Thread: [\[BUKKIT\] Coding custom Bukkit plugins | Accepting BTC](#)

WhiteHat098 - December 16, 2013, 3:12 pm

Whitehat098's plugin shop

Hello guys,

I am developing custom Bukkit plugins for Minecraft servers that are running on Bukkit. I am a Bukkit developer since 2012 so I got a lot of experience to write good and stable plugins. I am developing for the following versions:

1.6.4 | 1.7.2

What type of plugins can you develop?

I can develop almost every plugin type. Think of minigames, RPG games (not doing this for my shop), administration and anti-griefing plugin; give me a project to work on and I will do it.

How can I pay?

You can pay me with BitCoins or PayPal. I prefer BitCoins and I give projects that are paying me with BitCoins a higher priority.

What are the prices?

- Minigame(s): \$15-\$30
- Minigame(s) with MySQL: \$30-\$40
- Shop plugins: \$3-10
- Administration plugins: \$5-10
- Administration plugins with MySQL: \$8-\$15
- Vault plugins: \$5
- Other plugins: \$3

If you want to see some work of me, private message me.

BTC: 14iYQpMqoXfH5rBco9fDo7whpbdLMBKaa3

NOTE: THIS IS A TEMP. TOPIC, WORKING ON THE DESIGN.
