Any reason why the cow is red and not black?

That's like hostgator having a giraffe as their logo?

I like your website. You need to fix one thing though:

Not Found

The requested URL /clientarea.php was not found on this server.

Additionally, a 404 Not Found error was encountered while trying to use an ErrorDocument to handle the request.

Great hosting service, love the customer support, hosting a client project. Really admire the free SSL +1 for that.

The server is very stable and no overselling.

Willing to upgrade to reseller plan, any coupon ?

Is nulled allowed on offshore ?

Thanks for the kind words? We are so delighted to know that you are enjoying our hosting services.

We do provide a 50off for the first month on reseller packages. The coupon code is '50off' and we do allow nulled scripts in our offshore server.

If there is any more queries feel free to pm me.
