Thread: [Profitable Method\(s\)?](#)

I've tried so many things and nothing seems to work, I was going to start drop shipping but I was recently told it's a saturated business, is this true?

I really want to start making some money online kind of soon, anyone help??

3dVision - December 13, 2013, 4:38 am

Same here bro, looking for a few methods that actually work :/

Making money online is hard, unless you find a good niche which is hard enough as it is anyway. Good luck op ?

Deathy - December 13, 2013, 6:33 am

Damn, anyone help me with this issue? :/

Moxxi - December 13, 2013, 7:19 am

making money online isnt that hard tbh

and drop shipping works only if you are selling a niche that isnt saturated so you will need to do research

I have been doing PPC the last few days until i can build up my RR's and get a steady flow. I would like a way to make 50\$ a day. Could you help me out? I will be your apprentice and learn anything and everything you have to offer.

?Prototype:

No skype.

1. Could you please tell me if you have any investment to make?
2. You said Graphics. Be more specific, please enlist your portfolio or previous work, what tools do you work with?
3. CPA/PPD as if promoted offers and locked legit content, or promoted fake content which was password locked?
4. Kindly enlist any graphic resources if you have any, say PSD packs or stuff.

StNightmare:

1. PPC as in, have you been paying publishers to advertise your offer? Or are you talking about Neobux and such stuff, I call it "GPT".

2. Fast learning, perhaps you should learn something to help you in long term. I'll tell you what it

could be, kindly elaborate your skillset.

Being a good dancer or guitar player is a skill, list any abstract skills you both. Think Fiverrr.

You both, only you two may PM me. I won't respond to anyone else's, I'll keep an eye here so feel free to post on this thread, and I'll respond here only. Please do understand that I'm sick of explaining same stuff over and over to different individuals, that's why I'd like it to be public.

Awaiting response.
