Spoiler ([Click to View](#))

Please give two reason why you like/ do not like this painting I did.

Total time: around 4 days.

I really like it because the brush you used is really defining and just simply beautiful. The detail you put into the rocks is just amazing.

Extremely good, if this is something you're serious about I suggest furthering yourself in graphics! :)

Sorry, where's the painting you made?

Based off of the picture.

Will add that to the OP, it was more or less practice. Also, before you call this ripping, I know someone on tag freak that does the same thing.

Not bad I like its style and how it looks, I hope to see more paintings from you!

I think the gray speckle things are really overdone. Not sure how you were trying to go with that. I also dislike the amount of texture brushes used on the rocks. I like the river and think it looks pretty awesome but I can't make out the rock form quite as clearly as I did with the others.

Looks pretty snazzy. I really like how the colors blend in and also the speckles if disrupted color are all up in your face. Great work OP.

Closed due to people not realizing what exactly I did. From now on I will do things from scratch.
