Thread: [\[FREE\] Flash player spread methode by TheExclusive. Work with all versions!](#)

TheExclusive - December 8, 2013, 10:24 am

I have made a simple methode to spread your server with Flash player social engineering.

The victims gonna see a notification that they have outdated Flash Player and to stay secure they have to update their Flash Player.

What actually will happen:

They download your binded server with a real Flash Player update.

And their ip is logged, so the next time they visit the page they not gonna see the message again so it is less suspicious.

Demo:

You can also choose different layouts of the warning screen.

Options:

PM me for the direct link

Great pages, great uses. Very overlooked.

HarveySpecter - December 8, 2013, 2:39 pm

Very good tutorial. I didn't know this method. Thanks a lot.

howard2525 - December 8, 2013, 3:08 pm

Didn't think about this before! thanks!

Limboland™ - January 15, 2014, 11:56 am

But there is 1 problem

after downloading the file you will see a blank page ...

can you make redirecting after downloading the file ?

if the ip is logged to the log.txt file you will see next time only blank page .

gwopgetta - January 15, 2014, 12:48 pm

Can you PM me this as I have to make 25 HQ Posts,

Dont want to go round spamming.

Thanks

mediabooster - January 15, 2014, 12:50 pm

This looks great, Great extra option to add to my project, may I please get the link to the download?

Thank you.
