Thread: [\[Tutorial\] Steal someones Facebook! In just 5 EASY steps! \[Tutorial\]](#)

Babadook - December 9, 2013, 7:22 pm

Hello HF!

FIRSTLY I spent hours trying to get as much info as I could to make it easier for you. Then spent quite some time on this tutorial; the least you could do is say thank you. 2,700 views and only a few respond : (.

Today I have been really bored and never once have I gained control over someones Facebook. So I decided to try it and It worked! So far I have gained 6 different Facebook logins 1 friend and 5 girls I rarely speak to! I wouldn't really call this a Facebook hack but stealing their Facebook since you aren't really using any code or glitch in the system, but you are gaining control over someones Facebook so without further adieu How to Steal Someones Facebook Account.

Here is how to do it:

Step one:

To get the Facebook users e-mail go to yahoo.com and click "Sign in" then choose "Sign in with Facebook".

Spoiler [\(Click to View\)](#)

Step two:

Click "Okay"

Spoiler [\(Click to View\)](#)

Step three:

Click "Continue".

Spoiler [\(Click to View\)](#)

Step four:

Choose "Contacts" from the left lower menu bar.

Spoiler [\(Click to View\)](#)

Now Don't click "New Contact" I will fix the image later! Click "Import Contacts" then choose Facebook.

Spoiler [\(Click to View\)](#)

Step five:

This one is a little longer. You probably know your close friends good enough to get their security question correct but how about them technology challenged sexy bitches you never speak to? Well in this case them being technologically challenged is helpful to you. Most of the time (At least in my case) their e-mails are dead! This is great! All you have to do is re-create the EXACT same email they had and recover the password. For example lets say their email was "iluvnurdz@live.com" re-create it as "iluvnurdz@live.com".

"You can only create a new one if their email was recycled. If it hasn't you have to go through the security steps to reset the emails password."

Alright a few things I have learned in my hours of testing:

Good

1. Yahoo emails are mostly inactive.
2. Hotmail emails that have 2010 and below are usually inactive.
3. Most common questions are "Who was your best childhood friend?" and "What was the name of your first pet?" Just check their page and find the answer most of the time.

Bad

1. If it is @yahoo.com it probably doesn't have a security question which means no good (unless it is inactive).
2. You have to pass the "Who is this?" quiz on FB.
3. You have to have them added.

Tips:

1. The answer to "Who was your best childhood friend?" is most likely in most of their photos.
2. Nah that's about it.

Thanks for taking the time to read and good luck getting those accounts!

This might be known and if it is at least it will help some people.

chowmaine - December 9, 2013, 10:16 pm

Awesome tut :D with a little bit of doxing, this method is quite useful, thanks man!

CyberModz - December 10, 2013, 12:26 am

Amazing tut bro. I just tested it out and it works!

ajmal33 - December 10, 2013, 1:41 am

thanks you, you are great bro..!!!!

Babadook - December 10, 2013, 10:33 am

Your welcome guys! Glad I could be of some help.

Auschwitz88 - December 10, 2013, 10:40 am

Thanks for sharing this, mate! I will try it and I'll come back later to tell you if it worked for me or not :)

Shakiraa123 - December 10, 2013, 10:42 am

Really love the idea of recreating the same email to change the password. I'll give it a try later. Thanks for this helpful tut mate ;)

TheConsole - December 10, 2013, 10:51 am

Thanks for this tut.
I'm gonna give it a try.

Biscuits - December 10, 2013, 11:03 am

Bit basic but thanks OP! I might try have another go soon. :)

Uralya - December 10, 2013, 2:33 pm

currently reading this. sounds interesting. thanks.

HarveySpecter - December 10, 2013, 3:52 pm

i am going to fox my victim first and then do this method hope it works.

Tviken - December 10, 2013, 3:57 pm

Thanks OP for this TUT.

Good job.

I will test it out tomorrow :)

Babadook - December 11, 2013, 1:32 pm

Your welcome everyone. I hope you enjoyed the tut!

Ixlordxi - December 11, 2013, 4:48 pm

Awesome tutorial man! sounds interesting :)

Babadook - December 11, 2013, 7:35 pm

(Dec 11, 2013 05:48 PM)Ixlordxi Wrote: [\[CITE\]](#) Awesome tutorial man! sounds interesting :)

You're welcome. Hope it helps you out!

Billie Joe - December 12, 2013, 1:05 am

Thanks for this tut man, very HQ :D

HILL'S - December 12, 2013, 1:56 am

Thanks for sharing this, mate!

& welcome

JackDaHusky - December 12, 2013, 5:02 am

I can say for sure that with some help this tutorial works. Yahoo is one of the few remaining services that lets you find you Fb contacts emails.

The problem is when they have a gmail account, after that one I'm pretty much stcuk. Google is a bitch with security...

Babadook - December 12, 2013, 12:00 pm

(Dec 12, 2013 06:02 AM)JackDaHusky Wrote: [\[CITE\]](#) I can say for sure that with some help this tutorial works. Yahoo is one of the few remaining services that lets you find you Fb contacts emails.

The problem is when they have a gmail account, after that one I'm pretty much stcuk. Google is a bitch with security...

None of mine use Gmail for their account of I would try to figure out a way to help. Gmail is probably the most hackable email from the tutorials I see so you could search around HF to find one. Hope you figure it out!

Slimy - December 12, 2013, 12:10 pm

Looks like a great tutorial, very easy to follow.

I may test this :)

Babadook - December 12, 2013, 3:10 pm

Your welcome everyone glad I could help! And at least a few of the 800 said thanks.

Drifteh - December 12, 2013, 9:37 pm

Thanks Alot it Works?

works :)

NewFace - December 12, 2013, 11:16 pm

There was a tutorial almost the same with hotmail :) But now you got Yahoo, Thank you man :)
Good Stuff

Babadook - December 13, 2013, 1:00 pm

You're welcome. I'm glad i could be of use to you all!

Hannibal Rising - December 13, 2013, 1:05 pm

This looks great.
Going to try this out soon.

Thanks a lot OP!

Zen - December 13, 2013, 4:16 pm

Is it normal to have to wait 24 hours to login? I did the method but then got that.

Bangchu - December 13, 2013, 8:01 pm

It's very helpful, thank you very much.

munachim - December 13, 2013, 10:19 pm

very some facebook will be missing in my hood this time

kooddoo - December 14, 2013, 3:14 am

currently reading this. sounds interesting. thanks.

rfpd - December 14, 2013, 7:59 am

I got more mails ever than I did with email but this didn't import all contacts, why?

Hackz4lyfe1 - December 14, 2013, 10:40 am

Seemed a Little hard, and it doesn't work on any of my friends.

Enzio - December 14, 2013, 12:37 pm

Thanks for this tut.
I'm gonna give it a try.

mcfaker - December 14, 2013, 1:18 pm

I actually know something 3 times more complicated than this & its actually a real fb hack not just guessing security questions or finding outdated email. I dont know if I will share it or not yet.

J4mie - December 14, 2013, 1:20 pm

I think facebook updated so this method doesn't work anymore? I have done this before a while back and tried it again the other day and it was completely different :/

Brooklyn - December 14, 2013, 1:25 pm

Pretty decent tutorial, thank you for your contribution to the forum.

Babadook - December 14, 2013, 3:45 pm

(Dec 14, 2013 08:59 AM)rfpd Wrote: [\[CITE\]](#) I got more mails ever than I did with email but this didn't import all contacts, why?

Import them again. That got more for me. I only got like half of them the first time.

msmingle1 - December 14, 2013, 4:17 pm

Haha awesome tutorial i can't wait to try this.

Tracked - December 15, 2013, 5:14 pm

Could not get a single account. I guess everyone uses there email =P

id3vil - December 15, 2013, 5:46 pm

Nice tut man thinking about using it to mess with some friends

JHendrix - December 15, 2013, 8:51 pm

Looks very very cool will definitely try this out

Babadook - December 18, 2013, 4:54 am

Good luck with my method guys! I hope it works as well for you as it did for me!

Heavy Eco - December 18, 2013, 5:53 am

Nice, took like 4 facebook accounts lol. That's pretty legit.

stjimmy - December 19, 2013, 8:27 am

I stumbled across all of this just messing around. I wish I would have seen this from the get go. Thanks man.

Babadook - December 25, 2013, 2:00 pm

Your welcome everyone. Glad I could help you all!

Eeluminati - December 25, 2013, 2:10 pm

Wait, so when you recreate the email, do you mean making your yahoo email the email of there's? It's confusing.

Cyberdroid - December 25, 2013, 10:50 pm

Yeah Bud Fox is right. How can you make a exact email when it's already taken.

Eeluminati - December 25, 2013, 10:52 pm

(Dec 25, 2013 11:50 PM)Cyberdroid Wrote: [\[CITE\]](#) Yeah Bud Fox is right. How can you make a exact email when it's already taken.

Yeah exactly. Only thing I can think of is creating a yahoo account and saying you already have an email and making it the victims email.

dericjswag - December 25, 2013, 11:06 pm

Thanks for the tutorial will try this soon.

jarvis1 - December 26, 2013, 3:27 am

You can't re-create the e-mail with the same ID!! Microsoft (or Yahoo) doesn't allow you to do it. Now, what's the solution? D:

Piratehax - December 26, 2013, 3:46 am

Great TUT really helped thanks man.

?Reath - December 26, 2013, 3:57 am

Thanks man, an actually helpful tut.

matej203 - December 26, 2013, 5:07 am

really work for some people, thanks

Anonimox - December 26, 2013, 7:46 am

I will be trying to method out. thanks for the share.

Babadook - December 31, 2013, 2:45 pm

Your welcome guys! Glad I could be of some help!

amit007 - January 2, 2014, 9:59 am

HOW DO I CREATE THE SAME EMAIL ID... I DIDN'T GET THIS STEP!!!YAHOO/GMAIL WILL NOT ALLOW TO CREATE SAME EMAIL ID IS DER ANY WAY FOR DAT....WAITING RPLY FAST!!

Babadook - January 2, 2014, 11:34 am

(Jan 2, 2014 10:59 AM)amit007 Wrote: [\[CITE\]](#) HOW DO I CREATE THE SAME EMAIL ID... I DIDN'T GET THIS STEP!!!YAHOO/GMAIL WILL NOT ALLOW TO CREATE SAME EMAIL ID IS DER ANY WAY FOR DAT....WAITING RPLY FAST!!

You can only create a new one if their email was recycled. If it hasn't you have to go through the security steps to reset the emails password.

Eeluminati - January 2, 2014, 2:53 pm

(Jan 2, 2014 12:34 PM)Temptations Wrote: [\[CITE\]](#) You can only create a new one if their email was recycled. If it hasn't you have to go through the security steps to reset the emails password.

You should maybe include that in the thread. ?

Babadook - January 2, 2014, 3:13 pm

(Jan 2, 2014 03:53 PM)Bud Fox Wrote: [\[CITE\]](#) You should maybe include that in the thread. ?

Will do. Didn't think some might not understand that already.

xbucko13x - January 2, 2014, 6:32 pm

Aw looks amazing can't wait to try this out

Thanks :)

amit007 - January 2, 2014, 8:24 pm

Hmm its an interesting TUT can u tell me how can i see a email send to facebook for ex:- suppose someone has just send an email to a facebook email like "admin@facebook.com" OR "help@facebook.com" OR "noreply@facebook.com" or is there a way to send spoofed sms/email in name of "Facebook" im searching since months for a spoofed email & sms service.... & i know emkei.cz & also my own script but they are not working nowadays cannot recieve email from emkei on gmail/yahoo/fb ...plzzz give me a solution for this!!!!waiting for a reply....

Babadook - January 3, 2014, 2:22 pm

Sorry, the only way I knew of to spoof an email I lost months ago.

Ragnar Lothbrok - January 3, 2014, 3:47 pm

Worked first time :) this is gonna be fun

uR x S0Niic - January 7, 2014, 5:31 pm

See the bit were you Re- create & email. For example "garyb170@hotmail.co.uk." re-create it as "garyb170@hotmail.co.uk ". I tryed it on that account & I keep getting the same message for all off the other account's. This message>garyb170@hotmail.co.uk is already a Microsoft account. If it's yours, sign in now. Is there anyway round this dude?

howard2525 - January 7, 2014, 6:08 pm

I've used this many times and always works! It also helps if their Yahoo email was deleted back when they wiped it clean, then you just have to make a new one and you're in!

xtreme07 - January 7, 2014, 6:14 pm

thanks I will be trying this out very soon!

viganrozay - January 7, 2014, 7:25 pm

currently reading this, thanks for this tutorial

Yonaliz - January 7, 2014, 8:06 pm

It doesn't work for me.

At step two it comes up with a different "login to facebook with yahoo" page. No options to import contacts.

They must have patched it.

This method is dead.

SIM-1993099 - January 7, 2014, 10:02 pm

Good tutorial haha :) thank you so much.

Babadook - January 8, 2014, 4:47 am
