you google shit from.."

Knows how to ROP >> "Well I can open xterm.."

Sadly, it seems good threads always attract full-retards.

Bovril Coin - July 3, 2014, 5:20 am

i dont suppose any of you are in the w0rm.in team? if so i would like to apply for a invite if posible

Impress. - July 4, 2014, 4:01 am

Goodluck for the people who enter?

????????N - July 15, 2014, 1:46 pm

[/list]

[*]Age: Not Public (optional)

[*]Country: Not Public (optional)

[*]Years of Experience: 5

[*]Skills: Coding, Sqli, RATs, botnets, decryption

[*]Why do you want to join: Looking for a hq group that will be active.

[*]How can you contribute: I can teach others that don't have as much knowledge and help get into sites or code programs for the group(or websites)

[*]Post your hacked/defaced sites: (optional)

[*]Are you willing to be active in our private forum: Yes but not as active as hackforums.

[/list]

Bibl - July 15, 2014, 2:15 pm

[*]Age: i'm 18

[*]Country: America (I'm only saying that cuz I know nobody here can touch me

[*]Years of Experience: 5 years, I started coding exploits when I was 15 but i started "hacking" at 13

[*]Skills: Programming: Python, HTML, CSS, PHP, Java, a bit of perl Hacking: I mostly write exploits but other than that i'm a web hacker

[*]Why do you want to join: So I can learn more, and if i can teach people

[*]How can you contribute: Write exploits for the team and doing whatever you want me to do.

[*]Post your hacked/defaced sites: I won't post them in public but if we talk and I trust you I'll

show you some things

[*]Are you willing to be active in our private forum: of course!

soatok - July 16, 2014, 2:18 pm

Age: 24

Country: America

Years of Experience: 12

Skills: Full-stack PHP development Apache/nginx webserver administration Experienced Debian/Ubuntu user Vulnerability analysis Code auditing Cryptanalysis

Why do you want to join: I like to think I'm an excellent web programmer, since none of the sites I've worked on have ever fallen to SQLi, XSS, etc. but at the same token I've never tried to defend against a motivated black-hat before. I'd like to put my skills to the test, explore innovative new ways to abuse PHP for fun and profit, and publish exploits that are less dull and dreary than most of the shit on FD.

How can you contribute: Identify security weaknesses in source code, strengthen your infrastructure, cryptanalysis.

Are you willing to be active in our private forum: Only if you allow connections from Tor.

Note: I don't have 300 posts yet, but I've only been registered for about a week. Give it time ;)

loyal_learner - July 21, 2014, 5:30 pm

Age: 17-21, won't tell specifically.

Experience: - blind-sqli, xss, rfi, lfi etc.

- Windows security (priv8 exploits), Linux geek, 0-day on CentOS exploit etc.

Why do you want to join: Because I have experiences in how effective groups are when we're under semi-serious hacking/exploit dev.

How can you contribute: I might have some scripts/exploits that could be relevant in the groups focus-points. Anyway, I am mostly up to anything the group wants to achieve.

Are you willing to be active in our private forum: Sure, I feel more comfortable on priv8 forums.

a s d f - July 22, 2014, 5:14 am

HR isn't a part of this anymore? I thought he was a core member

Mx. - July 22, 2014, 6:44 am

He still is, i don't know where you got your information from tbh.

a s d f - July 22, 2014, 10:46 am

(Jul 22, 2014 06:44 AM)Mx. Wrote: [\[CITE\]](#) He still is, i don't know where you got your information from tbh. Possibly from the fact he wasn't listed as a member? I was going to ask him but he's been offline

R^ptor - July 22, 2014, 8:08 pm

I don't have 300 post I made this account last night FYI (my 1st HF account)

[*]Age: 20

[*]Country: USA

[*]Years of Experience: 5

[*]Skills: Writing exploits for apps, and web attacks

[*]Why do you want to join: To learn more, and to have fun mostly.

[*]How can you contribute: What ever you need done I'll try my best to do. I can help.

[*]Post your hacked/defaced sites: Not posting anything on this forum

[*]Are you willing to be active in our private forum: I'm online 24/7 so yes!

TheWholeWorldExplodes - July 23, 2014, 4:55 am

Age: 17 (optional)

Country: UK - England

Years of Experience: 3-4

Skills: Web Exploitation, Privilege escalation, data mangement and stealing, social engineering (in the exploitation sense, not to get a free ipad)

Why do you want to join: This team carries a lot of weight, would love to be a part of it. got some good leaders and seems like a very skilled group

How can you contribute: Tutorials and knowledge, useful group discussions and collaberative projects.

Post your hacked/defaced sites: I dont tend to deface sites. I like to keep my access open and add their database to my store of data. See the spoiler below,

Spoiler ([Click to View](#))

[img]http://s27.postimg.org/hxd8v85kz/proof.png[/img]

Are you willing to be active in our private forum: Yeah, that would be fine.

As my post count is low, I would say this, Please dont judge me on the status of my account, instead judge me on my attitude as i plan to contribute a lot more

Sugawara - July 23, 2014, 5:23 am

Age: (optional)

Country: (optional)

Years of Experience: 1 Year or so

Skills: Basics of SQLi, XSS and DDos, I know I haven't done much but I will learn.

Why do you want to join: When I was actually active on HF, I found Team Intra is the only Legit and Unofficial group. I have had applied for many but never selected in one. I don't know the reason. All I would want is to learn and teach. I'm pretty sure I'm interested in web Exploiting, I never got a kick start though. This is the only way I can built and show my talent which can help me and sharing of what I know which may help members too.

How can you contribute: I'm surely a learner but I can contribute on the basics of SQLi and XSS for the start, but eventually as I start exploring things, I'll surely contribute.

Post your hacked/defaced sites: I Haven't hacked or defaced any. I have done using Fckeditor but that's not proper hacking. Also have used Havij for SQLi.

Are you willing to be active in our private forum: probably 6 - 7 Hours active on Forums and learning goes extra. I'm pretty sure I'll stay active for learning and Sharing!

Ps : Make changes on code : The initial [/list] to. Goodluck

Abdilo - July 24, 2014, 7:28 am

My impression of any application on any group:

Sums up the applications in this thread pretty well dont you think?

Code File manipulation (eg: /vuln?is=1992922, fail.txt/log/php now has 1992922 in it)(not really a skill)

Local File Inlcusion (not really a skill)

Remote File Inlcusion (not really a skill)

SQLI (any dumbass with google knows how to do that)

XSS (Contradz i know the basics of html and javascript)

XCS (XSS via file names, sql databases, etc which is reflected via a control panel or ftp browser etc)

XSRF (WOW SUCH HAKES TECH ME)

Exploits (Congradz you know metasploit)
Private Exploits (WOW YOU HAVE DOS HAKE TCH ME)
Rooting (Nice you know what Azazel is)
Bruteforcing (really? 1,12,13,14,15)
Phreaking (WELCOME TO THE 90's)
Fuzzing (admitting to using a tool(more or less acunetix))
Stealth port scans (...WOW 1337 ACK SCAN HAKES)
Ratting (Congradz on using a gui that tells you how to do everything)
Fudding (Really? Hyperion is better then your shit crypter)
Kali (mee think me 1337 hax0r for installing kali)
Reverse Engineering (ME USE ILSPY AND DE4DOT TO H3AKZ0R APPZ)
PHP (Usefull for code audits but thats about it)
MYSQL (just cause you know how to simple sql querys with sqli doesn't mean you can add that to the list)
batch (cause you know 1337 echo off)
visual basic (saddness/skiddness)
Autoit (come on really)
Web forensics (How what where... google cache and archive.org)
HTML (nope)
Linux Commandline (nope)
Rap (why?)
Botnets (<http://abdilo.com/ftb/> woops)
Social Engineering (just cause you got a toothbrush wow)
MITM (I STODD BETWEEN THESE TWO GUYS)
Graphics Design (I INSTALLED PHOTOSHOP)
Javascript (Lol)
CSS (lol)
Spam tools (r u serious?)
Selling (wow)
Making money (signed to to coinbase...connected to facebook..made \$1)
Doxing (lol)
Keyloggers (sadness)
Lua (goodish)
C++ (ye +)
C (ye ++)
ASM (ye +++)
Python (goodish)
Ruby (goodish)
Perl (goodish)
Maniputation (1337 hax0r insepct element)
ewhore (...whore)
exploitdb/1337day profiles (interesting)

Microsofts terms and conditions clearly states it records any voice communications on all of its services.

Plus the big orgy of them selling any accounts the government wants.

And the fact that they state in there term and conditions that anything they see that is "illegal". Hell even pernicious developers thread creator doesnt know what jabber is(nice guy though tried to add me on google talk thinking it was jabber xD).

Any skid clearly knows that sqlmap and havij and can use fiddler and wireshark to grab the output for waf etc.

hopefully you tell them to try and then you check the access.log

Do we look like an italian mafia? Sorry to cut down fantasies, but if people take this group as another underground leet stairfall-touched hacking syndicate - It's not. We're a bunch of chill people talking together through skype, sometimes showing off work or helping around eachoher. You'd need a MIT magnifying microscope to locate any fucks I give regarding logging. INTRA hasn't been active for like, what, 2 years? Mx is busy with IRL, Haxor as well, Guy is gone, Hooded donnu, zixem quit, I went full white, benzi dissapeared (came back these days though), and anybody else I missed is probably busy as well. So there isn't much point of getting any hopes up here as well.

PerniciousDevs was a decent group. I have no idea what is going over there currently.

Are you one of these guys that recommend exploit.im to anybody that passes by? It doesn't matter. Nobody does anything over there nor at any of the other HF groups. nobody gives two shits about what's going on over these chats.

soatok - July 25, 2014, 6:22 am

Put that virtual machine inside of a truecrypt volume(if your not a person who for one reason or another does not trust the software)
