Thread: [American Dragon: Jake Long - Extended Dragon Up sequence redrawn in 1080p](#)

Quad - December 16, 2013, 9:54 am

Hey guys :)

For the past week or so I've been redrawing frames in 1080p from American Dragon: Jake Long, a TV series I used to watch on Disney Channel as a kid.

I drew a total of 72 frames and the emblem that I created the 3D model from.
Why did I do this? To become better at vectorizing images, and for nostalgia of course.

What do you think? http://www.youtube.com/watch?v=GmJf56WUu_s

Wow, that looks so cool! Great animation there, what program did you use to make it?

After effects?

Keep it up!

Quad - December 16, 2013, 10:06 pm

Thanks! I drew the frames in Photoshop and put them together in After Effects where I also did all the digital effects and the tiny bit of 3D involved.

I totally forgot about this show until just long. I used to watch it all day every day.

OWWW!! AWESOME 10/10!! SOO NICE!
Watch everyday like 4th times.

Thanks :)

I really appreciate that after all the work I put into this.
