Dragon339 - December 8, 2013, 11:22 am

didnt work on sandbox..infected or just fucked up code

Y45KUR - December 8, 2013, 11:57 am

You also ripped the source code from Angelic Wings since I can see that from your 'source code'. The top 3 functions are from his code. Also the Crypex is from his code, just renamed to Crypex, originally from 'Crypt'.

And not even mentioning him in your so called 'crypter' which is probably backdoored? That's sad.
