I pmed him for bitcoins, i asked if he had for \$50 bitcoins. he said yes and added my skype. Then i asked for proof that he had, he said okay but no TV. I was like uh.. okay. I knew something was happening. so i asked if he could share skype screen. He said okay. After like 20 minutes he showed his screen but didn't want to refresh the coinbase page for proof that he didn't change the html of the site.

He then didn't want to do so. so i closed the screen. Later i asked for another proof to be sure he didn't lie. He then refreshed correctly and i saw he only had 0,30\$ in bitcoins and on the other tab page he was resolving my skype IP. He said i will ddos you for 4 hours. I then got ddosed for like 1 hour. Then he is cross posting everywhere me trying to scam him while HE was trying to scam me.
Edit: He's now sending indians to my skype on addmecontacts website Imfao, how sad.
