Thread: [HF Script - Enhanced SYT Button](#)

Xerotic - December 13, 2013, 6:31 pm

This is a simple script that makes the SYT button in forums have the option of typing another user's name so you can see their threads instead.

=====

Example:

Will produce:

=====

Install Link: <http://userscripts.org/scripts/show/186091>

To use this, you must have Tampermonkey (Chrome) or Greasemonkey (Firefox).

Thanks! ?

Mr.V - December 13, 2013, 6:32 pm

This is pretty nice, thanks for the script. Will be using.

wellager - December 13, 2013, 6:32 pm

Yo dude, I heard you like to stalk your friends so I made a script so you could stalk on HackForums 'till you get banned.

Just kidding. Thanks, this will come in handy... meheh.

Applause - December 13, 2013, 6:33 pm

This seems like a really nice feature. I'll be sure to install this. Thanks, OP!

B0\$\$ - December 13, 2013, 6:35 pm

very nice script !! Thank you for this ! :)

Now you can stalk them all you want without harm ?

Artisanal - December 14, 2013, 4:13 am

Nice and very useful userscript. Now I can finally stalk all of [Snorlax's](#) userscripts.

You can now stalk anyone you want! I think it's cool to see someone's progression.

+mK - *December 14, 2013, 7:52 am*

I'd probably never personally use it, however, I like the fact that I could if I wanted. Good job dude.

^^
