Thread: [OmniCoin Mining Tutorial \(Solo Guide\)](#)

OICN - December 12, 2013, 3:41 am

This Guide Is kind of outdated at this point in Omnicoin's Life, To get the most coins you should pool mine or switch to pool if you are currently solo mining unless you have a very high khash rate.

Best Of Luck to You All :)

I have received a few pm's from members trying to start mining Omnicoin (I don't mind helping :D).

I have pmed them back a quick tutorial I have written and figured might as well post it for people who are getting started. Will try to update/maybe add pictures once I get some sleep but hopefully this can help get you started :D

Tutorial

1st. Download the wallet from

<https://hackforums.net/showthread.php?tid=3923174&pid=36914259#pid36914259>

2.Open and let it sync.

I assume your windows so

Open up C:\Users\yourusername\AppData\Roaming

Easy especially if you are on windows 7 just search %appdata%

You then create a text file and ente

```
rpcuser=omni  
rpcpassword=omni  
addnode=192.241.154.95  
rpcport=43555  
server=1  
daemon=1
```

and save as omnicoin.conf it shouldn't be a text file, should just have a blank icon.

Then if you have cgminer or another miner skip to next step, if not

download a miner, I prefer cgminer (If you new to mining use -

<http://guiminer.org/guiminer-scrypt.html> and just plug in the information to use :))

Update link - for cgminer, the offical release is a non-compiled version so here is the original compiled one :) <http://ge.tt/api/1/files/5MKMAQ91/0/blob?download>

Open another text document in the cgminer or other miner folder

Enter

```
cgminer.exe --script -o 127.0.0.1:43555 -u omni -p omni -l 15 -g 1 -w 512 --thread-concurrency 24550 --gpu-powertune 20
```

You may have to bring the l 15 lower if you have a less powerful system, copy and paste that line into .txt file and save as whatever.bat Other settings might need to be tweaked for you, I just copied what I was testing the coin with. (this part got deleted last time I edited- Those settings are mine for my card, it's best to go to https://litecoin.info/Mining_Hardware_Comparison and find your card and use those settings

Needs to end in .bat and should change to a gear icon.

Now open .bat file. If you did everything correctly you should be mining :)

Hope that helps. Hope I didn't miss anything but very tired right now so hopefully someone can post if I missed something etc :D

???

Ubernoob - December 12, 2013, 4:19 am

Hey what would be a common solution when cgminer sais --script: unrecognized option.. I mean wth it's a friggin script miner

Black Reaper - December 12, 2013, 6:11 am

Thanks for the tutorial bro mining OMC :)

Dorian Nakamoto - December 12, 2013, 6:54 am

(Dec 12, 2013 05:19 AM)Ubernoob Wrote: [\[CITE\]](#) Hey what would be a common solution when cgminer sais --script: unrecognized option.. I mean wth it's a friggin script miner
Use version 3.7.2 or earlier. All version after that have script deleted

Flows - December 12, 2013, 8:23 am

Never mined any coins before, when I hover over the mining icon at the bottom of omnicoin client it says mining at 4k hashes so is it working and will I earn anything?

bajingan007 - December 12, 2013, 8:28 am

Thanks for the tutorial dude mining OMC... :)

The Real Slim Shaddy - December 12, 2013, 8:38 am

Mining did not start the bat file starts and closes itself

Flows - December 12, 2013, 8:44 am

(Dec 12, 2013 09:38 AM)The Real Slim Shaddy Wrote: [\[CITE\]](#) Mining did not start the bat file starts and closes itself

This happens to me too, I don't know why:(

Flows - December 12, 2013, 8:51 am

(Dec 12, 2013 09:49 AM)Saw? Wrote: [\[CITE\]](#) I get this: <https://puu.sh/5KoCf/4d333dd0d3.png>

No idea why. Do you have any idea what could cause this?
That says DogeCoin in your CMD, also what miner you using?

pym0l - December 12, 2013, 8:53 am

I get this: <https://puu.sh/5KoCf/4d333dd0d3.png>

No idea why. Do you have any idea what could cause this?

(Dec 12, 2013 09:51 AM)Flows Wrote: [\[CITE\]](#) That says DogeCoin in your CMD, also what miner you using?

I'm using CudaMiner.

Paradime - December 12, 2013, 8:54 am

It seems like different altcoins are just appearing all over the place nowadays.

Goodies - December 12, 2013, 8:55 am

What if I'm not on windows?

I'm kidding. I know Linux obviously supports Scrypt. I just don't know what the point of this is...

Harvey Specter - December 12, 2013, 9:05 am

You don't leave the username/password the same on the .config file right? you are supposed to change them?

The Real Slim Shaddy - December 12, 2013, 9:11 am

(Dec 12, 2013 10:05 AM)Harvey Specter Wrote: [\[CITE\]](#) You don't leave the username/password the same on the .config file right? you are supposed to change them?

No you keep the username and password same in the config file

Flows - December 12, 2013, 9:11 am

When I run the .bat, it just closed anyone know why?

Harvey Specter - December 12, 2013, 9:14 am

(Dec 12, 2013 10:11 AM)The Real Slim Shaddy Wrote: [\[CITE\]](#) No you keep the username and password same in the config file

Okay i did that another question, I did everything as i was supposed to yet when i click the .bat file it just opens the CMD and closes it instantly.

any reason?

The Real Slim Shaddy - December 12, 2013, 9:31 am

(Dec 12, 2013 10:14 AM)Harvey Specter Wrote: [\[CITE\]](#) Okay i did that another question, I did everything as i was supposed to yet when i click the .bat file it just opens the CMD and closes it instantly.

(Dec 12, 2013 10:31 AM)The Real Slim Shaddy Wrote: [\[CITE\]](#) I am facing the same problem let the author of this post come online

Just wasn't sure if it was only me or others were having the problem, Kinda glad im not the only one. Would make it seem like i can not follow the simplest tut. lol

Remix™ - December 12, 2013, 9:42 am

yeah the cmd closes instantly after clicking on the mining.bat I made...

iolaka - December 12, 2013, 9:49 am

Try this if your bat instantly closes

```
cgminer.exe --url 127.0.0.1:43555 -u omni -p omni
```

Note this is for GPU mining, if you don't have one of the listed graphics cards you won't be able to mine using GPU, alternatively you can use CPU miner (minerD)

Bat for cpu miner:

```
minerD.exe --url=127.0.0.1:43555 -u omni -p omni -t 3
```

Should work.

Remix™ - December 12, 2013, 9:53 am

The issue is that the CG miner that the OP put to download is an uncomplete file...there is no cgminer.exe in the folder....

Burra - December 12, 2013, 11:51 am

(Dec 12, 2013 10:49 AM)iolaka Wrote: [\[CITE\]](#) Try this if your bat instantly closes

```
cgminer.exe --url 127.0.0.1:43555 -u omni -p omni

(Dec 12, 2013 11:38 PM)Mael Wrote: [\[CITE\]](#) Yup. Same here.

Try using the --script tag. Currently it looks like you aren't.

Layla - December 12, 2013, 10:43 pm

I'm getting 25 kh/s with a card that's supposed to get 100. Why does this happen to me? I have the latest SDK and latest drivers.

scam. - December 12, 2013, 10:44 pm

(Dec 12, 2013 11:40 PM)beastlymac Wrote: [\[CITE\]](#) Try using the --script tag. Currently it looks like you aren't.

Ok. That may have been the problem. I will report back in 10 minutes and see what it is doing.

-

Ok so it has just being doing this:

I am using a HD7850 2gb and from what I can observe from this it is only at ~15kh. :(Any reason for that?

Dorian Nakamoto - December 12, 2013, 11:05 pm

(Dec 12, 2013 11:43 PM)?Emo Wrote: [\[CITE\]](#) I'm getting 25 kh/s with a card that's supposed to get 100. Why does this happen to me? I have the latest SDK and latest drivers.
What command line configuration are you using?

Layla - December 12, 2013, 11:09 pm

(Dec 13, 2013 12:05 AM)beastlymac Wrote: [\[CITE\]](#) What command line configuration are you using?
cgminer.exe --script -o 127.0.0.1:43555 -u omni -p omni, that's it.

Dorian Nakamoto - December 12, 2013, 11:16 pm

(Dec 13, 2013 12:09 AM)?Emo Wrote: [\[CITE\]](#) cgminer.exe --script -o 127.0.0.1:43555 -u omni -p omni, that's it.

What type of graphics card do you have?

Layla - December 12, 2013, 11:18 pm

(Dec 13, 2013 12:16 AM)beastlymac Wrote: [\[CITE\]](#) What type of graphics card do you have?
Amd 7850. I used to be able to get 300 kh/s, once I restarted my computer again it's back down to 20 kh/s average on all script coins. Even with all the settings added to the line it doesn't change anything.

scam. - December 12, 2013, 11:21 pm

(Dec 13, 2013 12:18 AM)?Emo Wrote: [\[CITE\]](#) Amd 7850. I used to be able to get 300 kh/s, once I restarted my computer again it's back down to 20 kh/s average on all scrypt coins. Even with all the settings added to the line it doesn't change anything.
I have a 7850 as well and I am having this problem.

Layla - December 12, 2013, 11:22 pm

(Dec 13, 2013 12:21 AM)Mael Wrote: [\[CITE\]](#) I have an 7850 as well and I am having this problem.
Oh SIGH, I hate how mining coins is just so glitchy.

ruskin_jaiswal - December 12, 2013, 11:25 pm

Thanks I like this tutorial ?

It increase my knowledge a bit.

Many thanks for this tutorial?

michael1026 - December 12, 2013, 11:26 pm

I'm averaging about 245 for about 4 hours and haven't gotten anything. Is this normal?

You're an idiot Imfao - December 12, 2013, 11:29 pm

im gonna start mining tomorrow. thanks for this tutorial man

3dVision - December 12, 2013, 11:31 pm

Thanks for OC help Sliar! Really appreciate it ?

Dorian Nakamoto - December 12, 2013, 11:31 pm

(Dec 13, 2013 12:18 AM)?Emo Wrote: [\[CITE\]](#) Amd 7850. I used to be able to get 300 kh/s, once I restarted my computer again it's back down to 20 kh/s average on all scrypt coins. Even with all the settings added to the line it doesn't change anything.
try this.

```
cgminer.exe --scrypt -o 127.0.0.1:43555 -u omni -p omni -l 13 -w 256 --thread-concurrency 8192
```

Layla - December 12, 2013, 11:35 pm

(Dec 13, 2013 12:31 AM)beastlymac Wrote: [\[CITE\]](#) try this.

```
cgminer.exe --scrypt -o 127.0.0.1:43555 -u omni -p omni -l 13 -w 256 --thread-concurrency 8192
```

There's nothing wrong with the settings it's something wrong with the card or software. I have AMD SDK installed and it worked for a little then its back down to low speeds. This card sucks :/

scam. - December 12, 2013, 11:38 pm

(Dec 13, 2013 12:31 AM)beastlymac Wrote: [\[CITE\]](#) try this.

```
cgminer.exe --scrypt -o 127.0.0.1:43555 -u omni -p omni -l 13 -w 256 --thread-concurrency 8192
```

That there boosted my speed up from ~15kh to about ~280kh/s.

Layla - December 12, 2013, 11:39 pm

(Dec 13, 2013 12:38 AM)Mael Wrote: [\[CITE\]](#) That there boosted my speed up from ~15kh to about ~280kh/s.

Great, doesn't work for me but works for you. I love my luck.

scam. - December 12, 2013, 11:40 pm

I am not sure if this is normal, but this here is just repeating.

This shit if confusing.

Layla - December 12, 2013, 11:45 pm

Congrats man you are mining :)

When you see accepted block you should get a payment to the wallet :)

Solo mining is when you find a block you get all of it.

the pool hopefully should be up over the next day or two.

Glad to help, let me know if you have any other questions etc

???

Dorian Nakamoto - December 13, 2013, 3:48 am

To find your graphics card or cpu optimal settings for script look here.

https://litecoin.info/Mining_hardware_comparison

rokutis22 - December 13, 2013, 5:22 am

my wont run at all, it says pool 0 slow/down or url invalid or something does someone know why ?

(Dec 13, 2013 10:59 AM)Focusal Wrote: [\[CITE\]](#) Also how do I mine with CPU? I have a 8320 eight core amd cpu. I want to mine with that too

you would need to download minerD (which is a cpu miner) then use the bat from the original post..just replace "cgminer" with "minerD"

here is a link to a 64bit ver of minerD that should work...

<http://sourceforge.net/projects/cpuminer/files/pooler-cpuminer-2.3.2-win64.zip/download>

look. my first post was a helpful one :)

bilko89 - December 13, 2013, 11:41 am

Any ideas guys?

You don't have a supported graphics card to mine with, mine with minderd which is a CPU miner.

bilko89 - December 13, 2013, 2:54 pm

(Dec 13, 2013 03:28 PM)iolaka Wrote: [\[CITE\]](#) You don't have a supported graphics card to mine with, mine with minderd which is a CPU miner.

Thanks mate, mining for the first time ?

XPLADOT - December 13, 2013, 3:32 pm

I am still getting pool 0 slow etc. I looked up my card settings and they are "aggression 14 worksize 160 sharethreads 8 gpu_thread_concurrency 2047"

I edited my .bat file to this "cgminer.exe --script -o 192.168.1.1:43555 -u omni -p omni -l 15 -g 1 -w 512 aggression 14 worksize 160 sharethreads 8 gpu_thread_concurrency 2047" and it throws the error "Unexpected extra commandline arguments"

Can somebody help me please? Thank you!

Layla - December 13, 2013, 3:45 pm

If you guys are getting errors, use GUIMiner. Very simple and less buggy for some cards.

jellyfish420 - December 13, 2013, 7:05 pm

(Dec 13, 2013 04:32 PM)XPLADOT Wrote: [\[CITE\]](#) I am still getting pool 0 slow etc. I looked up my card settings and they are "aggression 14 worksize 160 sharethreads 8 gpu_thread_concurrency 2047"

I edited my .bat file to this "cgminer.exe --script -o 192.168.1.1:43555 -u omni -p omni -l 15 -g 1 -w 512 aggression 14 worksize 160 sharethreads 8 gpu_thread_concurrency 2047" and it throws the error "Unexpected extra commandline arguments"

Can somebody help me please? Thank you!your getting unexpected extra commandline arguments cause your entering it in all wrong... your best bet is to copy the bat from post 1 and just change your numbers....

like you don't type aggression you use -l and worksize is -w...don't know why you have it twice...and diff values? share threads...you have an 8 core gpu? and lastly its --gpu-concurrency 24550...i believe what you were going for with 2047 is shaders...if you have 7970 or 280x it would be 2048 shaders... use this bat...

```
cgminer.exe --script -o 127.0.0.1:43555 -u omni -p omni -l 15 -g 1 -w 512 --thread-concurrency 24550 --gpu-powertune 20
```

strait from op...

V

You need to make sure the commands are specific to your graphics card.

Stinson - January 14, 2014, 2:05 am

(Jan 13, 2014 04:42 PM)CrazyForCoin Wrote: [\[CITE\]](#) You need to make sure the commands are specific to your graphics card.

cgminer --script -o stratum+tcp://omc.pools.doctor-blue.net:3333 -u miner.name -p password -l 19 -g 1 -w 256 --thread-concurrency 8192

Is there anything wrong with this?

What graphics card do you have? Try changing it to

Code cgminer.exe --script -o stratum+tcp://omc.pools.doctor-blue.net:3333 -u miner.name -p password -l 19

Also make sure you are using cgminer 3.7.2

Stinson - January 14, 2014, 4:07 am

Well I've been trying all the different variations of ways that have been posted on here, none have worked, and for the one on your post (for .bat) I get: "pool 0 slow/down or URL or credentials invalid"

Is this a problem on my end or is this something I can't fix? Perhaps with the gpu-powertune 20 at the end am I supposed to edit that to my gpu? if so I have a Nvidia GTX 260 (I know it isnt amazing for mining) so what would I do? Thanks.

It can mine but will get terrible speeds, between 20-30 khash most likely, you will need to at least pool mine.

You will also need to as far as I know mine with CUDA miner for nvidia cards.

I am not to familiar with Nvidia cards, so hopefully someone will assist you in setting up cuda miner, or if you want faster results

http://www.youtube.com/results?search_query=cudaminer

Stinson - January 16, 2014, 12:42 pm

pool 0 slow/down or URL or credentials invalid error keeps on coming to me,

is it possible to put the config file elsewhere?

i may add that i can poolmine just fine, any coin.

What? You are mining lol, im sure you have a low end graphics card though

f???????™ - January 19, 2014, 2:10 am

no i am currently using my gpu in ltc... decided to see how much i can crush using my cpu.

OICN - January 19, 2014, 2:16 am

(Jan 19, 2014 03:10 AM)f???????™ Wrote: [\[CITE\]](#) no i am currently using my gpu in ltc... decided to see how much i can crush using my cpu.

Well Omnicoin is a script coin like LTC and will almost always get horrible speeds.

Doctor Blue - January 19, 2014, 4:02 am

(Jan 19, 2014 02:57 AM)Mr.Coin Wrote: [\[CITE\]](#) What? You are mining lol, im sure you have a low end graphics card though

He's using a cpuminer, so that can be pretty hard to tell.

Of course... While he is mining, I don't think he'll ever earn any omnicoin from solo mining if the hashrate is less than 20 KH/s as the network is about 5 MH/s.

f???????™ - January 19, 2014, 11:31 am

i started mining with gpu this evening.. got 1000 coins just after 5 mins and then 3 hours no luck../.. guess thats how they work

Doctor Blue - January 19, 2014, 11:59 am

Well, no, that's how solo mining works. Join a pool, it makes a lot more sense and gives you a share of the block reward every time instead of giving you the block reward the very few times you're lucky to mine the block before anyone else.

f???????™ - January 20, 2014, 6:11 am

Do you mean to get a block?

It's all about luck. Even though Mr. Coin doesn't want to rewrite the guide to explain pools, I still think it fails to outline the issue with solo-mining.

OICN - January 20, 2014, 3:45 pm

I have not had time to rewrite the guide for pools (feel free to make a guide yourself...)

This guide was written right after the release just to help people trying to jump on it, never said it was the best tutorial.

Yes solomining can be a risky game since it could give you way more coins or 0 coins depending on your luck.

The reason I did this solo tutorial is because

- 1.We had no pools when this was written
- 2.Most people should be able to figure out pool mining (since it is way easier to setup then solo)

and I didn't think it really had to be done.

1.Signup for a pool
Go to getting started and get the url:port
Put that in your .bat
Create worker user and pass word, put those into .bat file
Forget the .conf settings.

Mine.

There..

Doctor Blue - January 21, 2014, 12:47 am

You know I should do that.

>>Edit: Done :)

???

Composes - April 7, 2014, 4:16 pm

How do we do this on mac? Thank you <333

paulmadore - May 17, 2014, 8:16 pm

I can't figure out what I'm doing wrong.

[img]http://grandroyalindustries.com/meg/whatamidoingwrong.png[/img]

I've opened the input/output port for that number. I've even tried using a port that is known to work with CPU Miner.

(Dec 12, 2013 04:41 AM)OICN Wrote: [\[CITE\]](#)

This Guide Is kind of outdated at this point in Omnicoin's Life, To get the most coins you should pool mine or switch to pool if you are currently solo mining unless you have a very high khash rate.

Best Of Luck to You All :)

I have received a few pm's from members trying to start mining Omnicoin (I don't mind helping :D).

I have pmed them back a quick tutorial I have written and figured might as well post it for people who are getting started. Will try to update/maybe add pictures once I get some sleep but hopefully this can help get you started :D

Tutorial

1st. Download the wallet from

<https://hackforums.net/showthread.php?tid=3923174&pid=36914259#pid36914259>

2.Open and let it sync.

I assume your windows so

Open up C:\Users\yourusername\AppData\Roaming

Easy especially if you are on windows 7 just search %appdata%

You then create a text file and ente

```
rpcuser=omni  
rpcpassword=omni  
addnode=192.241.154.95  
rpcport=43555  
server=1  
daemon=1
```

and save as omnicoin.conf it shouldn't be a text file, should just have a blank icon.

Then if you have cgminer or another miner skip to next step, if not

download a miner, I prefer cgminer (If you new to mining use -

<http://guiminer.org/guiminer-scrypt.html> and just plug in the information to use :))

Update link - for cgminer, the official release is a non-compiled version so here is the original compiled one :) <http://ge.tt/api/1/files/5MKMAQ91/0/blob?download>

Open another text document in the cgminer or other miner folder

Enter

```
cgminer.exe --script -o 127.0.0.1:43555 -u omni -p omni -l 15 -g 1 -w 512 --thread-concurrency 24550 --gpu-powertune 20
```

You may have to bring the l 15 lower if you have a less powerful system, copy and paste that line into .txt file and save as whatever.bat Other settings might need to be tweaked for you, I just copied what I was testing the coin with. (this part got deleted last time I edited- Those settings are mine for my card, it's best to go to https://litecoin.info/Mining_Hardware_Comparison and find your card and use those settings

Needs to end in .bat and should change to a gear icon.

Now open .bat file. If you did everything correctly you should be mining :)

Hope that helps. Hope I didn't miss anything but very tired right now so hopefully someone can post if I missed something etc :D

???

A_Sweden_Bro - June 24, 2014, 12:12 pm

Man this dosent work for me, god damnit!

?Dexter - June 24, 2014, 12:19 pm

I'm completely new to all this stuff, so my question is if I start mining with this method will it be an issue when I play games? (like fps lag etc). Currently have a msi laptop with gtx 660m

Bigandrewgold - June 24, 2014, 12:48 pm

it would be kinda pointless to mine with that. You won't make much and you'll just be destroying your laptop.

And yea, gaming would be pointless while mining.

Rollin Balls - July 10, 2014, 7:00 pm

I have 60GH/s would it be worth omnicoin mining?

dhahn85 - July 10, 2014, 7:20 pm

(Jul 10, 2014 07:00 PM)mookman209 Wrote: [\[CITE\]](#) I have 60GH/s would it be worth omnicoin mining?

60 GH/s is a ridiculous scrypt hashrate, Not sure its even possible. Now, 60 kh/s = not worth it ; 60mh/s = questionable, depending how long you can hold and how much faith you have in OMC rising is value and use.

Obli - July 11, 2014, 3:02 am

(Jul 10, 2014 07:20 PM)dhahn85 Wrote: [\[CITE\]](#) 60 GH/s is a ridiculous scrypt hashrate, Not sure its even possible. Now, 60 kh/s = not worth it ; 60mh/s = questionable, depending how long you can hold and how much faith you have in OMC rising is value and use.

He's probably thinking that you can mine with 60 GH/s for cheap like with BTC

Rollin Balls - July 12, 2014, 11:42 am

OH scrypt i was thinking asic I got an asic miner. I do have a radeon 7970 though.
