Thread: [How do I mask a link in a Thread or Link to a PRE-MADE PM?](#)

Mac Macman - December 9, 2013, 1:37 pm

Basically, I am trying to make a giveaway and I would like to insert a:

"Click here to PM me" that leads to a PRE-MADE PM with things you have to fill out.

How do I go upon doing so? Thanks in advance!

KinGxKeV - December 9, 2013, 1:43 pm

Here you go. Hope I helped you in some way shape or form.

Code [url=https://hackforums.net/private.php?action=send&uid=(your uid)&subject=(PM TITLE)&message=(MESSAGE)]PM ME[/url]

Emylbus - December 9, 2013, 1:46 pm

The structure of your link would look like this:

Code

https://hackforums.net/private.php?action=send&uid=UID&subject=SUBJECT&message=MESSAGE
EReplace UID with the recipient's UID, the SUBJECT with the subject you want, and the MESSAGE with the message you want.

You don't have to include the subject or message parts. For just adding a message do this:

Code https://hackforums.net/private.php?action=send&uid=UID&message=MESSAGEand just to add a subject do this:

Code https://hackforums.net/private.php?action=send&uid=UID&subject=SUBJECT

Then just use URL tags as you usually would as such:

[Click To Message Emy](#)

the code for which would look like this:

Code [url=https://hackforums.net/private.php?action=send&uid=956054&subject=Hey Emy!&message=This is an example message link]Click To Message Emy[/url]
