Really fucking stupid OP.

Don't attack random websites for no fucking reason, that's just an asshole move. People work hard on websites, unless you get ANY benefit from it why ruin their work?

Did you delete all their files too?

Why are U getting angry Dude..m nt the only one who doing that..just replaced the index page nthng else...

Double X - December 14, 2013, 10:51 pm

Replacing indexes don't matter, as long as you don't destroy people's works.

Usually, I don't deface the websites, collect all the shells and be root admin. After that, you can do what you want on the server to test your experiments.

He probably symlinked these, not the path to choose if you actually want to learn something, but works.
