I got a vouch copy of this, and here is my review.

This ebook is great, this guy will teach you how to watch sports in HD.

The ebook is verry well written, and there is no spelling errors at all.

The method worked for me. Verry good ebook!

Vouch for this guy! - And buy his ebook.

I have received a vouch copy of this eBook and I must say, this eBook is PURE GOLD.

The method illustrated in this eBook is unknown to my eyes, and I highly doubt this method was ever sold on HackForums. The method takes roughly 15-20 minutes to complete, which isn't very "time consuming".

The grammar and pronunciation throughout the eBook was a bit off, but I still could understand clearly on what the author was trying to get me to comprehend. If you are a HUGE sportsfan like me, then you shouldn't have much thought on spending a measly FIVE DOLLARS on such a HQ eBook.

Good luck to all y'all! ?

This eBook is definitely worth it! It aims more towards iOS games than watching events in general, but this is definitely pure gold if you cannot watch any events for free!

Amazing eBook, purchased this and have to say, I'm amazed being a sports fan and betting a lot.. This is AMAZING.

Games can be watch on iOS devices, but on the last page of the eBook you will see that it's also possible to watch on TV and/or PC :)

What TV source these streams use? Is it 720P or 1080P? Does this include programs like SopCast?

Is the jailbreak iOS device must? I've iPad but I don't want to jailbreak it.

The method does not include SOPCast or any other shitty stream program. These streams are HQ, straight from the official broadcasts (NFL GamePass, NBA LeaguePass etcetera). I believe they provide 720p streams.

A jailbroken device is a must for my method.
