Thread: [Adify - An Adsense Exchange Group](#)

Apple Jacks - December 15, 2013, 2:02 pm

Welcome to, Adify - An Ad exchanging group.

Who we are ;

We are a very secure, protected, and high security Ad exchange group. What I mean by secure, is we do various safety checks for EVERY user that joins our group. This will prevent low quality users, and ensure that we are all safe while exchanging. We are all hereto make money, not get banned.

How it will work ;

How it will is you will post below in the comments and fill out the form I will give you down further in this thread. I will check these throughout the day and if I feel it's safe, I will contact you with info that you need to do to enter the group. There is around 3 steps right now to verify yourself to be able to join, it including proving your country that your in, making sure you aren't using VPNs, and this will be done over Team viewer or join.me. You can disable my control if you wish, I just want to check your location (IP) and make sure you are not using any IP changers. We will also check out the website you plan to use for the exchanging, if you do not already have one, then just give us what niche / idea you plan to use for exchanging.

Extra information ;

We will provide a simple and easy to follow guide on how to join the group as well as another guide on how to get everything set-up if you are new to this exchanging stuff. If you are new that is fine, just don't lie in your application, we will be able to tell if your lying or not as we may ask to see proof of past earnings if we feel that the security in our group will be decreased by letting that person join. Like I said, we are working hard to ensure this group is safe to use and is 100% safe and secure.

PS ; This group as of right now will only be available for Windows users (any verison) and android devices.

FAQ ;

Q - I am new to exchanging, how do I do it?

A - After applying, I will contact you with more info there will be a full and easy guide on how to join our group and how to start exchanging safely.

Q - I don't have an adnetwork, but I want to exchange, what do I do?

A - In the tutorial that I will provide after you apply, it will show you how to get into adsense, and that normally takes about a day to get accepted into adsense. If you want, you can use other companys, but I will not provide how to as I do not use any others.

Q - Can I exchange my PPD / CPA links?

A - No not at all, this is just for adsense and companys like it.

Q - How much will I earn a day?

A - It all depends, if your niche pays high each click, you will make more, but if it pays bad, you won't make as much. It also depends on how long you are on a day and how many exchanges you get done. Though, if your website is very new and not ranked in google a least a little, I would advise you to stay a lower amount per day while you build up your website and get more content, then slowly start doing more exchanges every day.

Q - Can I use a PPC network besides adsense?

A - Yes you can, only if u really can't use adsense, as they are the highest paying to my knowledge and experience, if you're using another, make sure to post the company you're using while filling out the form below!

Fill out the following form in the comments below ;

Code Name / Username ;

Age ;

Have you exchanged before (how long, how much, if yes) ;

Ad network ;

Country ;

Aragorn II Ellessar - December 15, 2013, 2:22 pm

Vouch for user. Personally not interested due to not being in this style of work. But he is experienced in this field and I'm sure you'd find what you're looking for in this group.
