Can anyone give a FUD update?

If it's FUD, I'm a non-Distributer in need of a cool FUD Crypter, and of course would be more than willing to give some sort of feedback on this particular crypter.... have engaged in successful crypting [CG], even though that particular crypter was only UD at the time, in a very positive manner.

Thank You ?

Also, is it working well with cybergate and/or cerberus rats? If so, are there any specific option configurations I should be aware of? Thanks.

hi, cool!

it's more interesting for me, what you have done for making it fud.

I try to make my own stuff, but the way to get is rt-fud is quite hard.

it would be nice, if you could describe what you are doing, the source code would be very nice (PM)  
:)

so, cool thing publishing it to the community.

is not fud. can we get a fud stub?

**Cognitive Decline** - June 20, 2010, 11:50 am

Again, this is why people shouldn't give crypters to idiots. Never upload it to virustotal, it will send it as a virus to anti virus programs. Thus it being 8 detected. Nice job guys.

There should be a requirement, even if I don't qualify you shouldn't waste crypters on people like this (Uploaded to virus total)
