Thread: [HF Script - View Thread Ratings Average](#)

Xerotic - December 14, 2013, 9:12 am

This is a simple lightweight script that allows you to see the thread rating average regardless if you have voted in the thread or not. Just hover over any of the 5 "stars" to see the average.

Example:

<http://userscripts.org/scripts/show/186134>

You must either have Tampermonkey (Chrome) or Greasemonkey (Firefox) installed to use this script.

Enjoy!

Grin - December 14, 2013, 9:17 am

That was a quick addition. Thanks! c:

Just updated it so that it works on showthread page as well... small addition, but might as well update real quick :P

Z?????????????eus - December 14, 2013, 9:23 am

But the suite [here](#) already has this feature

Thanks though!

Some people only need the single feature. ?

And I don't keep track what he makes. He uses some things that I originally made and I might come up with ideas that have been used as well.

Does this work for L33T and normal members too?
