Thread: [Facebook Remote Viewer: Fashdrive Edition *FREE* now w/ pics!!!](#)

299hi - April 28, 2010, 4:11 pm

Hey guys,

While I'm waiting to get a Payapl I tohught I would give away the Flashdrive Edtion of my fake Facebook remote login tool. Basically you have it on your flashdrive and you have someone use and it saves info to your flashdrive. I have a MUCH more advanced one that actaully makes the person think they've logged coming out soon. (When i get a paypal) So for now heres the Flashdrive edition:::

WHAT IT DOES: This file appears to be running as a "Facebook Remote viewer" that bypasses intenret securities

The user is then prompted to log in and text file called [theirname].txt is created on your flashdrive

The user then goes through some fake login ins messages and eventually gets message saying error FILETOOBIG

Open the file later and you have thier password :0

File Type: .bat in a .exe

WHAT THE SOON TO BE RELEASED VERSION DOES:

The normal version sends the file as an ftp and has the facebook login so in depth they think they are actually logged on and sending personal messages

Thats a terrible idea lol why not have a stealer run on the flashdrive?

Snipesre - April 28, 2010, 6:10 pm

This has been done but nice idea tho

:too short

Man, your title is misleading. You should add "Fake" text to your title.

Seems like a good Idea, but I don't use Facebook, so It's not for me. Nonetheless, I shall await the screenshots and delve Into further upon their arrival. I do have a friend who'll be appreciative of this methodology, hence I'll look Into It for him.

Thanks mate.

Cheers :)

coreninja - March 17, 2011, 2:35 am

the file was removed from media fire

Ac!d - March 17, 2011, 6:39 am

Link is down. Could you possibly update with vscan and updated links?

.Moonlight - March 17, 2011, 6:42 am

So basically, it's a phishing application am I right?

hackersidd - March 17, 2011, 9:42 am

it looks quiet good but unfortunately for me, my friends are not that stupid :(
