Thread: [Why could my desktop be so loud?](#)

**Ifinger** - December 14, 2013, 4:24 pm

I got a desktop about a week ago and it use to be a government one. Does anyone know why my computer could be so loud? It is not hot it is just loud.

Specs: [IMG]<http://img5.imageshack.us/img5/5092/vilg.png>[/IMG]

What does it sound like? The fan blowing fast? The HDD reading data?

It could just be that your case fans are generally loud, many are.

**En1gma** - December 15, 2013, 4:21 am

It's probably the fans, you may want to buy quieter ones.
